DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

HOW TO APPLY

- Adjust nozzle to coarse spray.
- After weeds have emerged spray the weeds AND the entire surrounding area you want to keep free of weeds for up to 3 months. Spray the area until **THOROUGHLY WET**.
- When spraying around the base of well-established ornamental plants, shrubs or trees, shield desirable plants from drift with a sheet of cardboard or plastic. If desirable plant is accidentally sprayed, rinse off immediately with water.
- For best results, apply during warm, sunny weather (above 60 F).
- Spray when air is calm to prevent drift to desirable plants.

IMPORTANT: Do not spray plants or grasses you like – they may die too. When making applications around desirable trees or ornamental plants, wait until desirable plants have become well established and deeply rooted. **DO NOT** use for weed control in lawns or vegetable gardens since Roundup Plus WeedPrevent kills lawn grasses and prevents new plants from sprouting for up to 3 months.

HOW IT WORKS

Roundup Plus WeedPrevent has two-way action. One ingredient enters plants through foliage and moves systemically to the roots killing weeds by stopping the production of a substance found in plants. The other ingredient provides an invisible barrier in the soil that prevents growth of sprouting weeds. Weeds begin to yellow and wilt within 24 hours with complete kill in 1 to 2 weeks.
