July 29, 2010

Ann Beaulieu AgroFresh, Inc./Rohm and Haas Company 100 Independence Mall West Philadelphia, PA 19106-2399

> RE: Product Name: SmartFresh SmartTabs EPA Reg. No.: 71297-3 Application for Label Notification dated July 19, 2010 to update the storage and disposal statement per Pesticide Registration (PR) Notice 2007-4 and add an additional U.S. patent number.

Dear Ms. Beaulieu:

The Biopesticides and Pollution Prevention Division is in receipt of your application for Notification under PR Notice 98-10 dated above. A preliminary screen of this request has been conducted for its applicability under PR Notice 98-10 and it has been determined that the action(s) requested falls within the scope of PR Notice 98-10. Our records have been duly noted, and the label submitted with this application has been stamped "Notification Accepted" and will be placed accordingly in our records.

If you have any questions concerning this action, please feel free to contact Mr. Colin Walsh at (703) 308-0298 or via email at <u>walsh.colin@epa.gov</u>.

Sincerely,

Linda A. Hollis

Linda A. Hollis, Chief Biochemical Pesticides Branch Biopesticides and Pollution Prevention Division (7511P)

Attachment for 8570-1 71297-3 July 19, 2010

Notification of label change per PR Notice 2007-4. This notification is consistent with the guidance in PR Notice 2007-4 and the requirements of EPA's regulations at 40 CFR 156.10, 156.140, 156.144, 156.146 and 156.156. No other changes have been made to the labeling or the Confidential Statement of Formula for this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if the amended label is not consistent with the requirement of 40 CFR 156.10, 156.140, 156.144, 156.146 and 156.156, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

This notification is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

Re: SmartFresh[™] SmartTab EPA Registration Number 71297-3 Active Ingredient = 1-methylcyclopropene Compliance with PR Notice 2007-4: Pesticide Management and Disposal; Standards for Pesticide Containers and Containment

To meet compliance with PR Notice 2007-4, the lot number has been added to the May 26, 2009 approved SmartFresh SmartTab label, which included disposal instructions per PR Notice 2007-4.

Patent numbers covering this technology have also been added to this label as allowed under PR Notice 98-10.

Enclosed please find a copy of the modified label with all changes highlighted and in red font.

If you have any questions, please contact me at 215-619-5534 or <u>abeaulieu@agrofresh.com</u>. Thank you.

Sincerely,

ιυς. Ο αις

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Causes slight eye irritation. Harmful if absorbed through skin. Harmful if inhaled. Harmful if swallowed. Avoid contact with skin, eyes or clothing. Avoid breathing vapor. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove contaminated clothing and wash before reuse.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Applicators and other handlers of this product must wear:

- Long-sleeved shirt and long pants
- Shoes plus socks
- Safety glasses or goggles

Applicators and other handlers must follow manufacturer's instructions for cleaning and maintaining PPE. If no such instructions exist for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations • Users should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. • Users should remove PPE immediately after handling this product. Wash the outside of c gloves before removing. As soon as possible, wash thoroughly and change nto clean clothing. 71297-3 SmartFresh™ SinartTab

Agricultural Use Requirements

Use this product only in accordance with its labeling and with the Worker Protection Standard 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, nurseries and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in the box only apply to uses of this product that are covered by the Worker Protection Standard.

REI: Do not enter or allow worker entry into treated areas prior to venting the volatile active ingredient from the treatment area. For enclosed areas including but not limited to storage rooms, coolers, shipping containers, enclosed truck trailers, ventilation shall continue until after thirty minutes (30) minutes of using fans or other mechanical ventilating system. In greenhouses, two (2) hours of ventilation using fans or other mechanical ventilating systems or four (4) hours of ventilation using vents, windows or other passive ventilation.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, prior to venting the volatile active ingredient from the treatment area is:

- Coveralls
- Chemical-resistant gloves made of any waterproof material
- Shoes plus socks

• Respirator with an organic-vapor removing cartridge with a prefilter approved for pesticides (MSHA/NIOSH approval number prefix TC-23C), or a canister approved for pesticides (MSHA/NIOSH approval number prefix TC-14G) or a NIOSH approved respirator with an organic vapor (OV) cartridge or canister with any N,R,P, or HE prefilter.

71297-3 SmartFresh™ SmartTab Last label revision July 19, 2010 Page 4 of 16 Non-Agricultural Use Requirements

The requirements in this box apply to uses of this product that are not within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170).

REI: Do not enter or allow worker entry into treated areas prior to venting the volatile active ingredient from the treatment area. For enclosed areas including but not limited to storage rooms, coolers, shipping containers, enclosed truck trailers, ventilation shall continue until after thirty minutes (30) minutes of using fans or other mechanical ventilating system. In greenhouses, two (2) hours of ventilation using fans or other mechanical ventilating systems or four (4) hours of ventilation using vents, windows or other passive ventilation.

PPE required for early entry into enclosed areas prior to venting is:

- Long-sleeved shirt and long pants
- Chemical-resistant gloves made of any waterproof material
- Shoes plus socks

• Respirator with an organic-vapor removing cartridge with a prefilter approved for pesticides (MSHA/NIOSH approval number prefix TC-23C), or a canister approved for pesticides (MSHA/NIOSH approval number prefix TC-14G) or a NIOSH approved respirator with an organic vapor (OV) cartridge or canister with any N,R,P, or HE prefilter.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state or tribe, consult the State or Tribal Agency responsible for pesticide regulation. All applicable directions, restrictions, precautions and conditions of sale and warranty are to be followed. This labeling must be in the user's possession during application.

71297-3 SmartFresh™ SmartTab Last label revision July 19, 2010 Page 5 of 16

PRODUCT INFORMATION

SmartFreshTM is a unique tool for counteracting many of the undesirable effects of both internal (produced within the plant) and external sources of ethylene on ornamentals, including fresh cut flowers, potted flowers, bedding, nursery and foliage plants. By counteracting ethylene, SmartFreshTM provides many benefits to ornamentals during transport and storage including:

- Reducing internal ethylene production
- Protection from external sources of ethylene
- Reducing respiration
- Delaying senescence
- Reducing chilling injury
- Reducing premature flower death
- Reducing premature leaf and flower drop and leaf yellowing

SmartFresh[™] is used just prior to harvest, immediately after harvest, just prior to shipment, upon arrival from the supplier, and/or just prior to sale. SmartFresh[™] is effective under both cool (below 55°F, 13°C) and warm (above 55°F, 13°C) temperature conditions.

Ornamentals must be exposed to the volatile active ingredient of SmartFreshTM in enclosed areas, such as storage rooms, greenhouses, coolers, shipping containers, enclosed truck trailers. This product is not intended for use outdoors or in other non-enclosed areas. These enclosed treatment areas must be gas tight as leakage will reduce SmartFreshTM's effectiveness.

Cut Flowers, Potted Flowers, Bedding, Nursery and Foliage Plants

SmartFresh[™] treatment benefits many flowers and plants such as, but not limited to:

Achillea, Aconitum, Agapanthus, Alchemilla, Allium, Alstroemeria, Alyssum, Aphelandra, Aquilegia, Asclepias, Astrantia, Asparagus fern, Azalea, Begonia, Bouvardia, Brassaia (*Schefflera*), Brodiaea (*Triteleia*), Calathea, Campanula, Carnation, Celosia, Centaurea, Chamaedorea, Chelone, Coleus, Cordyline, Cymbidium, Crocosmia (*Montbretia*), Daucus (Queen Annes Lace), Delphinium, Dendrobium, Dianthus, Dicentra, Dizygotheca, Doronicum, Echium, Eremurus, Eustoma, (*Lisianthus*), Ficus, Freesia, Fuchsia, Geranium, Gladiolus, Godetia, Gypsophila, Hibiscus, Ilex (Holly), Impatiens, Ixia, Kalanchoe, Kniphofia, Lavatera, Lily, Lysimachia, Miniature Carnation, Monkshood, Pelargonium, Petunia, Philodendron, Phlox, ce Physostegia, Poinsettia, Radermachera, Rose, Rudbeckia, Salvia, Saponaria, Scabiosa, Silene, Snapdragon, Solidaster, Stock, Streptocarpus, Sweet William, Trachelium, Trolkius, Veronica, ce Wax Flower, and Zygocactus.

71297-3 SmartFresh™ SmartTab Last label revision July 19, 2010 Page 6 of 16 SmartFresh[™] is used just prior to harvest, immediately after harvest, just prior to shipment, upon arrival from the supplier, and/or just prior to sale. Flowers and plants are treated whether or not they may have been previously treated with SmartFresh or another anti-ethylene product. Additional applications are beneficial for prolonged storage periods and for some species with more than one flower per stem (i.e. snapdragons, delphiniums, miniature carnations, and alstromeria) and flowers at different stages of development on the same plant (i.e. geraniums, impatiens, and azaleas).

Plants being held for shipment in enclosed areas are easily treated with SmartFreshTM. For example, non-boxed sleeved potted plants and cut flowers (held dry or in solution), or boxed plants and cut flowers with the lids and/or precooling vents completely open and directly exposed to the surrounding atmosphere can be treated. Bedding or potted plants on movable racks are also easily treated.

Application Method and Rate

Prior to application, ensure that the treatment area can be properly and promptly sealed following application. SmartFreshTM SmartTabs are used in conjunction with the SmartFreshTM Activator Kit. SmartFreshTM SmartTabs are **Green** tablets that, when mixed with **Blue** Activator Tablets in a proprietary Activator Solution, release the volatile active ingredient 1-methylcyclopropene (1-MCP). Make sure that you have a sufficient supply of both SmartFreshTM SmartTabs and SmartFreshTM Activator Kits available to treat your selected treatment area.

Step 1: Selection of the appropriate number of SmartTabs and SmartTab Activator Kits for use

a) Accurately determine the volume of the EMPTY treatment area in cubic feet. Multiply inside dimensions: volume = length X width X height. For example, if the treatment area is 10 feet high x 20 feet long x 12 feet wide, the treatment volume would be $10 \times 20 \times 12 = 2400$ cubic feet. To calculate the height measurement for greenhouses with a peaked roof, use one half of the sum of the height at the peak plus the height at the wall.

b) Choose the correct number of **Green** SmartFresh[™] SmartTabs according to the size of the area as follows.

Use one GREEN tablet per 150 cubic feet of treatment area or For 20 foot truck container use 7 GREEN tablets For 40 foot truck container use 14 GREEN tablets

Never use more than ten (10) Green SmartFresh[™] SmartTabs per activator kit. If more than ten (10) Green SmartFresh[™] SmartTabs are needed, you must divide them among two (2) or more SmartFresh[™] Activator Kits. Each Kit activates up to 10 SmartFresh[™] SmartTabs <u>only</u>.

000000 0000 000 000 000 000

000000

Step 2. Evaluation Of The Quality Of The Treatment Room / Trailer / Container/Greenhouse

To be used with SmartFreshTM, rooms/containers/trailers/greenhouses must be gas tight and have an internal fan for mixing the atmosphere.

Check that:

- All room/trailer/container/greenhouse drain holes are plugged
- There are no holes in the walls, ceiling, or floor
- All vents to outside air are closed
- When viewed from a dark interior, no outside light is visible
- Door seals are in EXCELLENT condition
 - No missing rubberNo large cracksNo plastic slat doorsNo roller top doors
- Scrubbers and/or ozone generators are off

Step 3: Fill the treatment room with the ornamentals to be treated

Step 4: Release of 1-MCP

- a) Remove the pack of two (2) Blue SmartFresh[™] Activator Tablets from the foam block. Always use both Blue tablets.
- b) Remove the appropriate number of **Green** SmartTabs from the SmartFresh[™] SmartTabs Package.
- c) Peel off the foil seal from the SmartFresh[™] Activator Solution taking care not to spill the solution.
- d) Add both the **Blue** and **Green** Tablets to the Activator Solution.
- e) Replace the cap.
- f) Place the small container on a level surface e.g. in the bottom gap of the pallet. Keep the container upright.
- g) Exit the treatment room immediately and promptly close the doors and ensure they are tightly sealed in order to contain the SmartFresh[™] and ensure its maximum efficacy. The release of SmartFresh[™] to the area will start several minutes after addition of the SmartTabs to the Activator Solution.
- h) Circulate air in the room by means of the internal air circulation system for AT LEAST one (1) hour.
- i) Do not open the doors for AT LEAST four (4) hours for ornamentals treated at >55F and for at least ten (10) hours for ornamentals treated at or below 55F.

Step 5: Reentry To The Storage Area

At the end of the SmartFreshTM treatment period, vent the treated area by opening the doors for a minimum of thirty minutes with continued full internal ventilation before allowing workers to enter. For greenhouses, vent the treated area by opening doors and windows for a minimum of two hours with continued full internal ventilation or four hours with passive ventilation before allowing workers to enter. At the end of the room venting, remove the SmartFreshTM Activator Solution and dispose of it as non-hazardous waste on-site or at an approved waste disposal

facility. Store treated ornamentals not intended for immediate sale according to standard commercial practices.

Restrictions

Do not split tablets. Use whole tablets only.

Do not smoke during the SmartFreshTM application.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store in original packaging in a cool, dry place.

Pesticide Disposal: Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.

Container Disposal: Nonrefillable container. Do not reuse or refill this container. Triple rinse of equivalent. Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

WARRANTY AND DISCLAIMER

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Causes slight eye irritation. Harmful if absorbed through skin. Harmful if inhaled. Harmful if swallowed. Avoid contact with skin, eyes or clothing. Avoid breathing vapor. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove contaminated clothing and wash before reuse.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Applicators of this product must wear:

- Long-sleeved shirt and long pants
- Shoes plus socks
- Safety glasses or goggles

Applicators and other handlers must follow manufacturer's instructions for cleaning and maintaining PPE. If no such instructions exist for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations • Users should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. 00000 • Users should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean 6-0 clothing. 6000 GEČGE

71297-3 SmartFresh™ SmartTab Last label revision July 19, 2010 Page 11 of 16 Non-Agricultural Use Requirements

The requirements in this box apply to uses of this product that are not within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170).

REI: Thirty (30) minutes

Do not enter enclosed areas until the enclosed area has been vented unless wearing the appropriate PPE. Ventilation shall continue until after thirty (30) minutes of ventilation using fans or other mechanical ventilating systems.

PPE required for early entry into enclosed areas prior to venting is:

- Long-sleeved shirt and long pants
- Chemical-resistant gloves made of any waterproof material
- Shoes plus socks

• Respirator with an organic-vapor removing cartridge with a prefilter approved for pesticides (MSHA/NIOSH approval number prefix TC-23C), or a canister approved for pesticides (MSHA/NIOSH approval number prefix TC-14G) or a NIOSH approved respirator with an organic vapor (OV) cartridge or canister with any N,R,P, or HE prefilter.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state or tribe, consult the State or Tribal Agency responsible for pesticide regulation. All applicable directions, restrictions, precautions and conditions of sale and warranty are to be followed. This labeling must be in the user's possession during application.

PRODUCT INFORMATION

SmartFreshTM is a unique postharvest tool for counteracting many of the undesirable effects of both internal (produced within the plant) and external sources of ethylene on fruit and vegetables. By counteracting ethylene, SmartFreshTM provides many benefits to fruit and vegetables during transport and storage including:

- Maintaining firmness
- Maintaining titratable acidity
- Preventing superficial scald and soft scald on apples

. Če

- Reducing internal ethylene production
- Protection from external sources of ethylene
- Reducing respiration
- Delaying ripening and senescence
- Reducing incidence of peel greasiness in apples
- Reducing incidence of core flush and mealiness in apples
- Reducing chilling injury

SmartFreshTM is used immediately after harvest, prior to storage, prior to shipment or just prior to sale. SmartFreshTM is effective under both cool (below 55°F, 13°C) and warm (above 55°F, 13°C) temperature conditions. To realize maximum benefit in controlling senescence, treat fruits and vegetables as soon as possible after harvest.

Harvested fruit and vegetables must be exposed to the volatile active ingredient of SmartFreshTM in enclosed areas, such as storage rooms, coolers, shipping containers, enclosed truck trailers, or ambient temperature, refrigerated, or controlled atmosphere food storage facilities. This product is not intended for use outdoors or in other non-enclosed areas. These enclosed treatment areas must be gas tight as leakage will reduce SmartFreshTM's effectiveness.

Fruit And Vegetables

Storage Conditions

SmartFreshTM is compatible with and complementary to both controlled atmosphere and regular air fruit and vegetable storage conditions. SmartFreshTM must be used in air tight storage areas.

Timing of Application

SmartFresh[™] is added to the storage area containing fruit or vegetables immediately after harvest, upon entering storage, during distribution or in transit. For best results, do not use with fruit previously treated with Ethephon. After application, fruit or vegetables not for immediate sale must be stored according to good standard commercial practices. Fruit and vegetables may benefit from repeat application, such as when the crop has been exposed to ethylene. It must be emphasized that keeping the fruit and vegetables cool at all times and strict adherence to phytosanitary practices remain essential in maintaining safe and high quality fruit and vegetables.

<u>Apples</u>: Apply SmartFresh[™] soon after harvest. Best results are obtained when fruit is at the optimum maturity level for long term storage. For optimum quality, store apples that are to be held longer than six months in a controlled atmosphere. <u>Solution</u> <u>Avocados</u>: Apply SmartFresh[™] to the fruit soon after harvest at the physiological maturity stage or just prior to the "turning black" stage. Only one application to the same fruit. <u>Solution</u> <u>Bananas</u>: Apply SmartFresh[™] after the bananas have been exposed to ethylene and prior to <u>cons</u> reaching color stage 4. <u>Solution</u> <u>Broccoli</u>: Apply SmartFresh[™] as soon after harvest as possible.

<u>Kiwifruit</u>: Apply SmartFreshTM either as soon after harvest as possible or after long term storage and before the fruit are transported and distributed.

<u>Melons</u>: Apply SmartFresh[™] as soon after harvest as possible.

<u>Persimmons</u>: Apply SmartFresh[™] as soon after harvest as possible.

<u>Tomatoes</u>: Apply SmartFresh[™] between color stage mature green (Color Stage 1) and light red (Color Stage 5).

Pears, Asian pears: Apply SmartFresh[™] as soon after harvest as possible.

<u>Peaches, nectarines, plums, plumcots, and apricots:</u> Apply SmartFreshTM either as soon after harvest as possible or after long term storage and before the fruit are transported and distributed.

Application Method and Rate

Prior to application, ensure that the treatment area can be properly and promptly sealed following application. SmartFreshTM SmartTabs are used in conjunction with the SmartFreshTM Activator Kit. SmartFreshTM SmartTabs are **Green** tablets that, when mixed with **Blue** Activator Tablets in a proprietary Activator Solution, release the volatile active ingredient 1-methylcyclopropene (1-MCP). Make sure that you have a sufficient supply of both SmartFreshTM SmartTabs and SmartFreshTM Activator Kits available to treat your selected treatment area.

Step 1: Selection of the appropriate number of SmartTabs and SmartTab Activator Kits for use

a.) Accurately determine the volume of the EMPTY treatment area in cubic feet. Multiply inside dimensions: volume = length X width X height. For example, if the treatment area is 10 feet high x 20 feet long x 12 feet wide, the treatment volume would be $10 \times 20 \times 12 = 2400$ cubic feet.

b.) Choose the correct number of **Green** SmartFreshTM SmartTabs according to the size of the area and the commodity to be treated as follows.

Apple, Asian pear, avocado, broccoli: Use one GREEN tablet per 120 cubic feet of treatment area

Pear: Use one GREEN tablet per 200 cubic feet of treatment area.

Melon, tomato, kiwifruit, persimmon, peach, nectarine, plum, plumcot, apricot: Use one GREEN tablet per 240 cubic feet of treatment area

Bananas: Use one GREEN tablet per 380 cubic feet of treatment area

Never use more than ten (10) Green SmartFresh[™] SmartTabs per activator kiể. If more than ten (10) Green SmartFresh[™] SmartTabs are needed, you must divide them among two (2) of more SmartFresh[™] Activator Kits. Each Kit activates up to 10 SmartFresh[™] SmartTabs <u>only</u> of More Always use two (2) Blue tablets for EACH Activator Kit.

Step 2. Evaluation Of The Quality Of The Treatment Room / Trailer / Container

ເັດເດີຍ

000004

To be used with SmartFresh[™], rooms/containers/trailers must be gas tight and have an internal fan for mixing the atmosphere.

Check that:

- All room/trailer/container drain holes are plugged
- There are no holes in the walls, ceiling, or floor
- All vents to outside air are closed
- When viewed from a dark interior, no outside light is visible
- Door seals are in EXCELLENT condition
 - No missing rubberNo large cracksNo plastic slat doorsNo roller top doorsNo side doorsNo roller top doors
- Scrubbers and/or ozone generators are off

Step 3: Fill the treatment room with the fruit or vegetables, to be treated

Step 4: Release of 1-MCP

- a) Remove the pack of two (2) Blue SmartFresh[™] Activator Tablets from the foam block. Always use both Blue tablets.
- b) Remove the appropriate number of Green SmartTabs from the SmartFresh[™] SmartTabs Package.
- c) Peel off the foil seal from the SmartFresh[™] Activator Solution taking care not to spill the solution.
- d) Add both the **Blue** and **Green** Tablets to the Activator Solution.
- e) Replace the cap.
- f) Place the small container on a level surface e.g. in the bottom gap of the pallet. Keep the container upright.
- g) Exit the treatment room immediately and promptly close the doors and ensure they are tightly sealed in order to contain the SmartFresh[™] and ensure its maximum efficacy. The release of SmartFresh[™] to the area will start several minutes after addition of the SmartTabs to the Activator Solution.
- h) Circulate air in the room by means of the internal air circulation system for AT LEAST one (1) hour.
- Do not open the doors for AT LEAST twelve (12) hours for avocado, banana, broccoli, kiwifruit, melon, persimmon and tomato, fifteen (15) hours for Asian pear, twenty four (24) hours for apple, nectarine, peach, pear, plum, plumcot and apricot.
- j) For controlled atmosphere storage containers or storage rooms, do not change the room atmosphere to controlled atmosphere conditions for AT LEAST twenty four (24) kours.

Step 5: Reentry To The Storage Area

At the end of the SmartFresh[™] treatment period, vent the treated room by opening the doors for a minimum of thirty minutes with continued full internal ventilation before allowing workers to enter. At the end of the room venting, remove the SmartFresh[™] Activator Softition and dispose of it as non-hazardous waste on-site or at an approved waste disposal facility. Store treated

n C C C G G

e

000000

commodities not intended for immediate sale according to standard commercial practices, in either refrigerated air or controlled atmosphere conditions.

Restrictions

Do not split tablets. Use whole tablets only.

Do not smoke during the SmartFreshTM application.

([–] .

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store in original packaging in a cool, dry place.

Pesticide Disposal: Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.

Container Disposal: Nonrefillable container. Do not reuse or refill this container. Triple rinse of equivalent. Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.
