PRECAUTIONARY STATEMENTS, HAZARDS TO HUMANS AND DOMESTIC ANIMALS.

WARNING

**CAUSES SUBSTANTIAL BUT TEMPORARY EYE INJURY.
HARMFUL IF SWALLOWED.**

Do not get concentrate in eyes or on clothing. Avoid contact with skin. Avoid breathing vapor or mist. Wash thoroughly with soap and water after handling. Wear goggles or face shield when handling concentrate. Keep container closed. May cause allergic skin reactions.

2

FIRST AID	
IF IN EYES	<ul style="list-style-type: none"> Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
IF ON SKIN OR CLOTHING	<ul style="list-style-type: none"> Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
IF SWALLOWED	<ul style="list-style-type: none"> Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
<p>MEDICAL EMERGENCY INFORMATION CENTER 1-800-286-7850</p> <p>Have the product container or label with you when calling a poison control center or doctor, or going for treatment.</p>

DIRECTIONS FOR USE

Application of federal law to use this product in a manner other than which it was intended. BAQUACIL can be used in both residential and public swimming pools and spas.

TREATING POOL

POOLS PREVIOUSLY TREATED WITH CHLORINATING CHEMICALS Important - BAQUACIL SWIMMING POOL SANITIZER AND ALGISTAT ("BAQUACIL SANITIZER") is incompatible with chlorinating chemical products. Consult your Authorized Dealer of BAQUACIL for information on balancing your pool water. Note: If the pool is a plaster pool, add 1 1/4 lbs. of BAQUACIL METAL CONTROL per 10,000 gallons after the chlorine has been neutralized, and allow pump/filter to operate for 8-12 hours.

Check with chlorine test kit for free and combined chlorine prior to the beginning of neutralization. To destroy chlorine, add BAQUACIL CHLORINE NEUTRALIZER per label directions or add 1 gallon of BAQUACIL SHOCK AND OXIDIZER (27% hydrogen peroxide) per 10,000 gallons of pool water. Filter overnight. Check with chlorine test kit if free chlorine is detected, repeat neutralizer treatment.

FRESHLY FILLED AND DECHLORINATED POOLS**START UP WITH BAQUACIL**

Note: If the pool water contains algae or is hazy, consult the problem-solving section of "The Pool Care Guide for BAQUACIL," available from your Authorized Dealer of BAQUACIL.

- Backwash or clean pool filter. Check pool pH, adjust to 7.2-7.8 if necessary.
- Add BAQUACIL SANITIZER to give a content of 50 ppm (1/2 gallon product/10,000 gallons of pool water).
- After 24 hours, check pH and BAQUACIL SANITIZER concentration with BAQUACIL TEST STRIPS and adjust if necessary.

NORMAL POOL ROUTINE

- Every week, check BAQUACIL SANITIZER concentration and pH.
- Maintain BAQUACIL SANITIZER concentration at about 50 ppm. If concentration falls 10 ppm or more, add a top-up dose. The level should not be allowed to drop below 30 ppm. For example, to raise the BAQUACIL SANITIZER level 10 ppm, add 1 pint per 10,000 gallons of water. Consult the booklet, "The Pool Care Guide for BAQUACIL," for calculation instructions.

NOTE: BAQUACIL SANITIZER AND CHLORINE ARE INCOMPATIBLE. Refer to "The Pool Care Guide for BAQUACIL" for information on how to deal with accidental chlorination.

TREATING KIDDIE POOLS

1. Fill the pool with fresh water.
2. Add a dose of BAQUACIL SANITIZER. Use the chart below to calculate how much to add.
3. After one minute, test the water with BAQUACIL TEST STRIPS. The color should be in the "OK" range.
4. After one week, drain or discard the water from the pool, scrub poolslides lightly with a soft cloth, rinse the pool and refill with fresh water. Add a fresh dose of BAQUACIL SANITIZER.

Amount of BAQUACIL SANITIZER to Add

Pool volume in gallons	BAQUACIL SANITIZER in teaspoons	BAQUACIL SANITIZER in tablespoons	BAQUACIL SANITIZER in ounces
25	1	1/3	1/6
75	3	1	1/2
100	4	1 1/3	2/3
150	6	2	1
200	8	2 2/3	1 1/3
250	10	3 1/3	1 2/3
300	12	4	2
350	14	4 2/3	2 1/3

NOTES

1. Grass and soil in the pool will make water cloudy. Minimizing the amount of soil and grass in the pool will help the water to remain clean and reduce the number of refills.
2. Heavy rain may dilute the sanitizer and allow bacteria to grow. After a heavy rain check the sanitizer concentration with BAQUACIL TEST STRIPS. If the pool is still clear but the Test Strip reads "Add", add 1/2 standard dose of sanitizer. Test water with test strip to ensure that sanitizer is within range. If the water is cloudy after a rain you should drain the pool and refill with fresh water.
3. If the water becomes cloudy, drain the pool and refill with fresh water.

PROBLEM-SOLVING AND SUPPLEMENTAL POOL INFORMATION

Do not use in freestanding spas/hot tubs. Do not use in unpain plaster pools previously treated with metals which may cause staining. (See current "Pool Care Guide" for specific information.) BAQUACIL is not compatible with many detergents and some supplemental algaecides (such as those based on copper).

If algae development, cloudiness, or pool problems occur or additional information on water quality is desired, consult "The Pool Care Guide for BAQUACIL," available from your Authorized Dealer of BAQUACIL.

TREATING SPAS OR HOT TUBS

Important - BAQUACIL SANITIZER is incompatible with chlorinating and brominating chemical products.

Start Up with BAQUACIL SANITIZER:

1. Remove chlorine or bromine source and disconnect feeder. Discontinue use of ionizers and electrochlorinators if present.
2. Drain existing water in spa.
3. Clean spa surface and filter.
4. Fill spa with water.
5. Have your Authorized Dealer of BAQUACIL SANITIZER check your water for proper water balance.
6. After water has been balanced, add BAQUACIL SANITIZER to give a concentration of 50 ppm (1 oz. of product per 150 gallons of spa water).
7. Circulate water for 30 minutes, then check BAQUACIL SANITIZER concentration with BAQUACIL TEST STRIPS and adjust if necessary.

NORMAL SPA MAINTENANCE

1. Every week, check BAQUACIL SANITIZER concentration and pH. Adjust if necessary.
2. The level of BAQUACIL SANITIZER should be maintained between 30 and 50 ppm. When the level of BAQUACIL SANITIZER is 30 ppm or less, add enough BAQUACIL SANITIZER to bring the level up to 50 ppm. The spa's level of BAQUACIL SANITIZER should never be allowed to drop below 30 ppm. To raise the BAQUACIL SANITIZER level 10 ppm, add 0.2 oz. per 150 gallons of spa water.

TREATING POOLS ON THE BAQUACIL AUTOMATED DOSING SYSTEM START-UP

1. Unscrew the child resistant cap (keep this cap for the possible off-season storage of chemical) and connect to appropriate feed line for the automated system.
2. BAQUACIL Automated Dosing System will deliver an initial dose of 54 oz. per 10,000 gallons to the pool water to obtain an initial reading of 50 ppm.
3. After about 24 hours, take a water sample to your Authorized BAQUACIL Dealer for complete water analysis.

NORMAL POOL MAINTENANCE

1. Once a week, check the BAQUACIL SANITIZER concentration, using the BAQUACIL TEST STRIPS.
2. To insure proper sanitization and protection, maintain your BAQUACIL SANITIZER concentration level between 30 - 50 ppm.
3. Once a month take a water sample to your Authorized BAQUACIL Dealer for complete water analysis.

END OF SEASON

Disconnect BAQUACIL SANITIZER container from system and replace child resistant cap. Store in a cool place, in upright position, away from direct sunlight and out of reach of children.

STORAGE AND DISPOSAL

PESTICIDE DISPOSAL: Keep container closed when not in use. Store in original container in an area inaccessible to children.

PROTECT FROM FREEZING

In case of a leak or spill, soak up with absorbent, such as sand, earth, or sawdust, and shovel into waste container. Remove waste to chemical waste area, and dispose of in accordance with local pollution regulations. To dispose of excess product, securely wrap original container in several layers of newspaper and discard in trash.

CONTAINER DISPOSAL

Do not reuse container. To dispose of empty container, rinse thoroughly before discarding in trash. FOR INFORMATION ON SPILLS, CALL 1-800-424-2466
