FOR OUTDOOR RESIDENTIAL USE ONLY

ACTIVE INGREDIENTS:

Beta-cyfluthrin	0.18%
Imidacloprid	0.36%
OTHER INGREDIENTS:*	<u>99.46%</u>
TOTAL	100.00%

* Other ingredients include: Water, glycerin (freeze/thaw recovery aid), organic solvent (less than 1% to dissolve the active ingredient for mixing), surfactants and stabilizer (to keep the active ingredient dispersed in water), preservative and antifoam.

Beta-cyfluthrin is the chemical name for Tempo Ultra® Insecticide.

Imidacloprid is the chemical name for Merit® Insecticide.

EPA Reg. No. 72155-XXX

EPA Est. No. ____-AA-__

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

BEFORE YOU USE

Read and follow directions when using.

- When spraying the product on plants with flowers, apply during early morning or late evening, when bees are not present.
- Do not spray the product into fish pools, ponds, streams, or lakes.
- Remove animal feeding dishes prior to application. Keep children and pets away from treated areas until spray has dried.
- Do not apply to fruits or vegetables used for food.

HOW TO USE

Shake Well Before Use

This product is ready to spray. Just attach this bottle to your hose according to directions. Water automatically mixes with the concentrate as you spray. For grubs, water product in soon after application.

HOW TO ATTACH AND SPRAY

[Alternate Step 2 used when the product is either for Ornamental or Lawn use but not both.]

1. Connect your garden hose to the bottle. Be sure the blue water control valve on top of the spray nozzle is in the OFF position. Turn on water at faucet. <Icon – Water Control Valve in "OFF" Position>
 2. To maximize the effectiveness of this product against your specific insect problems, two application settings have been developed. Be certain to choose the setting below which describes your use area.

For Lawn Use and along Building Foundations: Pull out and twist the small, star-shaped, blue product-control button until the 'L' is on top. Push the button in to open. Proceed to step #3. <Icon – Product Control Button in Open "L" Position>

For General Use: Pull out and twist the small, star-shaped, blue product-control button until the 'G' is on top. Push the button in to open. NOTE: The button will only go half way in at the 'G' setting. Proceed to step #3. <Icon – Product Control Button in Open "G" Position>
 - [2. Twist the small, star-shaped, blue product control button to align the flat portion with the lock tab. Push the button in to open. <Icon – Product Control Button in Open Position>]
 3. To begin spraying, point nozzle toward the area to be treated and turn the blue water control valve counterclockwise to the ON position. Tab will be horizontal. <Icon – Water Control Valve in "ON" Position>
- Spray leaves and tender new shoots. To kill insects that hide, spray the underside of the leaves. Apply until leaves are evenly coated with spray, but not dripping.
4. To stop spraying, turn the blue water control valve on top of the spray nozzle to OFF. To close, push in the small round button opposite the star-shaped product-control button. Turn off faucet.
 5. Relieve water pressure by turning blue water control valve to the ON position until water slows to a drip. Turn blue water control valve back to OFF. Disconnect garden hose from bottle.

	Annual Bluegrass weevil (hyperodes weevil) Ants (including Carpenter Ants) Armyworms Billbugs Bluegrass billbugs Boxelder bugs Caterpillars Chiggers Chinch bugs	Clover mites Cockroaches Crickets Cutworms Earwigs Fire ants Fleas	Flies Grasshoppers Hyperodes weevils Japanese beetles Mole crickets Mosquitoes Pillbugs	Sod webworms Sowbugs Spiders Ticks (including deer ticks) Wasps White grubs
FOR BEST RESULTS	<ul style="list-style-type: none"> • Rain or watering one hour after application will not wash away effectiveness. • After spraying the lawn, wait 24 hours before mowing. • To avoid serious damage to plants, eliminate pests early in the season before they multiply. For severe infestations, repeat every 7 to 14 days as needed. 			
HOW MERIT + TEMPO READY-TO-SPRAY INSECTICIDE WORKS	<ul style="list-style-type: none"> • Imidacloprid 0.36% + Cyfluthrin 0.18% READY-TO-SPRAY INSECTICIDE is a totally different way to control the insects that want to destroy your prized roses, flowers, other ornamental plants, and lawn. The unique two-way blend of insecticides controls current insect pest problems and prevents reinfestations for up to 30 days. The residual component is actually taken into the plant. Rain or water cannot wash off this internal protection! Insects are killed when they come into contact with the product or when they attempt to eat the plant. 			

	Children and pets may re-enter the treated area after spray has dried.
