PRECAUTIONARY STATEMENTS**HAZARDS TO HUMANS AND DOMESTIC ANIMALS****CAUTION**

Harmful if swallowed. May cause eye irritation. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling.

ENVIRONMENTAL HAZARDS

Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters or rinsate.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For use on plants in non-crop and non-timber areas only. Not for use on crops, timber, or other plants being grown for sale or other commercial use, or for commercial seed production, or for research purposes.

FIRE ANT CHARLIE™ is for use on lawns, turf, golf courses, and grounds, rangeland, pasture, ornamental gardens or parks and other non-cropland for control of fire ants. Following application, **FIRE ANT CHARLIE™** is collected by the worker ants and distributed throughout the colony to feed the queens and brood. Within six (6) to eight (8) weeks there is considerable ant mortality and a continual decline of the fire ant colony. This product will kill the queens as well as worker ants. When used as directed, all signs of fire ant infestation should be gone within three (3) to four (4) months. Fire ants should not be present again for at least one year.

Apply **FIRE ANT CHARLIE™** when fire ants are active. Apply when the ground is dry and no rain is anticipated for 6 to 8 hours. Do not apply in strong wind or when air temperature is below 50° F. For best results, apply in early morning or late afternoon.

Mound Treatment:

Apply one heaping tablespoon per mound. Sprinkle **FIRE ANT CHARLIE™** uniformly around the mound covering a 2-3 foot diameter area. Treat new mounds as they appear.

Broadcast Treatment:

Using a rotary type spreader, or applied manually, broadcast **FIRE ANT CHARLIE™** evenly over the area at the rate of three (3) pounds per acre. A second application at the above rate may be made after 5 days in severely infested areas. Allow six (6) to eight (8) weeks for signs of mound activity to begin to disappear.

Electrical Equipment Treatment:

Apply three heaping tablespoons of **FIRE ANT CHARLIE™** around outside air conditioning units, well pumps, meter loops, distribution panels, and any other electrical items where fire ants are present. This treatment is recommended once every two months during the summer.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in a dry place. Do not store where children or animals may gain access. Keep lid tightly closed when not in use.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Do not reuse empty container. Puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.

WARRANTY AND DISCLAIMER

Wilcox Engineering Company, Inc. makes no warranty of merchantability, fitness for any purpose or otherwise expressed or implied concerning this product or its uses which extend beyond the use of the product under normal conditions in accord with the statements made on this label.
