#### Section II - Explanation

Bayer Corporation is submitting a **Notification** to add the following claims to the label for the above-mentioned product. The statement "This product provides up to 9 months of insect protection with a single application" and, "Keeping nuisance pests out of your house has never been easier." have been added to the back panel of the label. These claims are simply reworded versions of existing claims.

Please find enclosed 1 copy of the proposed label.

This notification is consistent with the provision of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

NOTIFICATION APR 1 5 2005

#### (FRONT PANEL)

# Beta-cyfluthrin 0.05% Ant & Roach Killer Pump Spray

- Ready-to-Use

. a +

It is a violation of Federal	Law to use this product in a manner inconsistent with its labeling.
For best results, read and	
BEFORE YOU USE	Do not spray into fish pools, ponds, streams, or lakes.
Read and follow directions when using.	Indoors, do not use as a space spray (do not spray into the air)
	Remove animal feeding dishes before spraying.
	Keep children and pets away from treated areas until spray has dried.
	Do not use on surfaces where food is prepared or where food is exposed.
	<ul> <li>Before spraying indoors, remove birds from area and tightly cover or remove fish bowls and aquariums.</li> </ul>
HOW TO USE	Indoor Use
Shake Well Before Use	Hold container upright while spraying. Direct nozzle about 12 inches from surface to be treated.
	Spray around baseboards, into cracks and crevices and other places where insects live and hide (under sinks, cabinets, refrigerators, damp areas, etc.) until surfaces are wet. Avoid excessive wetting of linoleum, asphalt tiles or plastic.
	For long lasting residual action leave spray undisturbed. The product will keep on killing fc. up to 9 months.
	Outdoor Use

. `	
	<ul> <li>Apply to exterior surfaces of the home.</li> <li>Spray a band 3 to 4 feet wide around and alongside the foundation and porches of the house.</li> </ul>
	• Treat soil, turf or walkways adjacent to foundation and porches. Also treat 1 to 2 feet up along the side of the dwelling.
	• For more serious problems, a wider band of treatment, up to 10 feet, may be necessary.
	Spray with the wind to avoid drifting of the spray onto skin or clothing.
	<ul> <li>Treat where dissimilar building materials meet, such as where brick meets wood trim or where siding meets window edges or where cracks are visible or around and into any openings where utilities enter the home. Spray around doors and window frames.</li> </ul>

.

•

DIRECTIONS FOR USE (	continued) -
HOW TO USE	Outdoor Use (continued)
Shake Well Before Use	• Treat outside surfaces of garages, carports, patios, driveways and sidewalks if insects are present.
	<ul> <li>Treat other problem areas such as around wood piles, storage sheds and other areas of insect infestation as needed. Spray on ant trails and ant hills.</li> </ul>
	• For wasps, hornets, yellow jackets: Application to nests should be made late in evening when insects are at rest.
	<ul> <li>To aid in control of fire ants in lawns and other outdoor home recreation areas, thoroughly drench the entire mound area. Spray provides contact activity and residual in the active mound. Use a coarse spray and apply gently to avoid disturbing ants. Note: For best results apply in cool weather 65 to 80° F, or in early morning or late evening hours. Treat new mounds as they appear.</li> </ul>
`	Wood Infesting Pests
	<ul> <li>For control of termites and wood-infesting beetles found above ground, apply to voids and holes in damaged wood, and in spaces between wooden structures and between the sill plate and foundation where wood is exposed.</li> </ul>
• [	• Apply spray to exposed worker and winged reproductive forms of termites. This type of application is intended to be a supplemental treatment for control of drywood and above-ground subterranean termites and other wood-infesting insects. It is not intended as a substitute for soil treatments for termite control.
	<ul> <li>For control of swarming or reproductive stages of termites, apply a coarse spray to the swarm or area on which they collect.</li> </ul>
	<ul> <li>For control of carpenter ants around houses and other structures, apply around doors and windows and other places where carpenter ants may enter the premises. Spray into cracks and crevices or voids where these ants or their nests are present. Use a sufficient amount of coarse spray to cover the area.</li> </ul>
	<ul> <li>For control of carpenter bees in structures, spray the liquid directly into bee entrance holes. Leave the entrance holes open for 24 hours to be certain that returning adult bees are killed. When there is no activity, the hole may be sealed with a suitable sealant.</li> </ul>
