Subject: **XTRA-PINE-CLEANS DISINFECTS DEODORIZES**
EPA Registration Number: 72138-4
Application Date: February 21, 2011
Receipt Date: February, 21, 2011

Dear: Ms. Griffin

The following amendment, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, is acceptable, with conditions

Proposed Amendments

Adding marketing claim "Pine Oil Disinfects Naturally" and "Pine Oil Disinfects Botanically" to the label

Conditions:

Revise the label as follows:

- 1) Delete the label claims' regarding disinfects naturally or disinfects botanically on page 2 of 8. While these terms may be factually correct in describing some of the attributes of a product, these terms can be misinterpreted as claims that relate to safety of the product and therefore are misleading. The EPA does not approve claims that suggest a pesticide is safe, and does not approve claims that could be considered misleading.

Alternatively you may state that "Pine Oil is botanically derived or Pine Oil is naturally derived."

- 2) Delete "Influenza A virus and Pandemic 2009 H1N1 claims on page 2 of 8 and Page 3 of 8. A limited disinfectant cannot make viridical claims.
- 3) Qualify woodwork as "hard nonporous surface" by stating "finished" woodwork.

General Comments

A stamped label with conditions is enclosed. Submit a final printed label before distributing or selling the product bearing the revised labeling
