DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For outdoor use or for use in semi-enclosed areas such as porches and patios. Place candles around the perimeter of the area to be protected. Use 4 candles per 50 square feet. Place candles on a heat-resistant surface, away from anything flammable, and out of reach of children and pets. Keep wick trimmed to ¼ inch (6 mm) at all times. Container may become hot; handle carefully. Do not blow out or extinguish with water, smother flame to extinguish. Never leave a burning candle unattended.

For maximum protection light candles and allow a molten pool of wax to fully form around the wick, approximately 20 to 30 minutes. Mosquitoes are (blocked) (inhibited) (disoriented) by the inhibitor plume produced by the candle(s). If you can smell the fragrance from the candle, you are in the inhibitor plume. Burns for (XX) hours (burn time is dependent upon candle size).

Storage: Store in original container in a cool, dry place.

Disposal: Do not reuse this container. Place in trash or offer for recycling if available.

Optional label claims
