Attention: Ms. Kim Davis

- Subject** Kaput® Combo Bait Mini Blocks for Rodents & Fleas
EPA Reg. No. 72500-14
Compliance with May 28, 2008, Rodenticide Risk Mitigation Decision
Labeling Changes
Your amended application of November 6, 2009
- Purpose** This submission includes revised labels to comply with the Risk Mitigation Decision and to make changes to the warranty, disposal, and other texts, under sec 3 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA).
- Label** The labeling submitted with the above letter, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) is acceptable, provided you submit one (1) copy of final printed labeling to us, with the following change, before you ship your product.
1. Delete "Easy [EZ] to use [Bait] Blocks".
 2. After "3. Dispose ... this label." add the following separate paragraph: "Tamper-resistant bait stations must be used if children, pets, non-target mammals, or birds have access to bait."
 3. In your "Storage and Disposal" section, delete "or, if allowed ... out of smoke). after "by incineration" in both places where the phrase occurs.

Label-continued

- 4. Place your **“FIRST AID”** and **“Note to Physician or Veterinarian”** texts under **“Hazards to Humans and Domestic Animals.”**
- 5. Revise the **“NOTE TO PHYSICIAN OR VETERINARIAN”** section as follows:

TREATMENT FOR PET POISONING

If animal eats bait, call veterinarian or 1-800-xxx-xxxx [optional] at once.

NOTE TO PHYSICIAN OR VETERINARIAN

Contains the anticoagulant Warfarin. If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. For humans or animals ingesting bait and/or showing poisoning signs (bleeding or elevated prothrombin times), give Vitamin K₁.

- 6. Under **“LIMITATION OF LIABILITY”**, delete the 3rd Paragraph (**“USES WITH ... specifically recommended.”**) as this product is never tank mixed.
- 7. Before **“Do not sell this product in individual containers holding less than 4 pounds of bait.”**, wherever it occurs, add **“Do not apply farther than 50 feet from buildings.”**
- 8. Modify the **“Do not use ... endangered rodents.”** text as follows: **“Do not use this product to kill listed species within the ... endangered rodents.”**
- 9. In the **“Environmental Hazards”**, retain the sentence, **“Dogs and other predatory and scavenging mammals and birds might be poisoned if the feed upon animals that have eaten the bait.”**
- 10. Use this text for endangered species: **“Do not use this product to control listed species within the occupied habitats of threatened or endangered species.”**

Terms and Conditions Prohibited for Sale in Stores Oriented towards Residential Consumers: Grocery, Drug, Hardware and Home Improvement. Acceptable for Sale in Stores Oriented toward Agricultural Consumers: Farm Agricultural, Tractor Stores.

Product may not be sold in packaging that holds less than 4 pounds of bait.

Compliance with Risk Mitigation This product is in full compliance with the Agency's revised May 28, 2008 "*Risk Mitigation Decision for Ten Rodenticides*".

Existing stocks Stocks of existing labels of this product may be used until June 11, 2011.

Consequence for non-compliance If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This label must be in the user's possession at the time of product application.

Apply this product only for the sites, pests and application methods specified on this label.

If sufficient quantities of this bait are ingested, the use of this product may aid in the reduction of fleas including, but not necessarily limited to *Xenopsylla cheopis*, that commonly infest listed rodent hosts.

Read This Label:

Read this entire label and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets or other non-target animals to rodenticides. To help prevent accidents:

1. Store product not in use in locations out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife in tamper-resistant bait stations. These stations must be resistant to destruction by children under six years of age and dogs, and

must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hooved livestock, raccoons, bears, other potentially destructive animals or in areas prone to vandalism.

3. Dispose of product container as well as unused, spoiled and unconsumed bait, as specified on this label.

RATS AND MICE

Use Restrictions: Use this product to kill only Norway Rats [*Rattus norvegicus*], Roof Rats [*Rattus rattus*] and House Mice [*Mus musculus*], and to aid in the reduction of their infesting flea populations, in and around non-residential building, industrial/agricultural buildings and similar man-made structure, and inside transport vehicles. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come into direct contact with food. Do not use in edible product areas of feed processing plants, restaurants or other areas where food or feed is commercially prepared or processed. Do not contaminate food/feed or food/feed-handling equipment or place near or inside ventilation duct openings. Do not use this product to control *Peromyscus* spp. mice within the occupied habitats of threatened or endangered *Peromyscus* spp. mice or other types of threatened or endangered rodents. Wear gloves when handling bait or animal carcasses. Do not sell this product in individual containers holding less than 4 pounds of bait.

Selection of Treatment Areas: Determine areas where rodents will most likely find and consume bait. Generally, these areas will be along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors or walls, beside burrow openings and other locations where signs of rodents have been seen. Remove as much alternative food as possible.

Application Directions:

Norway Rats and Roof Rats: Apply 4 to 16 one-ounce bait blocks per bait placement. Space placements at intervals of 15 to 30 feet in infested area. Maintain an uninterrupted supply of fresh bait for at least 10 days or until there no longer are signs of new feeding by rats.

House Mice: Apply 1 one-ounce bait block per placement. Space bait placements at intervals of 8 to 12 feet in infested area. At points of extremely high mouse activity use 2 blocks. Maintain an uninterrupted supply of fresh bait for 15 days or until fresh signs of feeding by house mice cease to appear.

Follow-up (Rats & Mice): Immediately replace contaminated or spoiled bait. While wearing gloves, properly collect and dispose of all dead animals and leftover bait. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation occurs, repeat treatment. Where a continuous source of reinfestation is present, establish permanent bait stations. Regularly check the stations and replace bait as needed.

VOLES

Use Restrictions: Use this product to kill only meadow voles [*Microtus pennsylvanicus*], pine voles [*M. pinetus*] and montane voles [*M. montanus*], and to aid in the reduction of their infesting flea populations, around (usually within 15 feet of) homes, and industrial, commercial, agricultural and similar man-made structures. Do not use this product within the habitat of threatened or endangered rodents. All bait applications must be made by hand. Wear gloves when handling bait or animal carcasses. Do not sell this product in individual containers holding less than 4 pounds of bait.

Selection of Treatment Areas: Determine areas near buildings where voles or signs of vole activity (girdling of plants, consumption of bulbs, burrow openings and surface runways) have been seen. These areas generally will be in flower beds or under shrubs, bushes or ground cover.

Application Directions: Place 1 one-ounce bait block in each bait station. Situate bait stations near runways, burrow openings or plants that voles have been damaging. Check placements daily. Remove any fouled or spoiled bait and replenish if vole activity and interest in bait persist. Maintain an uninterrupted supply of fresh bait for 15 days or until there no longer are signs of vole activity and feeding on bait. While wearing gloves, properly collect and dispose of any carcasses and leftover bait.

Follow-up: At the end of the control program dispose of carcasses and any uneaten bait.

Storage and Disposal

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store in original container in a cool, dry place inaccessible to children and pets. **Pesticide Disposal:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. **Container Disposal:** Non-refillable container; do not reuse or refill this container. Offer for recycling, if available, or reconditioning, if appropriate; otherwise, dispose of empty container in a sanitary landfill; or by incineration; or, if allowed by state and local authorities, by burning (if burned, stay out of smoke).

First Aid

Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact the National Poison Information Center at 1-800-858-7378 for emergency medical treatment information.

If **swallowed**, immediately call a poison control center or doctor for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. If **in eyes**, hold eye open and rise slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

Notice to Physician or Veterinarian

This product reduces the clotting ability of the blood and may cause bleeding. If ingested, administer Vitamin K-1 intramuscularly or orally. Repeat as necessary based on monitoring of prothrombin times.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION

Keep away from humans, domestic animals and pets. Harmful if swallowed because this material may reduce the clotting ability of the blood and cause bleeding. Causes moderate eye irritation. Do not get in eyes or on skin or clothing. Wash arms, hands and face with soap and water after applying and before eating, drinking, chewing gum, using tobacco or using the toilet. Applicators must wear long-sleeved shirt, long pants, socks, shoes and gloves.

Environmental Hazards

This product is highly toxic to aquatic invertebrates and toxic to mammals and birds. Do not apply this product directly to water, to areas where surface water is present or to intertidal areas below the mean high-water mark. Do not contaminate water when disposing of equipment washwaters.

[Attention {Notice}: This product contains a chemical known to the state of California to cause birth defects or other reproductive harm.]
