## PRECAUTIONARY STATEMENTS

### HAZARD TO HUMANS AND DOMESTIC ANIMALS

DANGER. Corrosive. Causes irreversible eye damage. Wear protective eyewear such as safety glasses, face shield or goggles. Harmful if swallowed, inhaled or absorbed through the skin. Do not get in eyes, on skin or on clothing. Avoid contact with skin. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.

### ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water board or Regional Office of EPA.

### PHYSICAL AND CHEMICAL HAZARDS

**STRONG OXIDIZING AGENT.** Mix only with water. Use only clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible isolate each container in open air or well-ventilated area. Flood with large volumes of water if necessary.

### STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

**Storage:** Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container, if possible, and flood with large amounts of water to dissolve material before discarding.

**Pesticide Disposal:** Place in trash collection or dispose in an approved landfill area.

**Container Disposal:** Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available. Rinse empty container thoroughly with water to dissolve all material before discarding. Place in trash collection, or dispose in an approved landfill area.

### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

#### For routine maintenance of spas and hot tubs to control bacteria and algae:

1. Before using spa or hot tub, test water, pH, free chlorine and alkalinity using a reliable test kit. Adjust pH to between 7.2 – 7.6.
2. With the pump on, and using the table below as a guide, add sufficient tablets to establish a level of 3 – 5 ppm free chlorine as determined by the test kit. Do not enter the water until the free chlorine level drops to 5 ppm or less. Re-entry into treated spas is prohibited above levels of 5ppm due to risk of bodily harm.

Before using the spa, bathers should shower in order to avoid adding soap, lotions, or oils from the body into the water. Avoid overloading the spa. Depending on how heavily the spa is used, it may be necessary to super chlorinate the water as frequently as after each use or as infrequently as once per week, in a moderately used spa.

1. Using the table as a guide, superchlorinate water to 6.0 – 8.0 ppm free chlorine by adding additional tablets to the spa or hot tub.
2. Do not allow bathers to enter the spa [or hot tub] until the free chlorine falls to 3.0 to 5.0 ppm. Re-entry into treated spas is prohibited above levels of 5ppm due to risk of bodily harm.
3. If spa or hot tub water does not clear after superchlorination treatment, drain, clean and refill with fresh water.
