07/21/2005

U.S. ENVIRONMENTAL PROTECTION AGENCY Office of Pesticide Programs Registration Division (7505C) 1200 Pennsylvania Avenue, N.W. Washington, D.C. 20004

NOTICE OF PESTICIDE:

x Registration
Reregistration

(under FIFRA, as amended)

EPA Reg.

Date of Issuance:

JUL 2 1 2005

71532-15

Term of Issuance:

Conditional

LG Permethrin 3.2 EC Agricultural Insecticide

Name and Address of Registrant (include ZIP Code):

LG Life Sciences, Ltd.

20 Yoido-dong, Youngdungpo-gu

Seoul 150 721 Korea

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

- 1. Submit and/or cite all data required for registration/ reregistration of your product when the Agency requires all registrants of similar products to submit data; and submit acceptable responses required for reregistration of your product under FIFRA section 4.
- 2. Make the labeling changes listed below before you release the product for shipment:
 - a. Add the phase "EPA Registration No. 71532-15."
- b. Replace the Hazards to Humans and Domestic Animals section with "Harmful if swallowed, inhaled or absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes, or clothing. Avoid breathing spray mist.".

Signature of Approving Official:	Date:

- c. Replace "Have a person sip a glass of water if able to swallow" with "Do not give any liquid to the person" under IF Swallowed first aid.
- d. Add the following to the User Safety Recommendations with "Wash throughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco.".
- e. We recommend adding after "Have the product container... or going for treatment.", "You may also contact 1- 800-xxx-xxxx for emergency medical treatment information.".
- f. Delete "In No event shall LG Life Sciences, Ltd. or seller be liable for any incidental, consequential or special damages resulting from use or handling of this product." This statement is overly broad and implies buyer has no legal right to recover damages from manufacturer and is unacceptable under statutory and regulatory standards. we recommend revising it to read "To the fullest extent permitted by law LG Life Sciences, Ltd. or Seller shall not be liable for any ... etc." or "It is LG Life Sciences, Ltd., Inc intent that in no case shall LG Life Sciences, Ltd., Inc or Seller be liable... etc.".
- g. On page 7 revise the first sentence to read "With the exception of crops listed below do not rotate other crops within 60 days of last application.".
- 3. Submit two (2) copies of your final printed labeling before you release the product for shipment.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Enclosure

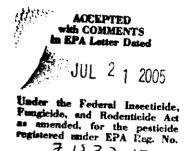

RESTRICTED USE PESTICIDE

Toxic to fish and aquatic organisms

For retail sale to and use by certified applicators or persons under their direct supervision and only for those uses covered by the certified applicator's certification.

LG Permethrin 3.2 EC Agricultural Insecticide

Active Ingredient:	
*Permethrin**	38.0%
Other Ingredients:***	<u>62.0%</u>
-	100 0%

*(3-Phenoxyphenyl)methyl (+) 3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropanecarboxylate

**cis/trans ratio: Max. 55% (±) cis and min. 45% (±) trans

KEEP OUT OF REACH OF CHILDREN

CAUTION AVISO

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

LG Life Sciences, Ltd. 20 Yoido-dong, Youngdungpo-gu Seoul 150 721 Korea

EPA Registration No. 71532-XXX EPA Establishment No. XXXX-XXX

Net Contents:

^{***}Contains petroleum distillates

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals CAUTION

Harmful if swallowed or absorbed through skin. Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Wash thoroughly after handling.

FIRST AID		
If Inhaled:	Move person to fresh air. If person is not breathing, call 911 or an ambulance,	
	then give artificial respiration, preferably by mouth-to-mouth, if possible. Call	
	a poison control center or doctor for further treatment advice.	
If on Skin or	Take off contaminated clothing. Rinse skin immediately with plenty of water	
Clothing:	for 15-20 minutes. Call a poison control center or doctor for treatment advice.	
If in Eyes:	Hold eye open and rinse slowly and gently with water for 15-20 minutes.	
	Remove contact lenses, if present, after the first 5 minutes, then continue	
	rinsing eye. Call a poison control center or doctor for treatment advice.	
If Swallowed:	Call a poison control center or doctor immediately for treatment advice. Have	
	person sip a glass of water if able to swallow. Do not induce vomiting unless	
	told to do so by the poison control center or doctor. Do not give anything by	
	mouth to an unconscious person.	
Have the produc	t container or label with you when calling a poison control center or doctor, or	
going for treatme	ent.	
Note to Physicia	n: This product contains petroleum distillates – vomiting may cause aspiration	
pneumonia. Consideration should be given to gastric lavage with an endotracheal tube in place.		
Treatment is con	trolled removal of exposure followed by symptomatic and supportive care.	

Personal Protective Equipment

Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for category G on an EPA chemical resistance category selection chart.

Applicators and other handlers must wear: Long-sleeved shirt and long pants Chemical-resistant gloves, such as Barrier Laminate or Viton Shoes plus socks

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions are washable, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations

Users should:

• Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

ENVIRONMENTAL HAZARDS

This pesticide is extremely toxic to fish and aquatic invertebrates. For terrestrial uses, do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not apply when weather conditions favor drift from treated areas. Drift and runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment washwaters.

This product is highly toxic to bees, exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops if bees are visiting the treatment areas.

Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARDS

Do not use or store near heat or open flame.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

Resistance: Some insects are known to develop resistance to products used repeatedly for control. Because the development of resistance cannot be predicted, the use of this product should conform to resistance management strategies established for the use area. Consult your local or state agricultural authorities for details.

If resistance to this product develops in your area, this product, or other products with a similar mode of action, may not provide adequate control. If poor performance cannot be attributed to improper application or extreme weather conditions, a resistant strain of insect may be present. If you experience difficulty with control and resistance is a reasonable cause, immediately consult your local company representative or agricultural advisor for the best alternative method of control for your area.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is: Coveralls, Chemical-resistant gloves, such as Barrier Laminate or Viton, and Shoes plus socks.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Do not store below 10°F, (-12°C). Do not use or store near heat, open flame or hot surfaces.

Keep out of reach of children and animals. Store in original containers only. Store in a cool, dry place and avoid excess heat. Carefully open containers. After partial use, replace lids and close tightly. Do not put concentrate or dilute material into food or drink containers. Do not contaminate other pesticides or fertilizers by storage or disposal.

In case of spill, avoid contact, isolate area and keep out animals and unprotected persons. Confine spill by: If liquid, dike surrounding area or absorb with sand, cat litter, commercial clay or gel absorbents. If dry material, cover to prevent dispersal. Place damaged package in a holding container. Identify contents.

Pesticide Disposal: Pesticide wastes are toxic. Improper disposal of excess pesticide spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative of the nearest EPA Regional Office for guidance.

Container Disposal:

Plastic Containers: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

Metal Containers: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities. Do not cut or weld metal containers.

Returnable/Refillable Sealed Containers: Do not rinse container. Do not empty remaining formulated product. Do not break seals. Return intact to point of purchase.

Chemigation Use Directions

Apply this product only through sprinkler including center pivot, lateral move end tow, side (wheel) roll, traveler, big gun, solid set, or hand move irrigation systems. Do not apply this product through any other type of irrigation system. Do not connect an irrigation system (including greenhouse systems) used for pesticide application to a public water system.

Crop injury, lack of effectiveness, or illegal residues in the crop can result from nonuniform distribution of treated water. If you have questions about calibration, you should contact State Extension Service specialists, equipment manufacturers, or other experts. A person knowledgeable of the chemigation system and responsible for its operation, or under the supervision of the responsible person, shall shut the system down and make necessary adjustments should the need arise.

The system must contain a functional check valve, vacuum relief valve, and low pressure drain appropriately located on the irrigation pipeline to prevent water source contamination from backflow.

The pesticide injection pipeline must also contain a functional, normally closed, solenoid-operated valve located on the intake side of the injection pump and connected to the system interlock to prevent fluid from being withdrawn from the supply tank when the irrigation system is either automatically or manually shut down.

The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the water pump motor stops.

The irrigation line or water pump must include a functional pressure switch which will stop the water pump motor when the water pressure decreases to the point where pesticide distribution is adversely affected.

Systems must use a metering pump, such as a positive displacement injection pump (e.g. diaphragm pump) effectively designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock.

Do not apply when wind speed favors drift beyond the area intended for treatment.

LG Permethrin 3.2 EC Agricultural Insecticide should be applied continuously for the duration of the water application. LG Permethrin 3.2 EC Agricultural Insecticide should be diluted in sufficient volume to ensure accurate application over the area to be treated. When using chemigation, a minimum of 0.1 inch per acre of irrigation water is recommended. Agitation generally is not required when a suitable diluent is used. A diluent test should be conducted to ensure that phase separation will not occur during dilution and application. Failure to achieve a uniform dilution throughout the time of application may result in undesirable residues or less then desirable control.

Commercial Impregnation and Application of LG Permethrin 3.2 EC Agricultural Insecticide On Dry Bulk Fertilizers

LG Permethrin 3.2 EC Agricultural Insecticide may be impregnated on dry bulk fertilizers. When applied as directed, LG Permethrin 3.2 EC Agricultural Insecticide/dry bulk fertilizer mixtures provide insect control equal to that provided by the same rates of LG Permethrin 3.2 EC Agricultural Insecticide applied in water.

The LG Permethrin 3.2 EC Agricultural Insecticide/fertilizer mixtures may be surface applied or shallow incorporated. The higher rate should be used if incorporation is used.

Impregnation: Apply using a minimum of 200 pounds of dry bulk fertilizer per acre and up to a maximum of 450 pounds per acre with the recommended amount of LG Permethrin 3.2 EC Agricultural Insecticide per acre. Use a closed rotary-drum mixer or a similar type of closed blender equipped with suitable spray equipment. The spray nozzle(s) should be positioned to provide a uniform, fine spray pattern over the tumbling fertilizer for thorough coverage. The physical properties of fertilizers vary, particularly in liquid absorptive capacity. When absorptivity is sufficient, simple spray impregnation of the fertilizer with LG Permethrin 3.2 EC Agricultural Insecticide provides a satisfactory, dry mixture. If the absorptive capacity is inadequate, the use of a highly absorptive powder is required to provide a dry, flowable mixture. Microcel E (Johns-Manville Products Corporation) is a recommended absorbent powder. Generally less than 2% by weight of Microcel E is required. DO NOT impregnate LG Permethrin 3.2 EC Agricultural Insecticide onto straight coated ammonium nitrate or straight limestone because these materials will not absorb the insecticide. Dry fertilizer blends containing mixtures of ammonium nitrate or limestone may be impregnated with LG Permethrin 3.2 EC Agricultural Insecticide.

The amount of LG Permethrin 3.2 EC Agricultural Insecticide actually required in the preparation of individual fertilizer mixtures should be determined carefully for each production operation. This is necessary to ensure that the amount of pesticides actually contained in the mixture applied to the soil represents the correct rate of use. Bulk fertilizer impregnated with LG Permethrin 3.2 EC Agricultural Insecticide should be applied immediately, not stored.

All individual state regulations relating to bulk dry fertilizer blending, registration, labeling, and application of the mixtures are the responsibility of the individual and/or company selling the fertilizer and LG Permethrin 3.2 EC Agricultural Insecticide mixture.

GENERAL INSTRUCTIONS

Unless otherwise directed by registered supplemental labeling, follow the Directions for Use in each crop group section.

LG Permethrin 3.2 EC Agricultural Insecticide is a 3.2 pounds per gallon formulation of the insecticide permethrin. Apply LG Permethrin 3.2 EC Agricultural Insecticide when insects appear or feeding is noticed. The higher rate should be used as pest populations increase. Repeat the application as necessary to maintain control. LG Permethrin 3.2 EC Agricultural Insecticide may be applied by both ground and aerial equipment. Use sufficient water to obtain

full coverage. With the exception of crops listed below, rotational crops should not be planted within 60 days of last application.

This label must be in the possession of the user at the time of application.

Alfalfa: Alfalfa grown for seed (0 day phi)* (Includes Lucerne, sainfoin, holy clover, esparcel, birdsfoot trefoil and varieties and/or hybrids of these)

Insects Controlled	Rate of Application	Method of Application
Alfalfa Caterpillar	2 to 8 ounces	Use higher recommended dosage for
Armyworms	(0.05 to 0.2 pound active)	increased pest pressure or for increased
Blue Alfalfa Aphid	per acre	residual pest control. Apply with ground
Cutworms	_	equipment in a minimum of 10 gallons of
Green Cloverworm		finished spray per acre or 2 gallons of
Green Peach Aphid		finished spray per acre by aircraft.
Loopers		
Pea Aphid		
Spotted Alfalfa Aphid		
Velvetbean Caterpillar		
Webworms		
Alfalfa Weevil	4 to 8 ounces	
Cucumber Beetle	(0.1 to 0.2 pound active)	
Egyptian Alfalfa	per acre	
Weevil	_	
Meadow Spittlebug		
Plant Bugs (including		
Lygus spp.)		
Potato Leafhopper		
Stink Bugs		
Do not apply more than	0.2 manual pating in anadiant	nor outting

Do not apply more than 0.2 pound active ingredient per cutting.

Do not apply to mixed stands with intentionally grown forage grasses and/or legumes.

^{*}When rates greater than 0.1 pound active per acre are used, do not apply within 14 days of harvest.

Almonds (7 day phi)

Insects Controlled	Rate of Application	Method of Application
Navel Orangeworm Peach Twig Borer	8 to 16 ounces (0.2 to 0.4 pound active) per acre	Apply when insects appear. Apply in a minimum of 15 gallons of finished spray per acre by aircraft or 25-400 gallons of finished spray per acre with ground equipment.
Ants	16 ounces (0.4 pound active) per acre	Apply by ground equipment in a minimum of 15 gallons of finished spray per acre. Application should follow mowing of weed growth to insure maximum coverage of the soil surface. Overhead moisture following application will enhance activity.

Do not apply more than 0.8 pound active ingredient per acre during hull split.

Do not apply more than 2.0 pounds active ingredient per acre per season.

Do not graze livestock in treated areas.

Do not feed cover crops from treated areas to livestock.

Apples

Insects Controlled	Rate of Application	Method of Application
Green Fruitworm	4 to 16 ounces	Use with ground equipment only.
Oblique Banded Leafroller	(0.1 to 0.4 pound active)	Apply in 25-400 gallons of finished
Plum Curculio	per acre	spray per acre when insects first appear
Redbanded Leafroller	-	and repeat as required to maintain
Rosy Apple Aphid		control.
Spotted Tentiform		
Leafminer		
Tarnished Plant Bug		
White Apple Leafhopper		

Do not apply more than 0.6 pound active per acre per season.

Do not apply after petal fall.

Do not graze livestock in treated areas.

Do not feed cover crops from treated areas to livestock.

Artichoke (0 day phi)

Insects Controlled	Rate of Application	Method of Application
Artichoke Plum Moth	4 to 12 ounces	Apply with ground equipment in a
Leafminers -	(0.1 to 0.3 pound active)	minimum of 10 gallons of finished
	per acre	spray per acre or in a minimum of 2
		gallons per acre by aircraft. Apply as
		needed. Buds may be harvested on the
		day of application.
Do not apply more than 5 applications (1.5 pounds active ingredient) per acre per season.		

Asparagus (1 day phi)

Insects Controlled	Rate of Application	Method of Application
Asparagus Beetle	2 to 4 ounces	Apply with ground equipment in a
Cutworms	(0.05 to 0.1 pound active)	minimum of 10 gallons of finished
	per acre	spray per acre. Apply as needed.
Asparagus Beetle	4 ounces	For post harvest application, apply to
Japanese Beetle (Adult	(0.1 pound active)	the fern stage of the asparagus plant
stage)*	per acre	after spear harvest when larval and
Lygus Bugs		adult stage are present
Tarnished Plant Bug		* Not for control of this insect in
-		California
Do not apply more than 0.4 pound active ingredient per acre per season.		

Avocado (7 day phi)

Insects Controlled	Rate of Application	Method of Application
Avocado Caterpillar	8 ounces	Apply with ground equipment in 25-
Avocado Lace Bug	(0.2 pound active)	400 gallons of finished spray per acre.
Avocado Leafhopper	per acre	Apply when insects first appear and
Avocado Leafroller		repeat at 7 to 10 day intervals as needed
Avocado Looper		to provide control.
Avocado Tree Girdler		
Avocado Whitefly		
Brown Soft Scale		
Mirids		
Omnivorous Looper		
Orange Tortrix		
Scale Crawlers		
Spanworm		
Thrips		
Twig Borers		

Do not apply more then 1.2 pounds active ingredient per acre per season. Do not graze livestock in treated areas.

Do not feed cover crops from treated areas to livestock.

Broccoli; Chinese Broccoli (gai lon, white flowering broccoli); Brussels Sprouts; Cauliflower; Cavalo broccoli, Kohlrabi (1 day phi)

Insects Controlled	Rate of Application	Method of Application
Armyworm spp.	2 to 4 ounces	Apply with ground equipment in a
Cabbage Looper	(0.05 to 0.1 pound active)	minimum of 10 gallons of finished
Diamondback Moth	per acre	spray per acre or in a minimum of 2
Imported Cabbageworm	_	gallons per acre by aircraft. Apply as
Plant Bugs		needed.
Thrips		
Do not apply more than 0.8 pound active ingredient per acre per season.		

Cabbage; Cabbage, Chinese (napa) (tight-heading varieties only) (1 day phi)

Insects Controlled	Rate of Application	Method of Application
Cabbage Looper	2 to 8 ounces	Apply with ground equipment in a
Diamondback Moth	(0.05 to 0.2 pound active)	minimum of 10 gallons per acre or in a
Imported Cabbageworm	per acre	minimum of 2 gallons per acre by
Southern White Butterfly	_	aircraft. Apply as needed.
Armyworm spp.	4 to 8 ounces	
Cutworms	(0.1 to 0.2 pound active)	
Flea Beetles	per acre	
Do not apply more than 1.0 pound active ingredient per acre per season.		

Cantaloupes: For general use directions refer to the Cucurbit Vegetable crop grouping.

Celery, Florence fennel (sweet anise, sweet fennel, finochio) (fresh leaves and leaf petioles only): For general use directions refer to the **Leafy Vegetables** crop grouping.

Cherries (includes Sweet Cherries and Tart Cherries) (3 day phi)

Insects Controlled	Rate of Application	Method of Application
Green Fruitworm	4 to 8 ounces	Use LG Permethrin 3.2 EC Agricultural
Lesser Peach Tree Borer	(0.1 to 0.2 pound active)	Insecticide as a dilute spray. Apply
Plum Curculio	per acre	when insects appear. Apply with
Redbanded Leafroller	_	ground equipment in 25-400 gallons of
Rose Chafer		finished spray per acre.
Tarnished Plant Bug		

Do not graze livestock in treated areas.

Do not feed cover crops from treated areas to livestock.

East of the Rockies, do not exceed 6 applications per season, with no more than 4 applications after petal fall.

West of the Rockies, do not apply more than 4 applications per season, with no more than 3 applications after petal fall.

Chrysanthemums

Insects Controlled		Rate of Application	Method of Application
Liniomyza Leafmine	r	20 fluid ounces	Avoid spraying the blooms.
Flies	*	(0.5 pound active)	Caution: Before treating large numbers
		per 100 gallons	of plants of a particular cultivar, treat a
		(1 teaspoon per gallon)	few plants and observe prior to full
			scale application.

Collards and Turnips (1 day phi)

Insects Controlled	Rate of Application	Method of Application
Beet Armyworm	2 to 4 ounces	Apply with ground equipment only.
Cabbage Looper	(0.05 to 0.1 pound active)	Apply with ground equipment in a
Corn Earworm	per acre	minimum spray volume of 10 gallons
Cutworms		of finished spray per acre. Apply as
Diamondback Moth		needed.
European Corn Borer		
Fall Armyworm		
Green Cloverworm		
Imported Cabbageworm		
Leafhoppers		
Leafminers		
Southern Armyworm		· ·
Southern White Butterfly		
Tobacco Budworm		
Vegetable Leafminer		
Aphids*		

For use on Collards in AR, AZ, GA, IL, NC, OK, SC, and TX and on Turnips in FL, GA, IL, IN, OK, SC, TX, and WA. Do not apply more than 0.8 pound active ingredient per acre per season on Collards and Turnips (AR, TX & IN). Do not apply more than 0.4 pound active ingredient per acre per season on Turnips (SC, GA, FL & WA).

* Suppression only.

Conifers (Container and Field Grown)

Insects Controlled	Rate of Application	Method of Application
Nantucket Pine Tip Moth	4 to 8 fluid ounces	LG Permethrin 3.2 EC Agricultural
	(0.1 to 0.2 pound active)	Insecticide may be diluted in a non-
	per acre	volatile vegetable oil or water in a
		minimum of 1 gallon of finished spray
		per acre using equipment calibrated to
		give adequate coverage. Begin
		application when the adults appear and
		repeat at 5 to 7 day intervals or as
		needed throughout the season.

Corn (Field), Field Corn Grown for Seed, Popcorn

Insects Controlled	Rate of Application	Method of Application
Preemergent Use:	4 to 8 ounces	LG Permethrin 3.2 EC Agricultural Insecticide
Armyworms	(0.1 to 0.2 pound	may be applied as a preplant incorporated,
Cutworms	active)	preemergence, or at planting time application.
Stalk Borers	per acre as a	Apply as a broadcast spray by ground or air
	broadcast spray	(minimum of 2 gallons finished spray per acre
	OR	by air) or 4-15 inch band using sufficient spray
	0.3 to 0.6 ounces	volume to achieve adequate coverage.
	per 1,000 linear	
	row	Linear row calculations should be used
	(based on 4" band	proportional to the standard Band Width/Row
	and 40" row	Width formula to adjust rates for different band
	spacing)	widths or row spacings. Use higher rates of
		LG Permethrin 3.2 EC Agricultural Insecticide
		when incorporating into the soil without
		exceeding the recommended dosage.
		When using tank mixes, observe all restrictions
		and precautions which appear on the labels of
		these products. Provide constant agitation
		during mixing and application to keep the
		mixture in solution.
Foliar Use:	4 to 8 ounces	When treating for stalk borers, LG Permethrin
Armyworm (including	(0.1 to 0.2 pound	3.2 EC Agricultural Insecticide must be
Fall Armyworm)	active)	applied when or shortly before the stalk borer
Corn Borer	per acre	larvae are moving into the corn from
European		surrounding weeds and grasses. Mowing or
Southwestern		burndown herbicides are suggested to initiate
Corn Earworm		movement. For control of Corn Earworm
Corn Rootworm Beetles	 	apply just before silking and continue as
Cutworms		necessary to maintain control. Apply a
Flea Beetle		minimum of 2 gallons of finished spray per
Hop Vine Borer		acre by air or 10 gallons per acre with ground
Stalk Borers		equipment.
Webworms		
Foliar Use:	2 to 4 ounces	
Western Bean Cutworm	(0.05 to 0.1 pound	
	active)	
Un to 0.6 nound active inc	per acre	

Up to 0.6 pound active ingredient may be used per season.

Do not make treatments less than 6 days apart or apply less than 30 days prior to harvest of grain or fodder (stover).

Forage may be harvested on the day of application.

Corn (Field), Field Corn Grown for Seed, Popcorn (At Plant Use)

Insects Controlled	Rate of Application	Method of Appl	lication		
Armyworms	0.3 ounces per 1,000	Apply as an in-f	furrow, ł	oand, or	T-band
Cutworms ~	linear feet of row	treatment using	a minim	num 4" b	and.
Seed Corn Maggot*		Use table below	to deter	rmine the	e LG
Wireworm*		Permethrin 3.2	EC Agri	cultural	
*Not for use in California		Insecticide need	ls for eac	ch acre.

Corn, Sweet (1 day phi)

Insects Controlled	Rate of Application	Method of Application	
Corn Earworm	4 to 8 ounces	Apply every 3 to 5 days or as needed.	
Corn Rootworm Beetles*	(0.1 to 0.2 pound active)		
European Corn Borer	per acre	Apply with ground equipment in a	
Fall Armyworm	_	minimum of 10 gallons of finished	
Flea Beetle		spray per acre or in a minimum of 2	
Hop Vine Borer		gallons per acre by aircraft.	
Leafhoppers			
Southern Armyworm		*Pest does not occur on this crop in	
Stalk Borers		California.	
Do not apply more than 1.2 pounds active ingredient per acre per season.			

Corn, Sweet (Florida Only)

Insects Controlled	Rate of Application	Method of Application	
Aster Leafhopper	4 to 10 ounces	Apply every 3 to 5 days as needed.	
Corn Earworm	(0.1 to 0.25 pound active)		
Cutworm	per acre	Apply with ground equipment in a	
European Corn Borer		minimum of 10 gallons of finished	
Fall Armyworm		spray per acre or in a minimum of 2	
Southern Armyworm gallons per acre by aircraft.			
Do not apply more than 2.0 pounds active ingredient per acre per season.			

Cucurbit Vegetables (0 day phi): Chayote (fruit) (Sechium edule); Chinese waxgourd (Chinese preserving melon) (Bernincasa hispida); Citron melon (Citrullus lanatus var. citroides); Cucumber (Cucumis sativus); Gherkin (Cucumis anguria); Gourd, edible (Lagenaria spp.) (includes hyotan, cucuzza); (Luffa spp.) (includes hechima, Chinese okra); (Momordica spp.) (includes balsam apple, balsam pear, bitter melon, Chinese cucumber); Muskmelon (hybrids and/or cultivars of Cucumis melo) (includes true cantaloupe, cantaloupe, casaba, Crenshaw melon, golden pershaw melon, honeydew melon, honey balls, mango melon, Persian melon, pineapple melon, Santa Claus melon, and snake melon); Pumpkin (Cucurbita spp.); Squash, Summer (Cucurbita pepo var. melopepo) (includes crookneck squash, scallop squash, straightneck squash, vegetable marrow, zucchini); Squash, winter (Cucurbita maxima; C. moshata) (includes butternut squash, calabaza, hubbard squash); (C. mixta; C. pepo) (includes acorn squash, spaghetti squash); Watermelon (includes hybrids and/or varieties of Citrullus spp.).

Insects Controlled	Rate of Application	Method of Application
Aphids	8 ounces	Apply with ground equipment in a
Leafminers	(0.2 pound active)	minimum spray volume of 20 gallons
Squash Bug	per acre	of finished spray per acre or in a
Cabbage Looper	4 to 8 ounces	minimum of 4 gallons per acre by
Cucumber Beetle (adults)	(0.1 to 0.2 pound active)	aircraft.
Cutworms	per acre	,
Leafhoppers		
Melonworm		
Pickleworm		
Plant Bugs (including		
Lygus and Stink Bugs)		
Rindworms		
Squash Vine Borer		

Do not apply more than 1.6 pounds active ingredient per acre per season. Applications may be made up to harvest.

Eggplants (3 day phi)

Insects Controlled	Rate of Application	Method of Application
Colorado Potato Beetle	8 ounces	Apply with ground equipment in a
	(0.2 pound active)	minimum of 10 gallons of finished
	per acre	spray per acre or a minimum of 2
Cabbage Looper	4 to 8 ounces	gallons by aircraft. Apply using
Flea Beetle	(0.1 to 0.2 pound active)	sufficient water to obtain uniform
Vegetable Leafminer	per acre	coverage. Apply as needed.
Do not apply more than 2.0	pounds active ingredient pe	r acre per season.

Filberts (14 day phi)

Insects Controlled	Rate of Application	Method of Application
Filbertworm	8 to 16 ounces	For full coverage application apply
Oblique Banded Leafroller	(0.2 to 0.4 pound active)	0.05 to 0.1 pound active per 100
	per acre	gallons (based on 400 gallons finished spray per acre) and spray to run-off, OR for low volume concentrate application apply 0.2 to 0.4 pound active per acre (50 to 200 gallons finished spray per acre). For aerial application apply 0.2 to 0.4 pound active in a minimum of 10 gallons of finished spray per acre.
		Apply when insects appear.

Do not apply more than 1.6 pounds active ingredient per acre per season.

Do not graze livestock in treated areas.

Do not feed cover crops from treated areas to livestock.

Horseradish (30 day phi)

Insects Controlled	Rate of Application	Method of Application
Imported Crucifer Weevil	0.1% active solution (2	As a spring preplant dip, soak sets for
(Baris lepidii)	pints, 1 ounce of LG	30 minutes and air-dry before planting.
	Permethrin 3.2 EC	
	Agricultural Insecticide	
	per 100 gallons)	
	8 ounces	For foliar application, apply with
	(0.2 pound active)	ground equipment in a minimum spray
	per acre	volume of 20 gallons finished spray per
		acre. Make up to 3 foliar applications
		as needed to control weevil adults
		during oviposition.

Leafy Vegetables (except Brassica) (1 day phi): Amaranth (leafy amaranth, Chinese spinach, tampala); Arugula (Roquette); Cardoon; Celery; Celery, Chinese; Celtuce; Chervil; Chrysanthemum, edible-leaved and garland; Corn salad; Cress, garden; Cress, upland (yellow rocket, winter cress); Dandelion; Dock (sorrel); Endive (escarole); Fennel, Florence (finochio); Lettuce, head and leaf; Orach; Parsley; Purslane, garden; Purslane, winter; Radicchio (red chicory); Rhubarb; Swiss chard.

Spinach (including New Zealand and vine, Malabar spinach, Indian spinach).*

Insects Controlled	Rate of Application	Method of Application		
Aphids	4 to 8 ounces	Apply every 3 to 5 days or as needed		
Beet Armyworm	(0.1 to 0.2 pound active)	by air or ground. Use sufficient water		
Corn Earworm	per acre	to obtain full coverage of foliage.		
Cutworms		Apply with ground equipment in a		
European Corn Borer		minimum of 10 gallons of finished		
Fall Armyworm		spray per acre or in a minimum of 2		
Green Cloverworm		gallons per acre by aircraft.		
Leafminers				
Southern Armyworm	•			
Tobacco Budworm				
Alfalfa Looper	2 to 8 ounces			
Cabbage Looper	(0.05 to 0.2 pound active)			
Leafhoppers	eafhoppers per acre			
Do not apply more than 2.0 pounds active ingredient per acre per season.				
*For Spinach, do not apply more than 1.0 pound active ingredient per acre per season.				

Lettuce, Head: For general use directions refer to the Leafy Vegetable crop grouping.

Mushrooms (Mushroom houses and adjacent premise areas) (3 day phi)

Insects Controlled	Rate of Application	Method of Application
Mushroom Flies (Sciarid	Apply as a fogging or	Preparation of the building prior to
and Phorid adults) -	aerosol treatment at the	fogging: (1) Close all doors, windows,
	rate of 2.0 to 2.5 ounces	and ventilators, (2) Lock or barricade
	(0.05 to 0.0625 pound	all entrances, turn off pilot lights, post
	active) per 30 ounces of	warning signs, and take precautions to
	water or suitable diluent.	prevent persons and animals from entering the area.
	Use 1 quart of solution	
	per standard double	Use prior to filling the house, during
	house (35,000 cu. ft.;	cool-down, during spawning, up to
	8,000 sq. ft.)	pinning, and between breaks. Do not use when mushrooms are present.
		Treat once daily as needed when flies appear. Do not make more than 20
		applications prior to pinning of first
		break; apply no more than 2
		applications between each break. Do
		not apply more than 30 applications
		total per crop of 5 breaks.
		Length of exposure time should be
		limited to 1 hour; then ventilate the
		house. Use fans to ventilate in houses
		that do not have forced air circulation.
	,	Wear a respirator with either an organic
		vapor removing cartridge with a
		prefilter approved for pesticides
		(MSHA/NIOSH approval number
		prefix TC-23C), or a canister approved
		for pesticides (MSHA/NIOSH approval
		number prefix TC-14G).

Onions, Bulb and Garlic (1 day phi)

Insects Controlled	Rate of Application	Method of Application
Army worms	6 to 12 ounces	Apply with ground equipment in a
Onion Thrips -	(0.15 to 0.3 pound active)	minimum of 20 gallons of finished
	per acre	spray per acre or in a minimum of 5
Cutworms	4 to 12 ounces	gallons per acre by aircraft. Begin
Leafminers	(0.1 to 0.3 pound active)	applications when pests appear and
Onion Maggots (Adults)	per acre	repeat as necessary to maintain control.
Stink Bugs	-	Use the higher label rates as Onion
_		Thrips population increases and avoid
		rescue situations.
Do not apply more than 2.0 pounds active ingredient per acre per season.		

Ornamental Nursery Stock (Field Grown)

Insects Controlled	Rate of Application	Method of Application
Bagworm	4 to 8 ounces	LG Permethrin 3.2 EC Agricultural
Beet Armyworm	(0.1 to 0.2 pound active)	Insecticide may be used to control
Cabbage Looper	per 100 gallons of water	specified pests on non-edible
Citrus Thrips		ornamentals and non-bearing plants of
Heliothis spp.		fruiting species.
Lace Bug		
Leafhoppers		Caution: Marginal leaf burn may occur
Leafminers		on Salvia, Dieffenbachia and Pteris
Whiteflies		Fern. Application to blooming plants
	}	may cause browning of petals. Before
		treating large numbers of plants of a
		particular variety, treat a few plants and
		observe prior to full scale application.

Papaya (Florida Only) (7 day phi)

Insects Controlled	Rate of Application	Method of Application
Aphids Brown Soft Scale Mealybug Papaya Fruit Fly Papaya Webworm	8 ounces (0.2 pound active) per acre	Apply with ground equipment in 25-400 gallons of finished spray per acre. Apply when insects first appear and repeat at 7 to 10 day intervals as needed to provide control.
Papaya Whitefly Scale Crawlers		to provide control.

Do not apply more than 1.2 pound active ingredient per acre per season.

Do not graze livestock in treated areas.

Do not feed cover crops from treated areas to livestock.

Peaches, Nectarines (14 day phi)

Insects Controlled	Rate of Application	Method of Application
Green Fruitworm	4 to 12 ounces	Apply with ground equipment using
Lesser Peach Tree Borer	(0.1 to 0.3 pound active)	25-400 gallons of spray per acre or a
Oriental Fruit Moth	per acre	minimum of 10 gallons per acre by
Peach Twig Borer	_	aircraft. Spray to wet all foliage.
Plum Curculio		
Rose Chafer		
Tarnished Plant Bug		
	nound active ingredient per	nore per concer

Do not apply more than 1.5 pound active ingredient per acre per season.

Do not graze livestock in treated areas.

Do not feed cover crops from treated areas to livestock.

Pears (Dormant through Delayed Dormant)

Insects Controlled	Rate of Application	Method of Application
Pear Psylla	8 to 16 ounces	LG Permethrin 3.2 EC Agricultural
_	(0.2 to 0.4 pound active)	Insecticide may be combined with 2 to
	per acre	8 gallons of spray oil per acre. Apply
	_	during the dormant through delayed
		dormant growth periods only. Apply in
		a minimum of 10 gallons of finished
		spray per acre by aircraft and 25-400
		gallons per acre by ground equipment.
D	0.0	gallons per acre by ground equipme

Do not apply more than 0.8 pound active ingredient per acre per season.

Do not graze livestock in treated areas.

Do not feed cover crops from treated areas to livestock.

Pear (Pre-Bloom)

Insects Controlled	Rate of Application	Method of Application
Codling Moth	8 to 16 ounces	Apply with ground equipment using
Green Fruitworm	(0.2 to 0.4 pound active)	25-400 gallons of finished spray per
Pear Psylla	per acre	acre or a minimum of 10 gallons per acre by aircraft. Pre-bloom sprays can be applied from dormant through bud
		burst stages.

Do not apply more than 0.8 pound active ingredient per acre per season.

Do not graze livestock in treated areas.

Do not feed cover crops from treated areas to livestock.

Peppers, Bell (3 day phi)

Insects Controlled	Rate of Application	Method of Application
Cabbage Looper	4 to 8 ounces	Apply using sufficient water to obtain
Corn Earworm	(0.1 to 0.2 pound active)	uniform coverage. Apply as needed.
Cutworms	per acre	Apply with ground equipment using a
Flea Beetle	_	minimum of 10 gallons of finished
Pepper Weevil		spray per acre or a minimum of 2
Vegetable Leafminer		gallons per acre by aircraft.
European Corn Borer	8 ounces	
-	(0.2 pound active)	
	per acre	
Do not apply more than 1.6 pounds active ingredient per acre per season.		

Pine Seed Orchards

Insects Controlled	Rate of Application	Method of Application
Coneworms	8 ounces in 100 gallons	For high volume sprayers, apply 5 to 10
Seed Bugs	of water (0.025% dilution	gallons of finished spray per tree.
_	by weight)	
	42 ounces in 100 gallons	For low volume sprayers, apply 100
	of water (0.125% dilution	gallons per acre.
	by weight)	-
	30 ounces per acre	For aerial application, use in not less
		than 10 gallons of water.

To control Webbing Coneworm – make first application within 1 week of female flower closure or peak pollen flight.

To control other coneworms and seed bugs – make first application within 30 days following female flower closure.

Repeat applications at 4 week intervals, but do not apply more than 6 applications.

Do not graze livestock in treated areas.

Do not feed cover crops from treated areas to livestock.

Avoid Contact with open water.

Pistachios (0 day phi)

Insects Controlled	Rate of Application	Method of Application
Leaffooted Bugs	8 to 16 ounces	Use sufficient water to obtain full
Naval Orangeworm -	(0.2 to 0.4 pound active)	coverage of foliage. Apply LG
Peach Twig Borer	per acre	Permethrin 3.2 EC Agricultural
Plant Bugs		Insecticide in a minimum of 10 gallons
Stink Bugs		of finished spray per acre by aircraft or
		by ground equipment in 25-400 gallons
		of finished spray per acre.
Ants	16 ounces	Application should follow mowing of
	(0.4 pound active)	weed growth to insure maximum
	per acre	coverage of the soil surface. Overhead
		moisture following application will
		enhance activity.

Do not apply more than 1.6 pound active ingredient per acre per crop season.

Do not apply after 10% hull split.

Do not graze livestock in treated areas.

Do not feed cover crops from treated areas to livestock.

Potatoes (14 day phi)

Insects Controlled	Rate of Application	Method of Application
Aster leafhopper	4 to 8 ounces	Apply with ground equipment in a
Beet Armyworm	(0.1 to 0.2 pound active)	minimum of 10 gallons of finished
Cabbage Looper	per acre	spray per acre or in a minimum of 2
Colorado Potato Beetle		gallons per acre by aircraft. LG
Cutworms		Permethrin 3.2 EC Agricultural
European Corn Borer		Insecticide may also be applied using
Potato Aphid		refined non-volatile vegetable oil for
Potato Flea Beetle		control of listed pests. LG Permethrin
Potato Leafhopper		3.2 EC Agricultural Insecticide should
Potato Psyllid		be diluted with oil and applied in a
Potato Tuberworm		minimum of one quart total volume per
Tarnished Plant Bug		acre using equipment calibrated to give
		adequate coverage. Use sufficient
		spray volume to obtain full coverage.
Do not apply more than 1.6 pounds active ingredient per acre per season.		

Pumpkins: For general use directions refer to the Cucurbit Vegetables crop grouping.

Range Grass (New Mexico Only)

Insects Controlled	,na/*	Rate of Application	Method of Application
Range Caterpillar	•••	0.4 ounces (0.01 pound active) per acre	Apply using sufficient spray volume to obtain uniform coverage. Apply with ground equipment in a minimum of 10 gallons of finished spray per acre or in a minimum of 2 gallons per acre by aircraft.
Do not apply more Cattle may be prese Do not harvest or fe	nt during	g application.	

Roses (Field Grown)

Insects Controlled	Rate of Application	Method of Application	
Heliothis spp.	4 to 8 fluid ounces	LG Permethrin 3.2 EC Agricultural	
	(0.1 to 0.2 pound active)	Insecticide may be applied with ground	
	per acre	equipment in a minimum of 10 gallons	
		of finished spray per acre or in a	
ļ		minimum of 2 gallons of finished spray	
		per acre by aircraft.	

Roses (Greenhouse)

Insects Controlled	Rate of Application	Method of Application	
Beet Armyworm	8 fluid ounces	Caution: LG Permethrin 3.2 EC	
Cabbage Looper	(0.2 pound active)	Agricultural Insecticide is not	
Omnivorous Leafroller	per 100 gallons of water	phytotoxic to the following varieties of	
		greenhouse roses: Ballena, Bettina,	
		Cara Mia, Coquette, Excitement,	
		Forever Yours, G. Wave, Jack Frost, Jr.	
		Bridesmaid, Matador, Paul's Pink,	
		Samantha, Seventeen, Sonia, Town	
		Crier, Tropicana and Visa. Other	
		varieties may vary in their sensitivity to	
		LG Permethrin 3.2 EC Agricultural	
		Insecticide and a small number of	
		plants should be treated under local	
		conditions to determine plant safety	
		prior to commercial use.	

Spinach: Refer to **Leafy Vegetable** crop grouping for general use directions. Do not apply more than 1.0 pound active ingredient per acre per season.

Tomatoes, Tomatillos (0 day phi)

Insects Controlled	Rate of Application	Method of Application
Beet Armyworm	2 to 8 ounces	Apply with ground equipment in a
Cabbage Looper	(0.05 to 0.2 pound active)	minimum of 10 gallons finished spray
Colorado Potato Beetle	per acre	per acre or in a minimum of 2 gallons
Granulate Cutworm		per acre by aircraft.
Hornworms		
Southern Armyworm		
Tomato Fruitworm		
Tomato Pinworm		
Vegetable Leafminer		

Do not apply more than 1.2 pounds active ingredient per acre per season.

Do not apply to cherry tomatoes or other varieties which produce fruit less than one inch in diameter.

Walnuts (1 day phi)

Insects Controlled	Rate of Application	Method of Application	
Codling Moth	8 to 16 ounces	For full coverage application apply	
Navel Orangeworm	(0.2 to 0.4 pound active)	0.05 to 0.1 pound active per 100	
Walnut Husk Fly	per acre	gallons (based on 400 gallons finished	
		spray per acre), spray to run-off; OR,	
		for low volume application apply 0.2 to	
		0.4 pound active per acre (25-200	
	Ì	gallons finished spray per acre). For	
		aerial application apply 0.2 to 0.4	
		pound active in a minimum of 10	
		gallons of finished spray per acre.	
		Apply when insects appear.	

Do not apply more than 1.6 pounds active ingredient per acre per season.

Do not graze livestock in treated areas.

Do not feed cover crops from treated areas to livestock.

Premises Spray

For agricultural use only.

Spray directly to walls and ceiling as residual surface treatment only. Do not treat manure or litter. Avoid contamination of feed and water. Do not apply directly to livestock or poultry.

For Application In	Insects Controlled	Rate of Application	Method of Application
Dairies, Barns, Feedlots, Stables, Poultry Houses, Swine and Livestock Houses	House Flies, Stable Flies and Other Manure Breeding Flies. Also aids in the reduction of Cockroaches, Mosquitoes and Spiders	1 gallon per 750 square feet of surface	Dilute 4 ounces to 12.5 gallons of water. Apply with sprayer.

Re-treat as necessary, but not more often than once every 2 weeks.

The use of any residual fly spray should be supplemental with proper manure management and general sanitation to reduce or eliminate fly breeding site.

Treatment of Preconstruction Lumber and Logs General Information

LG Permethrin 3.2 EC Agricultural Insecticide should be diluted with water. To prepare the spray, dilute LG Permethrin 3.2 EC Agricultural Insecticide as shown in the following spray dilution chart:

Spray Dilution Chart			
Gallons of Spray	Gallons of LG Permethrin 3.2 EC Agricultural Insecticide to Use		al Insecticide to Use
Mixture Desired	0.5% Solution	0.75% Solution	1.0% Solution
40	1/2	3/4	1
80	1	1 1/2	2
200	2 1/2	3 3/4	5
400	5	7 1/2	10
800	10	15	20

Directions for Application

To protect unseasoned lumber and logs from wood destroying insects, such as Termites, Carpenter Ants, and Beetles (Ambrosia, Powder-post, Old house borers, and others), totally treat wood with a 0.5% to 1.0% solution of LG Permethrin 3.2 EC Agricultural Insecticide. This solution can be applied by various methods including spraying, brushing, dipping, and pressure treatment. Frequent monitoring of dip and pressure systems are necessary to insure that the desired level of LG Permethrin 3.2 EC Agricultural Insecticide is maintained. Wood can be handled after treatment when dry.

- 1. For dip treatments, the wood should be totally submersed in the solution until thoroughly wet and then allowed to dry in a suitable location. Dipping solutions to which LG Permethrin 3.2 EC Agricultural Insecticide has been added should be agitated before use if left unused for long periods of time. Sediment, debris and other deposits should be periodically cleaned from the tank.
- 2. For pressure treatments the wood should be placed in the treatment chamber, the LG Permethrin 3.2 EC Agricultural Insecticide solution added and the system pressurized up to 250 psi for up to one hour depending on the density and type of wood treated. After the pressure is released and the system drained, the wood should be placed in a suitable location for drying.
- 3. For spray treatments, the wood should be sprayed thoroughly including back and ends.
- 4. For brush treatments, all parts of wood surfaces should be thoroughly treated.
