1. Contact Point (Complete items directly below for identification of individual to be contacted, if necessary, to process this application.)					
Name JULEE KASPRISIN		Title Regulatory Affairs Specialist		Telephone No. (Include Area Code) 216.931.7640	
Certification I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law.					6. Date Application Received (Stamped)
2. Signature <i>Julee Kasprisin</i>		3. Title Regulatory Affairs Specialist			
4. Typed Name JULEE KASPRISIN		5. Date November 13, 2001			

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read the entire label before using the product. State KLING N' KILL is a non-selective herbicide that can be applied for post-emergent or pre-emergent weed control. State KLING N' KILL is a specially designed formulation for complete vegetation control by action through foliage contact and root absorption. State KLING N' KILL is to be used in areas such as industrial sites, around buildings, roadways, right-of-ways, lumber yards, tank farms, cemeteries, driveways, parking lots, fence areas, recreational areas and airports. State KLING N' KILL is water emulsifiable and non-corrosive to equipment.

SPOT TREATMENT: For control of annual and susceptible perennial weeds (such as downy brome grass, oatgrass, goosegrass, quackgrass, puncturevine, goldenrod and plantain) thoroughly mix 1 quart of State KLING N' KILL in 5 quarts of water following the mixing instructions below. Using a State sprayer, spray this mixture up to 250 square feet to give thorough and uniform coverage.

For best results and optimum clinging action add 1 quart State KLING N' KILL to the empty sprayer. Next add 2 quarts of cool tap water and swirl or stir gently. Wait 5 minutes and then add the 3 additional quarts of water, one quart at a time. Stir or swirl the mixture gently after the addition of each quart of diluting water. After adding all of the water close the sprayer by turning the handle clockwise to lock in place. Pick up sprayer and shake well for approximately 1 minute. Pump up sprayer to pressurize following the directions on the sprayer label and proceed to spray on target vegetation.

State KLING N' KILL will effectively kill weeds even if mixing is done incorrectly and clinging action is not obtained. It will be most effective, however, when the clinging action is obtained.

LARGE AREA TREATMENT: Dilute 2 gallons of State KLING N' KILL in 10 gallons of water using the following mixing instructions. Add 2 gallons of State KLING N' KILL to a clean and empty tank or drum. Add 6 gallons of water and stir or mix well. Wait 5 minutes and then add the 4 additional gallons of water, two gallons at a time. Mix well after each addition of water. After adding all of the water mix the solution again for at least 5 minutes to insure a uniform thick emulsion. Spray this mixture uniformly over 2000 square feet. Thoroughly wet all foliage to insure contact action. Best results are obtained when application is made while growth is succulent.

A Mariner Sprayer can be used to apply State KLING N' KILL for effective large area treatment. To use the Mariner Sprayer remove the nylon foot strainer from the pump intake hose. Turn down the adjustment screw on the pressure relief valve to avoid excessive recirculation of the KLING N' KILL mixture or it will become too thick to pump.

Although State KLING N' KILL has considerable activity through foliar contact, much of its activity is through the roots and, therefore, adequate rainfall is necessary to move the chemical into the root zone. During seasons with excessive rainfall causing heavy weed growth, repeat treatment may be required.

When vegetation is tall and dense use 2 gallons of State KLING N' KILL in 10 gallons of water per 1000 square feet. For hard to kill perennial weeds and grasses such as Johnson grass, bindweed and wild carrot, use 2 gallons of State KLING N' KILL in 10 gallons of water per 750 square feet.

For pre-emergent use in freezing weather, or if desired, apply State KLING N' KILL at the above dilution rates in diesel oil, fuel oil, or weed oil. STATE KLING N' KILL SHOULD NOT BE USED ON LAND TO BE CROPPED, or near desirable trees, shrubs or plants; as injury may occur. Do not apply to areas underlaid by roots of desirable trees and shrubs. Avoid drift to desirable plants.

KLING N' KILL

FORMULA 444 • NON-SELECTIVE WEED KILLER

• DOUBLE ACTION — Works through foliage contact and root absorption.
LONG TERM CONTROL • WATER EMULSIFIABLE

ACTIVE INGREDIENTS

Prometon: 2,4-bis (isopropylamino) — 6-methoxy-s-triazine ★ 3.12%

INERT INGREDIENTS † 96.88%

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS KEEP OUT OF REACH OF CHILDREN WARNING

May be fatal if swallowed, inhaled or absorbed through the skin. Do not breathe vapors or spray mist. Do not get in eyes, on skin, or on clothing.

STATEMENT OF PRACTICAL TREATMENT:

IF SWALLOWED: Do not induce vomiting. Call physician immediately.

IF INHALED: Move patient to fresh air. Seek medical attention.

IF IN EYES: Flush immediately with plenty of water for at least 15 minutes and get medical attention.

IF ON SKIN: Flush area with water and wash with soap and water. Remove contaminated clothing and wash separately.

NOTES TO PHYSICIAN:

There is no specific antidote if State KLING N' KILL is ingested. Do not induce emesis, and take care to avoid aspiration of stomach contents during gastric lavage. Give a saline laxative and supportive therapy.

ENVIRONMENTAL HAZARDS:

Do not apply directly to any body of water. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water by cleaning of equipment, or disposal of wastes.

PHYSICAL OR CHEMICAL HAZARDS:

Do not use or store near heat or open flame.
