**HOW IT WORKS**

[Insert brand name/This product] is formulated with four active ingredients for broad spectrum control of [most][many][types of] weeds and grasses. [[Two ingredients][,][Fluazifop-P-butyl and Triclopyr] [,] [are absorbed by/enters [the] plant[s] through/penetrate] the [[leaves/foilage of] grass[es] or weed[s] [leaves/foilage]] and [are transported][move][in][inside][within] the plant [down] to the [plant[s]/weed[s]] root[s].] [[The third [active] ingredient,] Diquat[,], works on contact to provide visible results [within/in] [3/6] hours.] [[The fourth [active] ingredient,] Imazapic[,], prevents new weeds from growing [for up to] [12 months/ 1 year/ 365 days] by creating an invisible barrier [in the soil] [where applied].]

[Some [established/ hard-to-kill/ perennial] weeds [such as poison ivy] may take [up to] [3/4/3-4] [or more] weeks for complete kill/control.] [Individual results may vary.]

**[Insert Brand Name] [Dual Action/ Formula] Works [2/ two] ways:**

1. [Insert Brand Name/ This product] [is absorbed by the weed's leaves/ enters plants through the foliage] [It moves [systemically/through the weed] to the root.] [[Triclopyr/ and/ Fluazifop-P-butyl/ This product] penetrates waxy leaves [allowing the product to enter the plant more readily].] [[Diquat [can] cause[s]] weeds [to/will] begin [to/brown[ing]/yellow[ing]/ wilt/and/or] [as fast as/within] [3/6/12] hours with complete kill in 1 to 2 weeks.] [Weeds die, [down] to the roots – so they don't grow back.]
2. [Imazapic [prevents new weeds from growing for up to [1 year/12 months] by creating an invisible barrier in the soil [where applied].]

**Alternate Text:** [Imazapic [creates/ provides] an invisible barrier [where applied] in the soil that prevents growth of [new] [weeds/ seeds/ and grasses] [from/ sprouting/ germinating/ appearing/ growing] for up to [1 year/12 months].

**IMPORTANT: To prevent new weeds and grasses from growing, YOU MUST SPRAY THE ENTIRE AREA you want to [control/ keep free of weeds], NOT JUST the [emerged/ existing] weeds.**

---

**DIRECTIONS FOR USE**

---

**ENVIRONMENTAL HAZARDS:** To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather and when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Rinsing application equipment over the treated area will help avoid run off to water bodies or drainage systems. Diquat is toxic to aquatic invertebrates. Do not apply directly to water. Do not contaminate water when cleaning equipment or disposing of equipment wash waters. **GROUNDWATER ADVISORY:** Triclopyr, imazapic and fluazifop-P-butyl have properties and characteristics associated with chemicals detected in groundwater. The use of this product in areas where soil is permeable, particularly where the water table is shallow, may result in groundwater contamination. **NON-TARGET ORGANISM ADVISORY:** Triclopyr, imazapic, fluazifop-P-butyl and diquat are toxic to plants and may adversely impact the forage and habitat of non-target organisms, including pollinators, in areas adjacent to the treated site. Protect the forage and habitat of non-target organisms by following label directions intended to minimize spray drift. **SURFACE WATER ADVISORY:** Triclopyr, imazapic and fluazifop-P-butyl may impact surface water quality due to runoff of rain water. This is especially true for poorly draining soils and soils with shallow ground water.

**NOTICE:** To the extent consistent with applicable law, buyer assumes all responsibility for safety and use not in accordance with directions.

### Calculation of Spray and Weed Coverage

- To determine approximate quantity of spray solution by container, divide the net contents in fluid ounces by 6 fl oz per gallon. (Y= Net contents (fl oz) ÷ 6 fl oz)
- To determine how many square feet can be treated, multiply Y (gallons of spray solution) by 300 (X spray coverage= Y gallons of spray solution x 300 sq ft)
- Both rounded down and calculated spray solution values (Y) are shown in brackets. Spray coverage values (X) reflecting results from rounded and calculated Y value are shown in brackets, as well.

NET CONTENT SKU Size	Spray Coverage (X) (using 6 fl oz/ gallon)	6 fl oz/ gallon Spray Solution (Y)
XX FL OZ (QT or GAL) (ml or L)	Net Contents (fl oz) ÷ 6 fl oz= Y; multiply Y by 300= treatment area in sq ft	Net contents (fl oz) ÷ 6 fl oz
6 FL OZ	Up to 300 sq ft	Makes [up to] 1 Gallon
8 FL OZ	up to 400 sq ft	Makes [up to] 1.33 gallons
16 FL OZ [(1 PT)]	up to [780/800] sq ft	Makes [up to] [2.6/2.67] gallons
