Antimicrobials Division (H7510C)
401 "M" St., S.W.
Washington, D.C. 20460

EPA Reg. Number:

71770-5

Date of Issuance:

DEC 15 1999

Term of Issuance:

Conditional

Name of Pesticide Product:

EKO Orange

NOTICE OF PESTICIDE:

- Registration
- Reregistration

(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Advanced Water Technology, Inc.
6 Journey, Suite 115
Aliso Viejo, CA 92656

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/ reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for reregistration of your product under FIFRA section 4.

2. Submit two copies of the revised final printed label for the record.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

[Swimming Pools Only] This product is formulated to be used as an algaecide in conjunction with EKO Blue and an approved sanitizer and should not affect your pool water balance. Although compatible with many other pool products, it is recommended that you contact your local authorized EKO pool professional or call 877-EKOPOOL before adding EKO Orange to your pool. EKO Orange should not be used in conjunction with any biguanide pool products.

Before adding EKO Orange to your pool, the pool water must be balanced according to National Pool and Spa Institute (NPSI) standards. An in-depth look at these standards can be found on our website www.ekopool.com or by contacting your local pool professional.

Weekly Dosage: Under normal conditions one application of EKO Orange in conjunction with one application of EKO Blue will keep 10,000 gallons of your pre-balanced pool water crystal clear for one week. With your pump filter on broadcast, simply pour one complete packet each of EKO Orange and EKO Blue into your pool. Operate the pump/filter for one hour prior to resuming pool use. If the size of your pool (in gallons) is not evenly divisible by 10,000 gallons, adjustments to odd numbered gallons should be made during the initial treatment and then added on accumulated weeks. For example, for a 15,000 gallon pool, two initial treatments should be made. The following week a single treatment should be made. On week three, two treatments should be made, and so on.

Maintenance: EKO Orange is designed to be pH neutral, and therefore should not affect pool water balance. However, the pH, Total Alkalinity and Hardness should be monitored on a weekly basis and maintained in accordance with NPSI standards. Consult your authorized EKO pool professional should your pool water fall out of these recommended ranges. Check with an authorized EKO dealer for recommended pool testing procedures and/or testing kits.

[Pools/Spas] This product is formulated to be used as an algaecide in conjunction with EKO Blue and an approved sanitizer and should not affect your spa water balance. Although compatible with many other spa products, it is recommended that you contact your local authorized EKO spa professional or call 877-EKOPOOL before adding EKO Orange to your spa. EKO Orange should not be used in conjunction with any biguanide spa products.

When a spa is integrated into the pool, EKO Orange may be used by adding one additional treatment directly to the spa every other week. Before adding EKO Orange to your spa, the spa water must be balanced according to National Pool and Spa Institute (NPSI) standards. An in-depth look at these standards can be found on our website www.EKOPOOL.com or by contacting your local spa professional.

Weekly Dosage: Under normal conditions one application of EKO Orange in conjunction with one application of EKO Blue will keep 500 gallons of your pre-balanced spa water crystal clear for one week. With your pump filter on broadcast, simply pour one packet each of EKO Orange and EKO Blue into your spa. Operate the pump/filter for one hour prior to resuming spa use. If the size of

your spa (in gallons) is not evenly divisible by 500 gallons, adjustments to odd numbered gallons should be made during the initial treatment and then added on accumulated weeks. For example, for a 750 gallon spa, two initial treatments should be made. The following week a single treatment should be made. On week three, two treatments should be made, and so on.

Maintenance: EKO Orange is designed to be pH neutral, and therefore should not affect spa water balance. However, the pH, Total Alkalinity and Hardness should be monitored on a weekly basis and maintained in accordance with NPSI standards. Consult your authorized EKO spa professional should your spa water fall out of these recommended ranges. Check with an authorized EKO dealer for recommended spa testing procedures and/or testing kits.

[Spas] This product is formulated to be used as an algaecide in conjunction with EKO Blue and an approved sanitizer and should not affect your spa water balance. Although compatible with many other spa products, it is recommended that you contact your local authorized EKO spa professional or call 877-EKOPOOL before adding EKO Orange to your spa. EKO Orange should not be used in conjunction with any biguanide spa products.

Before adding EKO Orange to your spa, the spa water must be balanced according to National Pool and Spa Institute (NPSI) standards. An in-depth look at these standards can be found on our website www.EKOPOOL.com or by contacting your local spa professional.
