Subject: PRIA Label Amendment – Addition of Electrostatic Sprayer Use Application
Product Name: Oxivir Tb
EPA Registration Number: 70627-56
Received Date: 10/19/2021
Action Case Number: 00331953

Dear Sara Seltzer:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

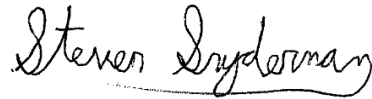

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. Pursuant to 40 CFR 156.10(a)(6), you must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under FIFRA and is subject to review by the Agency. See FIFRA section 2(p)(2). If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) lists examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process, FIFRA section 12(a)(1)(B). Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Assurance.

Page 2 of 2
EPA Reg. No. 70627-56
Action Case No. 00331953

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, please contact Perri Moeller by phone at (202) 566-0813, or via email at moeller.perri@epa.gov.

Sincerely,

A handwritten signature in black ink that reads "Steven Snyderman". The signature is written in a cursive style with a horizontal line underneath the name.

Steven Snyderman, Product Manager 33

 - Sanitizes
 - Tuberculocide
 - (Restroom) (&) (Bathroom) (Disinfectant Cleaner ¹)
 - Use Daily to Prevent the Buildup of Dirt and Grime.
 - *Virucide

(Marketing Statements)

1 Minute bactericidal, virucidal, (and 3 minute fungicidal)

1 Step Cleaning and Disinfection¹ in 1 minute

A disinfectant and cleaner (that cleans, disinfects and deodorizes in one labor saving step) when used according to disinfection directions for use.

A proven spot sanitizer on soft surfaces†

Alcohol Free

An effective one-step sanitizer-cleaner on hard nonporous surfaces when used according to directions for use as a non-food contact sanitizer

An effective one-step disinfectant cleaner for hard, nonporous surfaces

An effective soft surfaces† spot sanitizer

Breaks down (removes) (eliminates 99.9% of) (removes) (the most common) allergens (found in dust)++

Broad-spectrum (Multi-purpose) (Multi-surface) (Bactericidal) (*Virucidal) (Tuberculocidal) (Fungicidal) (Sanitizer) (Disinfectant) (activity)

Category IV Tox(icity) Rating (in all 6 toxicity categories)

Cleaning and disinfection in 1 minute

Cleans (and) disinfects (and deodorizes) hard, non-porous surfaces

Cleans, deodorizes and brightens in one step when used according to the disinfection directions

Cleans fast

Cleans grout

Cleans hard, non-porous water washable surfaces!

Cleans (tough) grease and grime (and) (institutional) (soils)

Cleans (tough) soap scum

(Cleans) (Removes) (Eliminates 99.9% of) (Destroys) stains

Compatible with microfiber (cloths)

Compatible with (most) (virtually all) hard, non-porous surfaces

Controls (Eliminates 99.9% of) odor-causing bacteria

{Note to Agency: Text appearing in [brackets] or (parenthesis) is done to show interchangeable or optional text. Commas may be added where needed. Any language which appears between {braces} and is italicized is for administrative purposes only and will NOT appear on final printed label. Listed uses and use sites can be used partially or in their entirety. }

Deodorizer (Odor Counteractant)

Deodorizes odor-causing bacteria

Disinfects as it cleans when used according to disinfection directions for use

Disinfects hard non-porous surfaces by killing [99.9%] SARS-Related Coronavirus 2 [SARS-CoV-2] [USA-WA1/2020] (the cause of COVID-19) [in one step¹]

Dual action formulation providing broad spectrum activity against; fungi, tuberculosis, *viruses, and bacteria

Easy / Effective¹

Effective – Cleans soap scum

Effective cleaner

Effective against Bloodborne Pathogens- *HBV, *HCV & *HIV-1

Effective against SARS-Related Coronavirus 2 [SARS-CoV-2] [USA-WA1/2020] [in 1 minutes] on hard non-porous surfaces

[Effective against] [Disinfects] [Kills] [99.9%] SARS-CoV-2 [virus] (the cause of COVID-19) on hard non-porous surfaces

Eliminates 99.9% of (odor-causing) bacteria (from surfaces)

Eliminates 99.9% of odors (caused by bacteria), (mold), (and) (mildew)

For (a) cleaner, fresher {insert use sites/surfaces from lists below} (or any hard, non-porous washable surface where disinfection is required.)

For any non-food contact hard, non-porous surface where germs are a concern.

For everyday use (in institutional (and) (industrial) facilities)

For multiple cleaning tasks

For non-scratch cleaning of showers and tubs, shower doors and curtains†, fixtures and toilet bowls

For use (in) (Hospitals), (and) (Health Care) (settings) (as a multi-purpose disinfectant cleaner¹)

For use in Home(s)

For terminal cleaning

Formula utilizing AHP.

Formulated with patented hydrogen peroxide technology

Fragrance Free Formula (Unscented)

Good for most indoor cleaning tasks

High (Frequently) touch[ed] surface(s) [disinfectant] [and] [cleaner¹]

(Highly) compatible (formula) for most hard, non-porous surfaces

Intense cleaning action

Keeps day care centers clean

Kills (99.9% of) germs in 1 minute

Kills [99.9% of] SARS-CoV-2 on hard non-porous surfaces

Kills (99.9% of) the cold[¶] and flu[£] viruses

Kills bacteria and sanitizes

Kills bacteria and *viruses on hard, non-porous surfaces in 1 minute

Kills bacteria (in 1 minute)

Kills¹ (the virus that causes COVID-19,) SARS-CoV-2

(Kills) (Destroys) (Eliminates 99.9% of) germs while it cleans

(Kills¹) (Effective¹ against) (the) cold[¶] (and) (flu[£]) virus(es)

[Kills¹] [Effective¹ against] SARS-CoV-2 (the virus that causes COVID-19)

[Kills¹] [Eliminates¹] 99.9% SARS-Related Coronavirus [SARS-CoV-2] [USA-WA1/2020] [causative agent of COVID-19] [the virus that causes COVID-19]

Kills odor-causing bacteria

Kills¹ Coronavirus [SARS-CoV-2] [USA-WA1/2020] [causative agent of COVID-19] on hard non-porous surfaces

Kills *viruses

Leaves {insert use sites/surfaces from lists below} smelling clean (with a clean fresh scent)

Leaves a fresh, clean scent

{Note to Agency: Text appearing in [brackets] or (parenthesis) is done to show interchangeable or optional text. Commas may be added where needed. Leaves no (dull) (sticky) residue.
Leaves surfaces virtually streak-free
No fragrance added
No streaking (or) (filming) (sticky residue) (formula)
Non-corrosive (to eyes) (and) (skin)
Non-tainting (leaves no unsightly residues)
Non-irritating to eyes
Non-irritating to respiratory tracts
Non-irritating to skin
Not a skin (dermal) sensitizer
Not for use on skin
Odor control (odor neutralizer) (deodorizer) (odor-counteractant) formula (on hard non-porous surfaces)
Odor Neutralizer
One-step cleaner sanitizer⁴ on soft surfaces†
Oxivir® Clean
Patented (Technology)
Powerful to remove (dried) (stuck on) dirt (grime) (food) (spills) (grease) (greasy messes)
Powerful cleaning
Proven disinfectant¹/cleaner/fungicide/mildewcide/virucide that is effective for hard, non-porous surfaces
Quickly (eliminates 99.9% of) (removes) odors
Reduces allergens++
Sanitizes
Soft surface† sanitizing (in 30 seconds).
Specially designed to dissolve (penetrate) the toughest (stubborn) soils
Spot sanitizes soft surfaces† in 30 seconds
(Step-saving), (Labor-saving,) (Time-saving,) (Cost-saving) formula
Suitable for everyday use
This product kills germs and removes allergens++ while cleaning hard, nonporous surfaces¹
++This product removes the following (non-living) allergens++: (cat dander), (cockroach matter), (cockroach debris), (cockroach particles), (dog dander), (dust mite debris), (pet dander), (pollen particles)¹
To be used in sanitizing and disinfecting of hard, non-porous non-food contact surfaces and non-critical equipment which may harbor or spread germs
Use daily to prevent the build-up of dirt and grime
Use only one product to get a streak-free shine plus antimicrobial action
(Uses) (Harnesses) the cleaning power of hydrogen peroxide
Versatile, Convenient formula
Will not leave grit or soap scum

(General Uses:)

For Use in Health Care, Veterinary, Animal Housing, Dental, (Life Science) Laboratory, Medical, Educational, Retail, Fitness, Hospitality, Industrial & Institutional Facilities, Food Processing Establishments, and Hospitals.

This product is a one-step (hospital-use) germicidal disinfectant (and) (deodorant) (odor-counteractant) (odor neutralizer) designed for general cleaning, (and) disinfecting (deodorizing) (of) hard, non-porous inanimate surfaces. It cleans¹ by removing dirt, grime, and other common soils found (in) (on) *{insert use sites/surfaces from lists below}* (or any hard, non-porous washable surface where disinfection is required.)

(It is designed for use on) (Use daily on) (the following) (hard, non-porous inanimate surfaces): *{insert surfaces from lists below}* (where disinfection is required). A potable water rinse is required for food contact surfaces. Do not use on glassware, dishes and utensils.

This product is a one-step (hospital-use) germicidal disinfectant and deodorant (odor-counteractant) (odor neutralizer) designed for cleaning, (and) disinfecting (deodorizing) (of) hard, non-porous inanimate surfaces (in just one step¹). It cleans¹ by removing dirt, grime, and other common soils found in *{insert use sites/surfaces from lists below}* (or any hard, non-porous washable surface where disinfection is required.)

[It is designed for use on] [Use daily on] (the following) (hard, non-porous inanimate surfaces): *{insert use sites/surfaces from lists below}* – (where disinfection is required). A potable water rinse is required for food contact surfaces. Do not use on glasses, dishes and utensils.

Disinfectant for use with electrostatic sprayers against bacteria and viruses. Not for use to treat TB or Fungi.

Tested using electrostatic sprayers.

(CLAIMS & USES:)

(This product) (Oxivir Tb) *{marketed product name}* cleans and disinfects¹ *{insert organism name(s) from list in Efficacy Claims section}* including ESKAPE pathogens - Enterococcus faecium, Staphylococcus aureus, Klebsiella pneumonia, Acinetobacter baumannii, Pseudomonas aeruginosa, and Enterobacter aerogenes

(This product) (Oxivir Tb) *{marketed product name}* kills ESKAPE organisms with a 1 minute kill time.

(This product) (Oxivir Tb) *{marketed product name}* cleans and disinfects, killing ESKAPE organisms with a 1-minute dwell time.

Kills ESKAPE bacteria in 1 minute

(Hospitals/Health Care Facilities/Dental Offices/Life Science Laboratories:)

This product is a one-step (hospital-use) (laboratory-use) germicidal disinfectant and deodorant (odor-counteractant) (odor neutralizer) designed for cleaning, (and) disinfecting, (deodorizing) (of) hard, non-porous inanimate surfaces. This product cleans¹ by removing dirt, grime, food residue; dead skin, blood and other organic matter commonly found in *{insert use sites/surfaces from lists below}*. It also eliminates odors, leaving (restroom) surfaces smelling clean and fresh. Use where

{Note to Agency: Text appearing in [brackets] or (parenthesis) is done to show interchangeable or optional text. Commas may be added where needed. Any language which appears between {braces} and is italicized is for administrative purposes only and will NOT appear on final printed label. Listed uses and use sites can be used partially or in their entirety. }

odors are a problem.

This product cleans, disinfects and deodorizes hard, non-porous inanimate (hospital) (medical) (dental) (laboratory) surfaces in one step when used according to the disinfectant directions (with no rinsing required). [Its non-abrasive formula is designed for use on] [Use daily on] [(the following) (hard, non-porous inanimate surfaces :)] *{insert use sites/surfaces from lists below}*] (or any hard, non-porous washable surface where disinfection is required.) (found in) *{insert use sites/surfaces from lists below}* (where disinfection is required). (It can be used to pre-clean and disinfect hospital items: *{insert use sites/surfaces from lists below}* (where disinfection is required). A potable water rinse is required when disinfecting food contact surfaces. Do not use on glasses, dishes and utensils.

(Animal Housing Facilities :)

This product cleans by removing dirt, grime, blood, urine, fecal matter and other common soils found in animal housing facilities, grooming facilities, farms, kennels, pet stores, veterinary clinics, laboratories or other small animal facilities. It (also) eliminates odors leaving surfaces smelling clean and fresh.

This product cleans, disinfects and deodorizes hard, non-porous environmental surfaces in one step when used according to the disinfectant directions. [Its non-abrasive formula is designed for use on] [Use daily on] [Use daily to clean and disinfect] (hard, non-porous surfaces (of):) *{insert use sites/surfaces from lists below}* (where disinfection is required.) found in (barns, pens and stalls) animal housing facilities.

[This product can be used against bacteria, *viruses, fungi, tuberculosis and mildew on hard non-porous surfaces found in: *{insert use sites from list below}*]

{or}

[(Oxivir Tb) (This product) can be used (in) (on) hard non-porous surfaces (of the following items) (in the following areas): *{insert use sites/surfaces from lists below}*]

{or}

[This product has been developed to aid in the reduction of cross-contamination between treated surfaces (not only in hospitals (and healthcare facilities), but also) in: *{insert use sites from list below}*]

- Urine [stains]
- Wine stains

(Soft Surface[†] Sanitization:)

- A proven spot treatment sanitizer on soft surfaces[†]
- An effective spot treatment soft surface[†] sanitizer
- Spot treatment Sanitizes soft surfaces[†] (in one step) (in 30 seconds)

(Great) For use as a spot treatment sanitizer on soft surfaces[†] (composed of cotton or polyester) found in (hospitals), (medical offices) (nursing homes), (healthcare facilities), (and) (dental offices). (This product) Kills (removes) (sanitizes) microorganisms on (hospital) soft surfaces[†] or fabric[†] including: blinds, bedding, blankets, chairs, couches, curtains, drapes, exercise mats, gym bags, headrests, linens, mats, mattresses, seat (soft) cushions, shades, sheets, sofas, sports equipment (lining), towels, upholstered furniture, upholstery, washcloths, and window treatments. Removes (and) (or) (eliminates 99.9% of) odors by killing odor-causing bacteria on soft surfaces[†] or fabrics[†]. A cost effective solution compared to laundering or dry cleaning (hospital) curtains.

[†]plain cotton weave and 100% polyester fabric

Malodor(s) (Activity) (Counteractancy) – eliminates (destroys) odors and odor-causing bacteria on hard, nonporous surfaces in restroom areas, behind and under sinks and counters, and storage areas (and other places where bacterial growth can cause malodors).

{Note to Agency: Text appearing in [brackets] or (parenthesis) is done to show interchangeable or optional text. Commas may be added where needed. Any language which appears between {braces} and is italicized is for administrative purposes only and will NOT appear on final printed label. Listed uses and use sites can be used partially or in their entirety. }

{Claims against Emerging Viral Pathogens}

This product qualifies for emerging viral pathogen claims per the EPA’s ‘Guidance to Registrants: Process for Making Claims Against Emerging Viral Pathogens not on EPA-Registered Disinfectant Labels’ when used in accordance with the appropriate use directions indicated below.

This product meets the criteria to make claims against certain emerging viral pathogens from the following viral categories:

- *Enveloped viruses*
- *Large, non-enveloped viruses*
- *Small, non-enveloped viruses*

<i>For an emerging viral pathogen that is a/an...</i>	<i>...follow the directions for use for the following organisms on the label:</i>
<i>Enveloped virus</i>	<ul style="list-style-type: none"> • <i>Poliovirus type 1 (ATCC VR-1000), Strain Brunhilde</i>
<i>Large, Non-Enveloped Viruses</i>	<ul style="list-style-type: none"> • <i>Feline Calicivirus (ATCC VR-782) / Norovirus</i>
<i>Small, Non-Enveloped Viruses</i>	<ul style="list-style-type: none"> • <i>Poliovirus type 1 (ATCC VR-1000), Strain Brunhilde</i>

{The statements shall be made only through the following communications outlets: technical literature distributed exclusively to health care facilities, physicians, nurses and public health officials, "1-800" consumer information services, social media sites and company websites (non-label related). These statements shall not appear on marketed (final print) product labels.}

{Acceptable claim language:}

{Product name} has demonstrated effectiveness against viruses similar to {name of emerging virus} on hard, non-porous surfaces. Therefore, (this product) ({Product name}) can be used against {name of emerging virus} when used in accordance with the directions for use against {insert name of supporting virus(es) from list above} on hard, non-porous surfaces. Refer to the [CDC or OIE] website at {pathogen-specific website address} for additional information.

{or}

{Name of illness/outbreak} is caused by {name of emerging virus}. {Product name} kills similar viruses and therefore can be used against {name of emerging virus}. when used in accordance with the directions for use against [Poliovirus type 1] [Feline Calicivirus] on hard, non-porous surfaces. Refer to the [CDC or OIE] website at {website address} for additional information.

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

{Note to reviewer: The following paragraph will be used on labels that list medical devices as defined by the FDA, and is manufactured accordingly.}

(This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the blood stream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to pre-clean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.)

For Use as a Cleaner or One-Step Disinfectant Product:

1. Pre-clean visibly soiled areas.

{Note to Agency: Text appearing in [brackets] or (parenthesis) is done to show interchangeable or optional text. Commas may be added where needed. Any language which appears between {braces} and is italicized is for administrative purposes only and will NOT appear on final printed label. Listed uses and use sites can be used partially or in their entirety. }

2. Spray [Spray/apply] evenly over hard, non-porous inanimate surface to be cleaned, 6 – 8 inches from surface, making sure to wet surfaces visibly.
3. All surfaces must remain visibly wet for 1 minute. Use a 5 minute contact time for Tb and a 3 minute contact time for fungi.
4. Wipe surfaces dry (or rinse) (or allow to air dry).

Note: Rinsing is not necessary unless floors are to be coated with finish or restorer. All food contact surfaces must be rinsed with potable water. Do not use on glassware, utensils, or dishes.

{Note to Agency: Text appearing in [brackets] or (parenthesis) is done to show interchangeable or optional text. Commas may be added where needed. Any language which appears between {braces} and is italicized is for administrative purposes only and will NOT appear on final printed label. Listed uses and use sites can be used partially or in their entirety. }

For Use as a Cleaner or One-Step Disinfectant Product with an Electrostatic Sprayer:

Electrostatic Sprayer directions are for efficacy claims with 1 minute contact time. This is not to be used to treat surfaces for Tb or Fungi.

1. Consult User Manual for Electrostatic Sprayer before use.
2. Ensure no bystanders or pets are in the room that is to be treated. Operator should wear a half face respirator with chemical specific cartridges and N95 filters
3. Place the electrostatic spray function in the ON position for electrostatic spray models that have the functionality to toggle ON/OFF. If the sprayer has the ability to change nozzles that impact particle size, set the particle size to a volume median diameter (VMD) $\geq 40 \mu\text{m}$.
4. Pre-clean visibly soiled areas.
5. Using the sprayer, apply disinfectant evenly over the hard, non-porous inanimate surface to be cleaned, 2-3 feet from surface, making sure to wet surfaces visibly.
6. All surfaces must remain visibly wet for 1 minute. Wipe surfaces dry (or rinse) (or allow to air dry).
7. Allow the treated room to remain unoccupied for 15 minutes before reentering.

Note: Rinsing is not necessary unless floors are to be coated with finish or restorer. All food contact surfaces must be rinsed with potable water. Do not use on glassware, utensils, or dishes.

For Use as a Tuberculocide:

1. Pre-clean visibly soiled areas.
2. Spray [Spray/apply] evenly over hard, non-porous inanimate surface to be cleaned, 6 – 8 inches from surface, making sure to wet surfaces visibly.
3. Allow the surface to remain visibly wet for 5 minutes.
4. Wipe surfaces dry (or rinse) (or allow to air dry).
5. Change solution after each use (application).

To Kill Fungi:

1. Pre-clean visibly soiled areas.
2. Spray [Spray/apply] evenly over hard, non-porous inanimate surface to be cleaned, 6 – 8 inches from surface, making sure to wet surfaces visibly.
3. Allow surface to remain visibly wet for 3 minutes.
4. Wipe surfaces dry (or rinse) (or allow to air dry).

***KILLS HIV AND HCV and HBV ON PRE-CLEANED INANIMATE SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS** in health care settings (Hospitals, Nursing Homes) and other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood/body fluids, and in which the surfaces/objects likely to be soiled with blood/body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS) Hepatitis B Virus (HBV), or Hepatitis C Virus (HCV).

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATING AGAINST HIV-1 (AIDS Virus), HBV OR HCV OF SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS:

Personal Protection: (Disposable) (latex, nitrile, or vinyl) Protective Gloves, gowns, face masks, and eye coverings must be worn during all cleaning of body fluids, blood, and decontamination procedures.

Cleaning Procedures: Blood/Body Fluids must be thoroughly cleaned from surfaces/objects before application of this product.

Contact Time: Allow surface to remain visibly wet for 1 minute to kill HIV-1, HBV and HCV. Use a 5 minute contact time for Tb and a 3 minute contact for fungi.

Disposal of Infectious Material: Blood/Body Fluids must be autoclaved and disposed according to Federal, State and local regulations for infectious waste disposal.

{Note to Agency: Text appearing in [brackets] or (parenthesis) is done to show interchangeable or optional text. Commas may be added where needed. Any language which appears between {braces} and is italicized is for administrative purposes only and will NOT appear on final printed label. Listed uses and use sites can be used partially or in their entirety. }

For Use as a Bactericide, Fungicide and *Virucide with (a) (an) [Mechanical Sprayer] [Low Pressure Sprayer]:

1. Pre-clean visibly soiled areas.
2. Spray [Spray/apply] hard, non-porous environmental surfaces, making sure to wet surfaces visibly.
3. All surfaces must remain visibly wet for 1 minutes for bactericidal and *virucidal efficacy. Allow 5 minutes for Tuberculocidal efficacy and 3 minute contact time for fungi.
4. Let air dry.

Animal Housing Facilities (Including Veterinary Clinics, (Equine) Farms, Livestock, Swine and Poultry Houses): For cleaning and disinfecting the following hard, non-porous surfaces: feeding and watering equipment, utensils, instruments, cages, kennels, stables, catteries, etc.

1. Remove all animals and feeds from premises, animal transportation vehicles, crates, etc.
2. Remove all litter, droppings and manure from floors, walls and surfaces of facilities (including pens, chutes, and barns) occupied or traversed by animals.
3. Empty all troughs, racks, and other feeding or watering appliances.
4. Thoroughly clean all surfaces with soap or detergent and rinse with potable water. Saturate surfaces by spraying with product for a period of 1 minute. Use a 5 minute contact time for TB and a 3 minute contact time for fungi.
5. Spray handling and restraining equipment, as well as forks, shovels, and scrapers used for removing litter and manure.
6. Ventilate buildings and other closed spaces.
7. Do not house animals or employ equipment until treatment has been absorbed, set or dried. Thoroughly scrub treated feed racks, troughs, mangers, automatic feeders, fountains, and waterers with soap or detergent, and rinse with potable water before reuse.

For Use to Clean and Disinfect Life Science Laboratory Surfaces:

1. Pre-clean visibly soiled areas.
2. Spray [Spray/apply] evenly over hard, non-porous inanimate surface to be cleaned, 6 – 8 inches from surface, making sure to wet surfaces visibly.
3. Allow the surface to remain visibly wet for 1 minute. Use a 5 minute contact time for Tb and a 3 minute contact time for fungi.
4. Wipe surfaces dry (or rinse) (or allow to air dry).

For use as a Non-Food Contact Sanitizer:

1. Pre-clean visibly soiled areas.
2. Apply Solution with spray, cloth, disposable wipe or mop to hard, non-porous environmental surfaces.
3. Allow the surface to remain visibly wet for 30 seconds.
4. Wipe surfaces dry (or rinse) (or allow to air dry).
5. Change solution after each use (application).

To Spot Sanitize Soft Surfaces:

1. Remove visible soil prior to sanitization.
2. Hold bottle upright 6 – 8" from surface. Spray until fabric is wet. DO NOT SATURATE.
3. Allow surface to remain visibly wet for 30 seconds.
4. (Gently blot with a clean (damp) (color-safe) cloth) (and) (or) Let air dry. [For difficult odors or heavy fabrics, repeat application.] [Repeat as needed.]

[Note: Prior to first use on a particular surface, it is recommended to test in a small, discreet area if there is concern of incompatibility.]

For Use as a Cleaner and/or Deodorizer:

Apply on to hard, non-porous inanimate surface to be cleaned, making sure to wet surfaces visibly. Wipe surfaces (dry) (or rinse).

(Allergen Destruction)

To Clean and Destroy Specified Allergens: Spray [Spray/Apply], wait 1 minute, and wipe excess. (Allow to air dry) (or) (rinse). (If streaking is observed, wipe with a clean, damp (cloth or) paper towel.)

Allergens:

- Cockroach matter -or- particles

{Note to Agency: Text appearing in [brackets] or (parenthesis) is done to show interchangeable or optional text. Commas may be added where needed. Any language which appears between {braces} and is italicized is for administrative purposes only and will NOT appear on final printed label. Listed uses and use sites can be used partially or in their entirety. }

- Dust mite matter -or- particles
- Pet dander -or- dog and cat dander

(Refill)

(To Transfer This Product Into Smaller (Secondary) Containers:)

[This product may be transferred into clean, properly labeled containers for use elsewhere within your facility.] The small container and transfer items (plastic funnels or hand pumps) must be clean and dry. Pour (or pump) product directly into a properly labeled smaller container being careful not to spill any product. Keep containers sealed when not in use. Refill in a well ventilated area.

[Storage and Disposal for Institutional Use Products]

Storage and Disposal

Do not contaminate water, food or feed by storage or disposal. Store in original container in areas inaccessible to small children. Keep securely closed. Do not allow product to freeze.

PESTICIDE STORAGE

Store in a dry, well-ventilated area away from chemicals, direct light, heat or open flame. Do not mix with other cleaning or disinfecting products.

PESTICIDE DISPOSAL

Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. For more information on the disposal of unused, unwanted product and the clean up of spills, contact the EPA Regional Office of the Manufacturer for guidance.

CONTAINER Handling (Note to reviewer – One or more of the following paragraphs for Container Disposal will be selected, depending on packaging type:)

NONREFILLABLE SEALED OR SMALL CONTAINERS: (Note to reviewer: Several of our packaging options are sealed containers or bottles designed to reduce worker exposure to the concentrate. None of these can be triple rinsed because they are closed, sonically welded, sealed containers. The following text will be used on these sealed container types or containers 5 gallons or smaller:)

Nonrefillable container. Do not reuse or refill this container. Wrap empty container and put in trash or offer for recycling if available.

NONREFILLABLE NON-RIGID CONTAINERS: Note to reviewer: Several of our packaging options are Bag-in-Box containers (a plastic bag liner supported inside a box) or are flexible bag-type containers (such as ACCUPACK™ Containers). These flexible containers are exempt from the triple rinsing requirements. The following text will be used on these container types:

Nonrefillable container. Do not reuse or refill this container. Wrap empty container and put in trash or offer for recycling if available.

LARGE NONREFILLABLE CONTAINERS: Note to reviewer: One of the following paragraphs will be used on labels for rigid, nonrefillable containers too large to shake (larger than 5 gallons):

{Note to Agency: Text appearing in [brackets] or (parenthesis) is done to show interchangeable or optional text. Commas may be added where needed. Any language which appears between {braces} and is italicized is for administrative purposes only and will NOT appear on final printed label. Listed uses and use sites can be used partially or in their entirety. }

Nonrefillable container. Clean container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ¼ full with water and replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for at least 30 seconds. Stand the container on its end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times. Offer container for reconditioning or recycling if available.

{or}

Nonrefillable container. Clean container promptly after emptying. Pressure rinse as follows: Empty the remaining contents into application equipment or a mix tank and continue to drain for 10 seconds after the flow begins to drip. Hold container upside down over application equipment or a mix tank or collect rinsate for later use or disposal. Insert pressure-rinsing nozzle in the side of the container, and rinse at about 40 PSI for at least 30 seconds. Drain for 10 seconds after the flow begins to drip. Offer for reconditioning or recycling if available.

REFILLABLE CONTAINERS: *Note to reviewer: One of the following paragraphs will be used on labels for refillable containers:*

Refillable container. Refill this container with (this brand or brand name) pesticide only. Do not reuse this container for any other purpose.

Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller.

OR

Pressure rinsing the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller.

To clean the container prior to final disposal, empty the remaining contents from this container into application equipment or mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate water with the pump for 2 minutes. Pour or pump rinsate into application equipment or rinsate collection system. Repeat this rinsing procedure two more times.

ENVIRONMENTAL HAZARDS *(for labels with veterinary use patterns)*

This product is toxic to birds, fish and aquatic invertebrates. Caution should be used when applying indoors because pets may be at risk.

ENVIRONMENTAL HAZARDS *(for containers of 5 gallons or 50 lbs. or more)*

Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting agency has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

{Note to Agency: Text appearing in [brackets] or (parenthesis) is done to show interchangeable or optional text. Commas may be added where needed. Any language which appears between {braces} and is italicized is for administrative purposes only and will NOT appear on final printed label. Listed uses and use sites can be used partially or in their entirety. }

{Graphics - May be placed anywhere on the label}

{Graphics of any surfaces or use sites approved on the master label may be used on the product label}

SUPPLEMENTAL LABELING

FOR USE WITH ELECTROSTATIC SPRAYERS

Read the label affixed to the container for Oxivir® Tb before applying. Use of Oxivir® Tb according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the container for Oxivir® Tb, EPA registration number 70627-56.

OXIVIR® Tb

Disinfectant for use with electrostatic sprayers against bacteria and viruses. Not for use to treat Tb or Fungi.

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

For Use as a Cleaner or One-Step Disinfectant Product with an Electrostatic Sprayer:

Electrostatic Sprayer directions are for efficacy claims with 1 minute contact time. This is not to be used to treat surfaces for Tb or Fungi.

1. Consult User Manual for Electrostatic Sprayer before use.
2. Ensure no bystanders or pets are in the room that is to be treated. Operator should wear a half face respirator with chemical specific cartridges and N95 filters
3. Place the electrostatic spray function in the ON position for electrostatic spray models that have the functionality to toggle ON/OFF. If the sprayer has the ability to change nozzles that impact particle size, set the particle size to a volume median diameter (VMD) $\geq 40 \mu\text{m}$.
4. Pre-clean visibly soiled areas.
5. Using the sprayer, apply disinfectant evenly over the hard, non-porous inanimate surface to be cleaned, 2-3 feet from surface, making sure to wet surfaces visibly.
6. All surfaces must remain visibly wet for 1 minute. Wipe surfaces dry (or rinse) (or allow to air dry).
7. Allow the treated room to remain unoccupied for 15 minutes before reentering.

Note: Rinsing is not necessary unless floors are to be coated with finish or restorer. All food contact surfaces must be rinsed with potable water. Do not use on glassware, utensils, or dishes.

See the Oxivir® Tb container label for use directions and additional required information for First Aid, Precautionary Statements, and Storage and Disposal.
