**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

**FOR SWIMMING POOL DISINFECTANT**

When used as directed, this product is effective as a swimming pool water disinfecting agent.

**DIRECTIONS FOR USE**

Ensure all pool equipment is working properly. Backwash the filter system following manufacturer's directions. Adjust pH to between 7.2-7.6. Add stabilizer to establish a minimum level of 30-40 ppm to reduce degradative effects of sunlight upon the chlorine residual. Check for metals. Before using this product, add Pool Breeze® Metal Removing Agent to prevent staining of pool surface due to metals. When using other products as outlined in the directions for this product, always follow directions on those products.

With pump running, place one (1) tablet per 10,000 gallons pool water every week into a suitable feeder like a floating dispenser or directly into a skimmer basket or automatic chlorinator. Repeat additions until a residual of 1-3 ppm chlorine is established as determined by the use of a test kit. Regular use of a test kit is necessary to determine when it is necessary to add another dose of this product to maintain a residual of 1-3 ppm available chlorine in the pool water. After use of this product it is recommended that a preventative algae treatment be added on a weekly basis.

**OPENING YOUR POOL**

Balance pool water, shock treat, and stabilize your pool using Pool Breeze® Stabilizer. Then follow "Routine Chlorination" directions.

**HOW TO CALCULATE POOL CAPACITY**

Use measurements in feet only.

Rectangular—length x width x average depth x 7.5 = total gallons

Circular—diameter x diameter x average depth x 5.9 = total gallons

Oval with straight sides—full width x full length x average depth x 6.7 = total gallons

Irregular—consult pool builder

**REENTRY**

Reentry into treated swimming pools is prohibited above levels of 3ppm of chlorine due to risk of bodily injury.
