GENERAL: This product, when used on HorseAround™ cotton mesh garments, aids in the protection of horses from mosquitoes and biting flies. Certain uncovered (untreated) areas, such as legs, may need to be treated with a repellent registered for use on horses.

To Aid in the Control of Mosquitoes and Biting Flies: Adjust the trigger sprayer nozzle to deliver a fine spray and apply to HorseAround™ cotton mesh garments when mosquitoes or biting flies become a nuisance. Hang untreated HorseAround™ garments outside or in a well ventilated area and back each garment with a piece of thin plastic sheeting. Spray the outside surface of each HorseAround™ garment using a steady back and forth motion to ensure even and thorough coverage to the entire garment area. Apply at a rate of 21 fl.oz. (2/3rd of the container) to treat a single HorseAround™ Stable Sheet or Riding Sheet. Apply at a rate of 11 fl.oz. (1/3rd of the container) to treat a HorseAround™ Headpiece. Allow treated garments to dry thoroughly before use. **Important:** To prolong the effectiveness of HorseAround™ treated garments, store dry garments in a sealed plastic bag and in a cool, dry area when not in use. DO NOT re-treat garments more often than once every seven weeks, or until HorseAround™ garments have been laundered six times.

STORAGE & DISPOSAL

Storage: Store in a cool, dry area away from heat or open flame. Avoid storage at temperatures below 32°F. Keep in original container and preferably in a locked storage area. **Disposal:** Do not reuse empty bottle. Wrap bottle in several layers of newspaper and discard in trash.
