DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. This product is designed to dissolve slowly providing a steady source of available chlorine in swimming pools to control the growth of algae, kill bacteria and destroy organic contaminants.

READ THE PRECAUTIONARY STATEMENTS BEFORE USE. One tablet will provide an effective chlorine residual of 1-3 parts per million (ppm) in 20,000 gallons of pool water for up to 2 weeks under normal use conditions. Use only in skimmers or feeders made specifically for this size tablet.

- (1) Adjust pH to the ideal range of 7.2 - 7.6
- (2) Bring chlorine residual to 1 - 3 ppm using appropriate chlorine shock product. Follow label instructions.
- (3) Stabilize the pool with cyanuric acid. Follow label instructions.
- (4) Ensure that the skimmer basket is free of any other chemicals, tablets or residue prior to use. Place this product in the skimmer basket. This product is not recommended for use in vinyl lined pools without an automatic timer on the pool pump. Pump should run a minimum of 8 hours per day, otherwise vinyl liner damage may occur. If chlorine residual

goes above 3 ppm, reduce skimmer flow rate of daily pump operation time. If chlorine residual goes below 1 ppm, increase skimmer flow rate or daily operation time. Shock treat weekly or every other week with appropriate shock treatment. Follow label directions. Do not reenter pool until chlorine residual is 1 - 3 ppm. When the plastic sleeve is empty remove it from the pool skimmer, and replace it with a new tablet.

- (5) DO NOT add other chemicals to the skimmer while this product is in the skimmer. DO NOT mix pool chemicals.
