Dear Ms. Valentine:

Subject: Labeling Amendment to Kaput® Rodent Flea Control Bait to
Remove 6 Month Expiration Date and For Military Use Overseas
EPA Registration No. 72500-17
Submission Date: September 23, 2011

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable. A stamped copy is enclosed for your records. Please submit one (1) final printed copy for the above mentioned label before releasing the product for shipment.

Note: Should you wish to retain a reference to the company's website on your label, please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, **regardless of whether a website is referenced on your product's label**, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance Assurance.

If you have any questions regarding this label, please contact Jennifer Gaines at (703) 305-5967 or via email, gaines.jennifer@epa.gov.

Sincerely yours,

John Hebert

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This label must be in the user's possession at the time of application of this product.

Apply this product only for the sites, pests and application methods specified on this label.

Read this Label:

Read this entire label and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets or other domestic animals to this product. To help prevent accidents:

1. Store product not in use in locations out of reach of children, pets and other animals.
2. Keep pets and livestock out of treated areas until bait has been consumed by the rodents.
3. Dispose of product container, unused, spoiled or unconsumed bait as directed on this label.

Use Restrictions: Use this product to aid in the reduction of flea populations on squirrels of the Genus *Spermophilus* and prairie dogs of the Genus *Cynomys* in parks, golf courses, rangeland, pasture, alfalfa, wheat, oats, barley, fruit tree orchards (dormant season only), non-crop rights-of-way and other non-crop areas. The insecticide in this product acts systemically to aid in the reduction of fleas that commonly infest listed rodents including *Oropsylla idahoensis*, *O. hirsute* and *Hoplopyllus anomalus*. Apply this product only at times of year when these rodents are readily accepting grains. Bait at a time when rain is not expected for at least four days after the time of baiting. Do not apply bait over roads, walkways or water.

Wear gloves when applying bait. With detergent and hot water, wash all utensils used for applying bait. Do not use these utensils for mixing, holding or transferring foods or feeds.

Baiting: Manually scatter 1/2 cup of bait (approximately 2 ounces or 56 grams) on ground near each burrow opening being used by ground squirrels or prairie dogs. Bait spoons, measuring cups or other suitable implements may be used to measure and distribute bait. Re-apply bait to the same area every other day for 3-4 applications. Do not pile the bait; scattering the bait allows the rodents to utilize their natural foraging behavior and limits exposure to livestock and non-target wildlife.

A continuous supply of bait is needed for 6 to 8 days to ensure that all ground squirrels or prairie dogs present have an opportunity to feed on bait for at least 5 consecutive days. Do not exceed the maximum rate of 1/2 cup per application and four applications per burrow.

Storage and Disposal

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store in original container in a cool, dry place inaccessible to children and pets. **Pesticide**

Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. **Container Handling:** {Plastic Buckets} Non-refillable container; do not reuse or refill this container. Offer for recycling, if available, or reconditioning, if appropriate; otherwise, dispose of empty container in a sanitary landfill; or by incineration.

{Plastic Bags} Non-refillable container; do not reuse or refill this container. Completely empty bag then offer for recycling, if available; otherwise, dispose of empty bag in a sanitary landfill; or by incineration.

SUPPLEMENTAL LABELING TO KAPUT® RODENT FLEA CONTROL BAIT (EPA REG.NO. 72500-17)
Use this product to aid in the reduction of *Phlebotomus* Sand Fly Larvae and Fleas associated with host rodents

This bait is not lethal to the rodents
Kills *Phlebotomus* Sand Fly Larvae and Fleas, not the Rodent

This supplemental label is only to aid in the reduction of *Phlebotomus* Sand Fly Larvae and Fleas, and expires on February 17, 2015 and must not be used or distributed after this date.

Keep Out of Reach of Children
CAUTION

(EPA Reg. No. 72500-17

EPA Est. 72500-CO-1)

THIS SUPPLEMENTAL LABELING AND THE PACKAGE LABELING FOR KAPUT® RODENT FLEA CONTROL BAIT (EPA REG. NO. 72500-17) MUST BE IN POSSESSION OF THE USER AT THE TIME OF APPLICATION. READ THIS SUPPLEMENTAL LABEL AND THE PACKAGE LABEL BEFORE APPLYING KAPUT® RODENT FLEA CONTROL BAIT. ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS ON THIS SUPPLEMENTAL LABEL AND ON THE PACKAGE LABEL MUST BE FOLLOWED.

DIRECTIONS FOR USE

Use Restrictions: Use this supplemental label only to aid in the reduction of sand flies and fleas in military installations, activity and training areas, desert areas, and areas where sand flies and fleas are prevalent. The insecticide in this product acts to kill sand fly larvae that feed on feces and other waste materials associated with the host rodent, and acts systemically to kill fleas on host rodent. Apply this product only at times of year when these rodents are readily accepting grains. Bait at a time when rain is not expected for at least four days after the time of baiting. Do not apply bait over roads, walkways or water. Wear gloves when applying bait. With detergent and hot water, wash all utensils used for applying bait. Do not use these utensils for mixing, holding or transferring foods or feeds.

Baiting: Manually scatter 1/2 cup of bait (approximately 2 ounces or 56 grams) in and around burrows being used by field rodents. Bait spoons, measuring cups or other suitable implements may be used to measure and distribute bait. Use a mechanical spreader to broadcast bait on areas less than 10 acres in size. Re-apply bait to the same area every other day for 3 to 4 applications. Do not pile the bait; scattering the bait allows the rodents to utilize their natural foraging behavior and limits exposure to livestock and non-target wildlife.

A continuous supply of bait is needed for 6 to 8 days to ensure that all field rodents present have an opportunity to feed on bait for at least 5 consecutive days.
