Conditional

Name of Pesticide Product:

Stellar 85 Tabs

NOTICE OF PESTICIDE:

Registration
 Reregistration

(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Stellar Technology Company
1647 Sauget Business Blvd.
Sauget, Illinois 62206

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

In the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for reregistration of your product under FIFRA section 4.

2. Make the following label changes:

- a. Revise the EPA Registration Number to read, "EPA Reg. No. 72437-1".
- b. In the Ingredient Statement delete "and related isocyanurates".
- c. SPAs must be deleted from the label. The chlorinated isocyanurates (active ingredient, trichloro-s-triazinetrione) RED does not include spas as a use site for this active ingredient.

EPA Reg. No. 72437-1

3. Submit two copies of the revised final printed label for the record.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

A handwritten signature in black ink, appearing to be 'J. B. S.', is located in the lower right quadrant of the page.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER**

ACCEPTED
with COMMENTS
in EPA Letter Dated:

APR 27 2000

CORROSIVE, causes irreversible eye damage or skin burns. May be fatal if swallowed. Harmful if absorbed through skin or inhaled. Do not get in eyes, on skin or on clothing. Avoid breathing dust. Wear goggles or face shield. Wear protective clothing and rubber gloves. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash clothing before reuse.

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide registered under EPA Reg. No.

72437-1

ENVIRONMENTAL HAZARD

This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD

STRONG OXIDIZING AGENT. Contact with water slowly liberates irritating and hazardous chlorine and bromine containing gases. Decomposes at temperatures above 437°F with liberation of harmful gases. When ignited, will burn with the evolution of chlorine and equally toxic gases. Always add product to large quantities of water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to a fire or explosion. Contamination with moisture, organic material, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible fire and explosion. When shock feeding product should not sit in stagnant water after the feeder shuts off. Purge the feeder with minimal air or water flow between shock treatments.

In case of fire or smoke: Call the fire department. Do not attempt to extinguish the fire without a self contained breathing apparatus (SCBA). Do not let the fire burn. Flood with copious amounts of water. Do not use ABC or other dry chemical extinguishers since there is the potential for a violent reaction.

In case of contamination or decomposition: Do not reseal container. Follow instructions on label.

STORAGE AND DISPOSAL

Pesticide Disposal: Store product in original container in areas inaccessible to children, in a cool dry well ventilated area. Do not store at elevated temperatures. Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. The preferred disposal methods are incineration or chemical treatment in accordance with Federal, State and Local regulations. Do not put product, spilled product, or filled or partially filled containers into trash or waste compactor. Contact with incompatible materials could cause a reaction and fire. Do Not transport wet or damp material.

Container Disposal:

Bulk Bin: Return empty bulk bin for reuse. Do not vacuum, wash or clean inside of bin.

Plastic Drum: Completely empty bag into application equipment. Remove and triple rinse polyethylene liner. Dispose of empty bag and liner in a sanitary landfill or by incineration, or if allowed by State and Local authorities, by burning. If burned stay out of smoke. Do not reuse bag.

Fiber Drum: Completely empty liner by shaking and tapping sides and bottom to loosen clinging particles. Empty residue into application equipment. Remove and triple rinse polyethylene liner. The dispose of liner in a sanitary landfill or by incineration as allowed by State and Local authorities. If drum is contaminated and cannot be reused, dispose of in the same manner.

Plastic Pail: Triple rinse or equivalent. Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by incineration, or if allowed by State and Local authorities, by burning. If burned, stay out of smoke.

Stellar

85 tabs

MICROBIOCIDES

TO CONTROL THE GROWTH OF SLIME FORMING BACTERIA, FUNGI AND ALGAE IN RECIRCULATING WATER SYSTEMS, SEWAGE WASTEWATER SYSTEMS, POOLS, SPAS, TOILET BOWLS AND BREWERY PASTEURIZER WATER

Active Ingredients:

Trichloro-s-triazinetrione and related isocyanurates	85.0%
Sodium Bromide	5.0%
Inert Ingredients	10.0%
	100.0%

Available Chlorine 76.5% -

Provides up to 172% Available Bromine

**KEEP OUT OF REACH OF CHILDREN
DANGER**

STATEMENT OF PRACTICAL TREATMENT

If Swallowed: Drink promptly a large quantity of water. Do not induce vomiting. Never give anything by mouth to an unconscious person. Avoid alcohol. Get medical attention.

If in Eyes: Flush with plenty of water for 15 minutes. Get medical attention.

If on Skin: Immediately brush off excess chemical and flush with plenty of soap and water. Remove contaminated clothing. Wash clothing before reuse. Get medical attention if irritation persists.

If Inhaled: Remove person to fresh air. Get medical attention.

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.

**TO CONTROL THE GROWTH OF
IN RECIRCULATING WATER
POOLS, SPAS, TOILET BO**

FOR INDUSTRIAL/COMMERCIAL RECIRCULATION

This product is intended for use in the following: Water Cooling Systems, Evaporative Cond Exchange Water Systems, Lakes/Ponds/Reservoirs, Industrial Auxiliary Water System Pasteurizer/Warmer/Cannery Cooling Water

This product may be added to the system tablet dissolving devices (feeders, bags, etc.) where the product will be uniformly mixed depend on the severity of contamination.

Intermittent, Slug and Continuous Feed Methods

INITIAL DOSE: When the system is noticed, 1,000 gallons (12 to 60 grams per 1000 lbs) as chlorine, as measured by a suitable test.
SUBSEQUENT DOSE: When microbial count is 1,000 gallons (2.4 to 12 grams per 1,000 lbs) halogen as chlorine, as measured by a suitable test.

FOR POOLS AND SPAS

It is recommended that the pool be stabilized with sunlight on chlorine. Follow the directions on the label. The filter system should be backwashed and cleaned if necessary that the pool be superchlorinated to 1.0 and 3.0 is obtained. The product should be used to assure a consistent treatment level (normally 1-2 oz. per 10,000 gallons per bather load will rapidly reduce chlorine residual). Further adjustments are necessary. A shock treatment should be made during cool weather according to the label for that product. Shock treatment until the chlorine residual is below 1.0.

FOR TOILET BOWLS

When used as directed, this product will keep the bowl clean, clear and free of odor. To Sanitize, Clean and Deodorize: For rim. Cut open package. Do not touch the drop tablet into right rear corner of the toilet. Each tablet sanitizes for fourteen (14) weeks. Compounds. Does not harm plumbing or
