Ensure the product gets down into the rootzone by, <ul style="list-style-type: none"> - pulling mulch away from plants to be treated. - building a well around individual plants. - pouring the drench solution slowly to allow the soil to absorb it. Keep rose, flower and shrub beds clean. This minimizes harborage sights for diseases and insects (for additional cultural practices, consult your local County Extension Service).
HOW THIS PRODUCT WORKS	Water moves the product down into the root zone where it is taken up & moved into the plant. The entire plant, even new growth, is fed and protected against insects and disease. Rain or watering cannot wash off this long-lasting systemic protection.
