ALL-WEATHER FORMULA

Did you know that:

Since slugs and snails are nocturnal feeders, apply OR-CAL SLUG-PEST® Mini-Pellets late in the day.

Born with both male and female sex organs, any two slugs or snails can breed.

NOTE: This package is sold by weight.

Only 9% of the slug population appears above ground at any time.

Metaldichloride, a powerful and effective molluscicide, in OR-CAL can act as a repellent. OR-CAL has successfully formulated a balance of attractants, feeding stimulants and metaldichloride in SLUG-PEST Slug & Snail Bait.

These creatures have voracious appetites and do damage above and below ground.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Not for use on plants being grown for sale or other commercial use, or for commercial seed production, or for research purposes. For use on plants intended for aesthetic purposes or climatic modification and being grown in interior plantscapes, ornamental gardens or parks, or golf courses or lawns and grounds.

To control snails and slugs on the following vegetable and fruit crops, apply to soil surface around plants and trees. Do not contaminate edible parts of foliage.

GARDEN AREAS: Toss these dry pellets throughout the entire garden, especially around bedding plants and other low-growing plants where slugs and snails may congregate. If ground to be baited is dry, sprinkle until wet before applying. To avoid damage to your garden, start applying these pellets before snails and slugs begin to appear at the beginning of the spring planting season. Repeat at 3-week intervals, or as necessary.

FRUIT CROPS: Apples, apricots, cherries, grapes, peaches, pears, nectarines, plums, avocados, blackberries, boysenberries, citrus, loganberries, raspberries, and strawberries.

VEGETABLES: Asparagus, beans, blackeyed peas, broccoli, brusselsprouts, cabbage, melons, carrots, cauliflower, corn, cucumbers, eggplants, endive, garlic, kale, kohlrabi, horseradish, lettuce, leeks, okra, onions, peas, peppers, potatoes, pumpkins, radishes, rutabagas, salsify, shallots, spinach, squash (summer and winter), Swiss chard, tomatoes, and turnips.

FOR SNAILS AND SLUGS IN DICHONDRA, CLOVER AND GRASS LAWNS: Distribute pellets over entire lawn as necessary. One pound will cover 800 to 1,500 Sq. Ft.
