Subject: Revised Label
Baquacil® Swimming Pool Sanitizer and Algistat
EPA Registration Number 72674-19
Application Dated November 8, 2001

Dear Dr. Burt:

The amendment referred to above, submitted in connection with registration under of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), is acceptable with the following comments:

Proposed amendment:

- add additional EPA Establishment number to the master label
- "If lot # contains a B, EPA Est. No. is 4091-TN-3"

General comments:

The following label revisions must be made:

1. The signal word warning must be place below the "Keep Out Of Reach Of Children" statement.
2. The Ingredient Statements must "TOTAL...100%.
3. Change the heading "Statement of Practical Treatment" to read; "First Aid" on label. In addition, the first aid statement must be revised in accordance with PR Notice 2001-1.

CONCURRENCES

SYMBOL	7510C						
SURNAME	[Signature]						
DATE	3-5-02						

4. Add the sub-header "Warranty Statement" above the warranty statement.

Submit three (3) copies of your final printed labeling. A copy will be stamp accepted and return for your record.

Should you have any questions, or comments, please contact me at (703) 308-6422 or LaVerne Dobbins at (703) 308-6378.

Sincerely,

Adam Heyward
Product Manager (34)
Regulatory Management Branch II
Antimicrobials Division (7510C)

Enclosure:

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner other than for which it was intended.

TREATING THE POOL

POOLS PREVIOUSLY TREATED WITH CHLORINATING CHEMICALS (important - BAQUACL SWIMMING POOL SANITIZER AND ALGISTAT ("BAQUACL SANITIZER") is incompatible with chlorinating chemical products. Consult your Authorized Dealer of BAQUACL for information on balancing your pool water. Note: If the pool is a plaster pool, add 1 1/2 lbs. of BAQUACL METAL CONTROL per 10,000 gallons after the chlorine has been neutralized, and allow pump/filtration to operate for 8-12 hours.

Check with chlorine test kit for free and combined chlorine prior to the beginning of neutralization. To destroy chlorine, add BAQUACL CHLORINE NEUTRALIZER per label directions or add 1 gallon of BAQUACL SHOCK AND OXIDIZER (27% hydrogen peroxide) per 10,000 gallons of pool water. Filter overnight. Check with chlorine test kit. If free chlorine is detected, repeat neutralizer treatment.

FRESHLY FILLED AND DECHLORINATED POOLS

START UP WITH BAQUACL

Note: If the pool water contains algae or is hazy, consult the problem-solving section of "The Pool Care Guide for BAQUACL," available from your Authorized Dealer of BAQUACL.

Backwash or clean pool filter. Check pool pH; adjust to 7.2-7.8.

If necessary:

Add BAQUACL SANITIZER to give a content of 50 ppm (1/2 gallon product/10,000 gallons of pool water).

After 24 hours, check pH and BAQUACL SANITIZER concentration with BAQUACL TEST STRIPS and adjust if necessary.

NORMAL POOL ROUTINE

Every week, check BAQUACL SANITIZER concentration and pH. Maintain BAQUACL SANITIZER concentration at about 50 ppm. If concentration falls 10 ppm or more, add a top-up dose. The level should not be allowed to drop below 30 ppm. For example, to raise the BAQUACL SANITIZER level 10 ppm, add 1 pint per 10,000 gallons of water. Consult the booklet, "The Pool Care Guide for BAQUACL," for calculation instructions.

NOTE: BAQUACL SANITIZER AND CHLORINE ARE INCOMPATIBLE. Refer to "The Pool Care Guide for BAQUACL" for information on how to deal with accidental chlorination.

PROBLEM-SOLVING AND SUPPLEMENTAL POOL INFORMATION

Do not use in freestanding spas/hot tubs. Do not use in unpainted plaster pools previously exposed to metals which may cause staining. (See current "Pool Care Guide" for specific information.) BAQUACL is not compatible with many detergents and some supplemental algaecides (such as those based on copper).

If algae development, cloudiness, or pool problems occur or additional information on water quality is desired, consult "The Pool Care Guide for BAQUACL," available from your Authorized Dealer of BAQUACL.

STORAGE AND DISPOSAL

PESTICIDE DISPOSAL

Keep container closed when not in use. Store in original container in an area inaccessible to children.

PROTECT FROM FREEZING

In case of a leak or spill, soak up with absorbent, such as sand, earth, or sawdust, and shovel into waste container. Remove waste to chemical waste area, and dispose of in accordance with local pollution regulations.

To dispose of excess product, securely wrap original container in several layers of newspaper and discard in trash.

CONTAINER DISPOSAL

Do not reuse container. To dispose of empty container, rinse thoroughly before discarding in trash.
