<p>WHAT IT DOES</p>	<p>[Optional weed illustrations] Kills and prevents all types of weeds and grasses</p>
<p>HOW IT WORKS</p>	<p>IMPORTANT: To prevent new weeds and grasses from growing YOU MUST SPRAY THE ENTIRE AREA you want to control (keep free of weeds), NOT JUST the emerged (existing) weeds.</p> <p>[Insert brand name] This product Works 2 (Two) ways:</p> <ol style="list-style-type: none"> One ingredient (glyphosate, the primary active ingredient,) enters plants through foliage and moves systemically to the roots, killing weeds by stopping the function (production) of a substance found in plants (but not humans or animals). Weeds begin to yellow and wilt within hours (# hours) with complete kill in 1 to 2 weeks. <p>[ALTERNATE TEXT] Glyphosate, the primary active ingredient in this product [Insert Brand Name] is absorbed by the weed leaves. It moves through the weed to the root, stopping the function of an essential enzyme found in plants (but not humans or animals). Weeds die, roots and all - so weeds (they) don't grow back. Kills only what you spray. Any product not absorbed by the plant breaks down into natural materials without moving in or on the soil to untreated plants.</p> <ol style="list-style-type: none"> The other ingredient (Contains a second active ingredient that provides (creates) an invisible barrier in the soil that prevents growth of (new) (sprouting) weed(s) (seeds) (and grasses) (from sprouting, appearing, growing) for up to 4 (2, 3, 3-4) months. <p>[Optional graphics]</p>
<p>WHERE (HOW) TO USE</p>	<p>Apply (spray) this product [Insert brand name] (to) BOTH existing weeds and (weed-prone) areas where weeds have not yet appeared. WHERE NOT TO USE	<ul style="list-style-type: none"> DO NOT SPRAY plants or grasses you like - they will die. DO NOT USE in lawns or for lawn renovation as this product <i>[Insert brand name]</i> prevents desirable grasses from growing too. DO NOT USE for vegetable garden preparation or in and around fruits and vegetables. DO NOT SPRAY around young plants or in an area that will be planted or seeded within 4 (1, 2, 3, 3-4) months. <p>Note: For weed control in these areas use Roundup Weed & Grass Killer Ready-To-Use (Plus).</p>
