

SUPPLEMENTAL LABELING

READ AND FOLLOW THE ENTIRE LABEL BOOKLET FOR NUFARM EXTRA CREDIT 5 HERBICIDE BEFORE PROCEEDING WITH THE USE DIRECTIONS CONTAINED IN THIS SUPPLEMENTAL LABELING.

"Label" as used in this supplemental labeling refers to the label booklet for Nufarm Extra Credit 5 Herbicide and this supplement.

Extra Credit® 5 Herbicide

EPA Reg. No. 71368-43

Round Up Ready Flex Cotton

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in any manner inconsistent with its labeling.

This label must be in the possession of the user at the time of the herbicide application.

See "GENERAL INFORMATION" and "MIXING, ADDITIVES and APPLICATION INSTRUCTIONS" sections of the Nufarm Extra Credit 5 Herbicide label booklet for essential product performance information.

General Information

Use of this product in accordance with label directions is expected to result in normal growth of Roundup Ready Flex cotton, however, various environmental conditions, agronomic practices and other factors make it impossible to eliminate all risks associated with this product, even when applications are made in conformance with the label specifications. In some cases, these factors can result in boll loss, delayed maturity and/or yield loss.

- Severe injury or death of cotton will result if any cotton varieties not properly designated as having the Roundup Ready Flex gene are sprayed with this product. Avoid contact of herbicide with foliage, green stems, or fruit of crops, or any desirable plants and trees, other than crops with the Roundup Ready Flex gene, since severe injury or destruction will result.
- The Roundup Ready Flex designation indicates that the cotton contains a patented gene which provides tolerance

to glyphosate herbicides. Information on Roundup Ready cotton may be obtained from your seed supplier.

Read the "LIMIT of WARRANTY AND LIABILITY" in the label booklet for Nufarm Extra Credit 5 Herbicide before using this product. Those terms apply to this supplemental labeling and if those terms are not acceptable, return the product unopened at once.

Application Instructions

This product will control many troublesome weeds with Preplant, At-Planting, Pre-emergence, Post emergence and Preharvest applications in Roundup Ready Flex cotton.

Maximum Allowable Yearly Rates:

- Combined total per year for all applications 6.5 quarts per acre.
- Preplant, At-Planting, Preemergence applications 4 quarts per acre.
- Total in-crop applications from cracking to 60% open bolls - 4 quarts per acre.
- Maximum allowed rate from cracking through the 8-node stage is 2.4 quarts per acre.
- Maximum allowed rate from the 8 nodes through 60% open bolls is 52 fluid ounces per acre.
- Maximum allowed rate from 60% bolls open to 14 days prior to harvest is 52 fluid ounces.

Received by email 1/25/06

Preplant, Preemergence, At-Planting

USE INSTRUCTIONS: This product may be applied before, during and after planting cotton. Always plant into a weed free seed bed. In no-till and stale seedbed systems, always burn down existing weeds before cotton emerges.

Postemergence: When applied as directed this product will control labeled grasses and broadleaf weeds in Roundup Ready Flex cotton. To maximize yield potential spray cotton early to eliminate competing weeds. Many perennial weeds will be controlled or suppressed with one or more applications of this product. In general, an initial application of 26 fluid ounces per acre on 1 to 3 inch tall weeds is recommended. This product may be applied by aerial or ground application equipment at rates up to 52 fluid ounces per acre per application postemergence to Roundup Ready Flex cotton.

Precautions, Restrictions: After cotton begins to bloom, allow a minimum of 14 days between sequential in-crop applications of this product. The combined total application from crop emergence through 60% open bolls must not exceed 4 quarts per acre.

Preharvest: This product may be applied for preharvest annual and perennial weed control as a broadcast treatment to Roundup Ready Flex cotton after 60% boll crack. Up to 52 fluid ounces of this product may be applied using either aerial or ground spray equipment. **Note:** This product will not enhance the performance of harvest aids

when applied to Roundup Ready Flex cotton.

Manufactured By
Nufarm, Inc.
Burr Ridge, IL 60527

PRECAUTIONS, RESTRICTIONS: Allow a minimum of 14 days between application and harvest of cotton. Do not apply this product as a preharvest application to cotton grown for seed, as a reduction in germination or vigor may occur.

Ground Broadcast Equipment: Use the recommended rates of Extra Credit 5 in 5 to 20 gallons of spray solution per acre. As density of weeds increase, spray volume should be increased within the recommended range to ensure complete and uniform coverage of the target. Carefully select proper nozzle and spray pressure to avoid spraying a fine mist. Check for even distribution of spray droplets.

Aerial Equipment: Apply this product in 3 to 15 gallons of water per acre. Do not exceed the maximum rate of 52 fluid ounces per acre of this product when making applications by air. Extreme care must be used when applying this product to prevent injury to desirable plants and crops which do not contain the Roundup Ready Flex Gene. Drift may cause damage to any vegetation contacted to which treatment is not intended.

Precautions, Restrictions: see the "Aerial Equipment" part of the "Application Equipment and Techniques" section of the Extra Credit 5 herbicide label booklet for information on proper use and calibration of this equipment.

Sprayer Preparation: Cotton is very sensitive to many herbicides at extremely low concentrations and care should be taken to thoroughly clean all equipment prior to use. It is important that the sprayer, including tank and hoses, and mixing equipment be clean and free of pesticide residue before making applications of this product to Roundup Ready Flex cotton. Following the cleaning procedures specified on the label of the product (s) previously used.
