DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

(See instructions for Mosquito Magnet® use and replacement.)

(Directions for Octenol Insertion/replacement:)

(Tube Style) (Drop in Style) (Drop in Tube Style)

(Pictures or Illustrations)

1. (Step 1) Peel protective foil cover from Mosquito Magnet® Octenol Biting Insect Attractant.
2. ((Tube Style) (Step 2a) Using a coin, unscrew cover from carrier compartment. This is located inside the black plume chamber.)
 ((Drop in Style) (Step 2b) Locate the round green attractant compartment cap located under the hood and turn to unlock position. Lift off cap to open.)
 ((Drop in Tube Style)(Step 2c) Locate the black plume tube and separate it from the power head. Remove the attractant carrier located inside the plume chamber.)
3. ((Tube Style) (Step 3a) Slide Mosquito Magnet® Octenol Biting Insect Attractant into the carrier compartment.
 ((Drop in Style) (Step 3b) Place opened cartridge inside the compartment's center delivery tube.)
 ((Drop in Tube Style) (Step 3c) Slide the opened cartridge face down into the carrier's retaining rails. The cartridge will lock into place with a click.)
4. ((Tube Style) (Step 4a) Reverse step two to close carrier compartment.)
 ((Drop in Style) (Step 4b) Replace the attractant compartment cap and turn clockwise to the locked position.)
 ((Drop in Tube Style) (Step 4c) Place the carrier into the plume tube with the fins down. Re-insert the plume tube into the power head's trumpet.)

(Statement and footnote to be located either on front panel or in Directions for Use)
 Replace cartridge every 21 days.* (Note: After 21 days of use the cartridge appears the same; however, it will no longer be effective as the octenol will have been released.)

* Based on release rate studies conducted at a constant ambient air temperature of 80°F for 21 days. Octenol release from this product will be more rapid at higher ambient air temperatures.
