SUBJECT: Application for Pesticide Notification (PRN 98-10) Request General Label Change "Lawn Herbicide 2Q Concentrate/Ready-to-Spray" EPA Reg. No. 72155-86 Application Dated September 10, 2009

Dear Registrant:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 dated 09/10/09 for the above product. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action(s) requested fall within the scope of PRN 98-10. The label submitted with the application has been stamped "Notification" and will be placed in our records.

If you have any questions, please call me directly at 703-305-6249 or Owen F. Beeder of my staff at 703-308-8899.

Sincerely, Rachel C. Halloman

Linda Arrington Notifications & Minor Formulations Team Leader Registration Division (7505P) Office of Pesticide Programs

Section II - Explanation

Please find enclosed a Notification of minor label modification for Lawn Herbicide 2Q Concentrate/Ready-to-Spray, EPA Reg. No. 72155-86, in accordance with PR Notice 98-10.

The specific label modifications are as follows:

- To the "Net Contents" section on page 2 (Concentrate product sublabel), added optional package sizes (6.4 and 3.2 fl. oz.) consistent with PRN 98-10 sections II.E. and IV.B.
- 2. To the "Kills" and "Coverage" sections of the "Quick Facts" table on page 3, added the editorial statement "*or choose from marketing claims*".
- 3. To the "How Much to Use" section on page 3, consistent with PRN 98-10 sections II.E. and IV.B., the optional statement "[*or* 6.4 fl. oz. (13 TBS) of this product in 2 gallons of water treats 1,000 sq. ft.]" was added in order to better fit with the use of a 6.4 fl. oz. package size. (Note that this is NOT a change in the rate, but simply a proportionally equivalent expression in the amount of product).
- 4. To the "How to Use" section on page 4, added optional instructions for the optional smaller package sizes to the pump-style tank sprayer subsection, consistent with PRN 98-10 sections II.E. and IV.B.: [For 3.2 or 6.4 fl. oz. container: Pour entire contents into spray tank and fill with water to [1] [2] gallon mark.]

Enclosed are two copies of the product label (one clean copy and one copy with all changes highlighted in yellow).

This notification is consistent with the provision of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

DIRECTIONS FO	RUSE
It is a violation of Fed	eral law to use this product in a manner inconsistent with its labeling.
	Measure area to be sprayed. Calculate 'square feet' by multiplying length times width.
HOW MUCH TO USE	3.2 fl. oz. (6½ TBS) of this product in one gallon of water treats 500 sq. ft. [or 6.4 fl. oz. (13 TBS) of this product in two gallons of water treats 1,000 sq. ft.]
	Food utensils, such as teaspoons and measuring cups, should not be used for food purposes after use with this herbicide.
	The maximum application rate to turf is 1.5 pounds of 2,4-D acid equivalent per acre per application per site. The maximum number of broadcast applications per treatment site is 2 per year.

ݱね

Do not apply this product in a way that will contact any person, pet either directly or through drift. Keep people and pets out of the area during application.

PRECAUTIONARY STATEMENTS

CAUTION

Hazards to Humans and Domestic Animals

- Harmful if swallowed.
- Causes moderate eye irritation.
- Avoid contact with eyes, skin, or clothing.
- When using this product, wear long-sleeved shirt, long pants, socks, shoes, and rubber gloves.

After using this product:

- Rinse gloves before removing and wash hands.
- If product gets on skin, wash thoroughly with soap & water.
- If product gets on clothing, remove clothing as soon as possible and launder clothing separately before reuse.

FIRST AID	
If Swallowed	 Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
If in Eyes	 Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for further treatment advice.
emergency room or	g poison control center, have this product label accessible. If seeking treatment at an doctor's office, bring this product label to show medical personnel. You may call toll-free medical emergency information.
	.85% 2,4-D, dimethylamine salt (CAS # 2008-39-1), 0.45% Dicamba, dimethylamine salt and 1.61% Quinclorac (CAS # 84087-1-4).

ENVIRONMENTAL HAZARDS

- This product is toxic to fish and aquatic invertebrates.
- Drift or runoff may be hazardous to aquatic organisms in water adjacent to treated areas. To protect the
 environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface
 waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to
 ensure that wind or rain does not blow or wash pesticide off the treatment area. Rinsing application
 equipment over the treated area will help avoid run off to water bodies or drainage systems.
- This chemical has properties and characteristics associated with chemicals detected in groundwater. The
 use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may
 result in groundwater contamination. Application around a cistern or well may result in contamination of
 drinking water or groundwater.
- Most cases of groundwater contamination involving phenoxy herbicides such as 2,4-D have been associated with mixing/loading and disposal sites. Caution should be exercised when handling 2,4-D pesticides at such sites to prevent contamination of groundwater supplies. Use of closed systems for mixing or transferring this pesticide will reduce the probability of spills. Placement of the mixing/loading equipment on an impervious pad to contain spills will help prevent groundwater contamination.

Important – Directions fo	r Storage and Disposal
Storage Conditions	Store in original container in a cool, dry place, out of the reach of children, preferably a locked storage cabinet. Protect from freezing.
Disposal ÎÎÎ	If empty: Non-refillable container. Do not refill or reuse this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency or toll free 1-877-229- 3724 for disposal instructions. Never place unused product down any indoor or outdoor drain.

)

DIRECTIONS FOR USE	
It is a violation of Federal law to	use this product in a manner inconsistent with its labeling.
HOW MUCH TO USE	Measure area to be sprayed. Calculate 'square feet' by multiplying length times width. [This bottle will treat 5,000 sq. ft. in about 20 minutes (actual time will vary depending on water pressure), <i>Editorial Note – Final time value will be adjusted based on final hose-end sprayer selected for market</i>]. The maximum application rate to turf is 1.5 pounds of 2,4-D acid equivalent per acre per application per site. The maximum number of broadcast applications per treatment site is 2 per year.
HOW TO USE Shake Well Before Use	 CONNECT Shake well before use. Connect sprayer to garden hose. Turn on water. SPRAY Extend hose to farthest area to be treated, point sprayer nozzle in direction to be sprayed. Begin spraying – Push & hold lock tab away from knob, use other
	 hand to turn knob (counter) clockwise to ON position. 3. Walk at a steady pace while spraying, using an even sweeping motion, and slightly overlap the treated areas. Work back toward the faucet to avoid walking over wet, treated grass.
	 FINISH To stop spraying, push & hold lock tab away from knob and use other hand to turn knob (counter) clockwise to OFF position. Turn off water at faucet. Relieve water pressure in hose by turning sprayer back to ON positior until water slows to a drip then turn sprayer OFF. Disconnect sprayer from hose.
[FOR BEST RESULTS]	 [WHEN TO APPLY] [Spray when weeds are small and actively growing temperature is below 90°F. Do not apply to Bermudagrass lawns when daytime temperatures exceed 85° F.] [Certain hard-to-kill weeds may be retreated in 2 weeks if necessary. If more than 2 applications are needed, use a spot treatment lawn weed killer such as Bayer Advanced All-in-One Lawn, Weed & Crabgrass Killer Ready to Use. [Do not apply while grass is emerging from dormancy.] [Newly seeded lawn may be sprayed after fourth mowing.] [Bare spots may be seeded 4 weeks after application.] [Keep product spray off plants growing in or around the lawn such as trees, shrubs, flowers, perennials, groundcovers, vegetables, & herbs.]
	 [MOWING] [Do not mow for 1 to 2 days after spraying] [Clippings from the first three mowings should be left on the treated area. Do not use clippings from the treated areas as mulch or compost around flowers, ornamentals, trees, or in vegetable gardens.]
	 [WATERING] [If lawn is dry, water 1 to 2 days before using this product.] [Rain or watering 1 hour after application will not wash away effectiveness.]

)
