Wilmington, DE 19808

Dear Ms. Maks:

Subject: Add One Day Pre-Plant Burndown and additional Uses
ET Herbicide/Defoliant
EPA File Symbol 71711-7
Your Submissions Dated September 8, 2008

The amendment referred to above, submitted in connection with registration under section 3(c)(7)(A) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), is acceptable provided that you:

1. Submit/cite all data required for registration/reregistration of your product under FIFRA section 3(c)(5) or 4(a) when the Agency requires all registrants of similar products to submit such data.
2. Submit one (1) copy of your final printed labeling before you release the product for shipment. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product bearing the amended labeling constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

If you have any questions concerning this letter, please contact me at 703-305-6224.

Sincerely yours,

Joanne I. Miller
Product Manager (23)

SUPPLEMENTAL LABEL

NICHINO AMERICA, INC.

ET[®] Herbicide/Defoliant

(EPA Reg. No. 71711-7)

Crop: Bulb Vegetables, Cole Crops, Cucurbits, Fruiting Vegetables, Leafy Vegetables, Legumes, Root and Tuber Vegetables, Cereal Grains, Oil Seed Crops, and Sugarcane

Use: ET Herbicide for Preplant Burndown and for Control of Broadleaf Weeds

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This labeling and the EPA approved container label must be in the possession of the user at the time of application. All applicable directions, restrictions, and precautions on the EPA registered label are to be followed.

New crops appear on this supplemental labeling that do not appear on the Section 3 container label.

NOTICE: Before using this product, read the First Aid, Precautionary Statements, Conditions of Sale and Warranty, and complete Directions for Use found on the container labeling.

General Information

ET may be applied for preplant control of emerged winter annual and summer annual broadleaf weeds, and burndown or suppression of certain perennial broadleaf weeds. ET should be tank mixed with one or more labeled burndown herbicides. For control of grassy weeds, the ET tankmix should include a registered graminicide or nonselective herbicide such as glyphosate, paraquat, or glufosinate. If using ET in a water source of \geq pH 7.5, use of an approved agricultural buffering agent is recommended.

Application and Dosage

ET should be applied in a minimum spray volume of 10 gallons finished spray per acre to emerged weeds less than 4 inches tall or rosettes less than 3 inches in diameter. Addition of a crop oil concentrate (COC) or nonionic surfactant is recommended for optimum control. Use nonionic surfactants at a concentration of 0.25% and COC at a concentration of 1%. ET is a contact herbicide and thorough coverage of target weeds is essential for optimum performance. Apply ET at a rate of 0.5 - 2.0 fluid ounces per acre with a labeled rate of the tankmix partner(s).

Use Restrictions

- Do not make more than 3 applications or exceed 5.5 fluid ounces per acre per crop year.
- Allow a minimum of 30 days between applications.
- For crops listed on this label, do not apply within 24 hours of planting.
- For tank mixtures, refer to each product label for crop rotation restrictions, mixing directions, and precautionary statements. Always use in accordance with the most restrictive of label precautions and limitations. Follow the crop rotation statements on the tankmix product if they are more restrictive.
- Do not allow livestock to graze in treated areas.
