Julee Kasprisin Regulatory Affairs State Industrial Products 3100 Hamilton Avenue Cleveland, OH 44114

JUN 26 2009

SUBJECT:

Application for Pesticide Notification – Label Change per PR Notice 2007-4

Formula 400 PARCH® EPA Reg. No. 70799-7

Application Dated May 4, 2009

Dear Ms. Kasprisin:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 2007-4 for the above product. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 2007-4, and finds that the label changes requested fall within the scope of this PRN. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on <u>nonrefillable</u> containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please contact me directly at 703-305-6249 or Terri Stowe of my staff at 703-305-6117.

Sincerely,

Linda Arrington

#### DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read the entire label before using the product

Formula 400 PARCH is a nonselective herbicide that can be applied for posternergent or preemergent weed control. Formula 400, PARCH is a specially designed formulation for complete vegetation control by action through foliage contact and root absorption. Use Formula 400 PARCH in industrial sites, around buildings, roadways, right-of-ways, lumber yards, tank farms, cemeteries, driveways, parking lots, fence areas, recreational areas and airports, Formula 400 PARCH is water emulsifiable and noncomosive to equipment

SPOT TREATMENT: For control of annual and susceptible perennial weeds (such as downy bromegrass, catigrass, goosegrass, quackgrass, purcturevine, golderrod and plantain) thoroughly mix 2-3 pints of Formula 400 PARCH in 3 gallons of water to spray up to 250 square feet for thorough uni-

LARGE AREA TREATMENT: Uniformly spray one gallon of Formula 400 PARCH mixed in ten gallons I water over 1000 square feet. Thoroughly wet all foliage to ensure contact action. Best results are obtained when application is made white growth is succutient. Where vegetation is tall and dense, use 1 1/2 gallons of Formula 400 PARCH in ten gallons of vater per 1000 square feet. Although Formula 400 PARCH has considerable activity through foliar contact, much

of its activity is through the roots, and therefore, adequate rainfall is necessary to move the chemical into the root zone.

For faster top-kill of existing vegetation, apply Formula 400 PARCH at the above dilution rates in diesel oil, fuel oil or weed oil.

Do not use Formula 400 PARCH on land to be cropped, or near desirable trees, shrubs or plants, as injury may occur. Do not apply to areas underlaid by roots of desirable trees and shrubs. Avoid drift to desirable plants. Do not apply to a single treated area more than twice per growing season.

Do not allow spray to drift from the application site and contact people, structures people occupy at any time and the associated property, parks and recreation areas, nontarget crops, aquatic and wetland areas, woodlands, pastures, rangelands, or animals.

### STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Do not store near fertilizers, seeds, insecticides or fungicides. Keep container closed when not in use. Store this product only in its original container and place in a locked storage area out of the reach of children. Do not store, use, spill or pour near heat, sparks or open flame.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instruction, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA regional office for guidance.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying). Titple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ½ full will water. Replace and tighten closures. Tip container on its side and roll back and forth, ensuring at least one complete revolution, for 30 seconds Stand the container on its end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times Offer for recycling if available.

WARRANTY NOTICE: State warrants that this material conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the directions for use. This product is sold subject to the understanding that the buyer assumes all risks of use or handling which may result in loss or damage which are beyond the control of the seller, such as for example incompatibility with other products, or materials in or on the soil or crop. State makes no other express or implied warranty of fitness or merchantability. To the fullest extent of the law, the exclusive remedy of the user or buyer, and the limit of the liability of losses, injuries or damages resulting from the use or handling of this product shall be the purchase price paid by the user and buyer for the quantity of this product involved. The buyer and all users are deemed to have accepted the terms of this notice, which may not be varied by any verbal or written agreement.
