**APPLICATION DIRECTIONS:** Special procedures must be followed to arm the container, apply the product, and restore the safety clip to disarm the container. Before taking this product into bear country, read the directions and familiarize yourself with these procedures. If you test-fire this container, do so with your back to the wind in an area away from people and bears. Do not test-fire Pepper Power<sup>®</sup> in an area where you plan to camp, hunt, hike, or fish. Do not test-fire for more than a half a second. This should be done as the attacking bear is charging toward you and is about 40 feet away (2-3 seconds from reaching you). Be aware that wind or rain can greatly affect the accuracy of the initial burst of spray. In some cases, you may have to wait until the bear is quite close before spraying. If the bear makes it through the initial burst of spray, continue spraying, aiming for the face. Shield your eyes and face if you must face the wind.

## Bear Attack

Mark Matheny was attacked by a female grizzly bear on a main trail. In less than half a minute the grizzly charged and mauled Mark twice. Mark's partner, Dr. Fred Bahnsen, reacted immediately to Mark's condition and treated his wounds. Fortunately Dr. Bahnsen got Mark out of the woods and to the emergency room without further incident. Mark suffered extensive bite lacerations to the head and neck, bite lacerations to the right arm, and also to the left anterior chest. This bear attack is what motivated Mark to establish UDAP Industries, Inc.
