**DIRECTIONS FOR USE:**

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

**FOR INITIAL APPLICATION IN POOLS SANITIZED WITH BRILLIANCE™ FOR POOLS OR POOL BREEZE® PRODUCTS:**

Backwash and clean filter. Balance your pool water and adjust pH between 7.2 - 7.6. Add 2 lbs. of ENDURE per 1,000 gallons of pool water by broadcasting the product over the surface of the pool with the pump running. This initial treatment should be added in three doses with one third of the required amount being added each application. Brush any undissolved product from the bottom of the pool. The pH of the pool water will rise as a normal reaction to the introduction of ENDURE. One hour after each application, adjust the pH to 7.2 - 7.6 with pH deceiver, according to label directions. Allow at least 8 hours between the applications of ENDURE. Do not add additional product until the pH is between 7.2 - 7.6 (NOTE: For every 2 pounds of ENDURE, approximately 1 pound of pH deceiver will be required for pH adjustment). Within 10 days, take a water sample to your dealer to test for water balance and to determine if an adequate amount of this product has been added.

**FOR INITIAL APPLICATION IN POOLS SANITIZED WITH BAQUACIL® POOL CARE SYSTEM:**

Backwash and clean filter. Balance your pool water and adjust pH between 7.2 - 7.6. Add 4 lbs. of ENDURE per 1,000 gallons of pool water by broadcasting the product over the surface of the pool with the pump running. This initial treatment should be added in three doses with one third of the required amount being added each application. The pH of the pool water will rise as a normal reaction to the introduction of this product therefore, one hour after each application, adjust the pH to 7.2 - 7.6 with pH deceiver, according to label directions. Allow at least 8 hours between the applications of ENDURE. Do not add additional ENDURE until the pH is between 7.2 - 7.6 (NOTE: For every 2 pounds of ENDURE, approximately 1 pound of pH deceiver will be required for pH adjustment). Within 10 days, take a water sample to your dealer to test for water balance and to determine if an adequate amount of this product has been added.

**FOR MAINTENANCE APPLICATION:**

This product is stable in pool water and not degraded by sunlight. The primary loss of product is through splash-out, backwashing and dilution from heavy rains. Therefore, once the initial application is made, minor and infrequent additions would be all that is required unless a substantial amount of water is drained from the pool.

**STORAGE AND DISPOSAL:**

Do not contaminate water, food or feed by storage or disposal. Keep this product dry in original tightly closed container until use. Store in a cool, dry, well ventilated area away from heat or open flame. Do not reuse container, but place in trash collection. Rinse thoroughly before discarding in trash. Do not store where children or animals may gain access.

**PHYSICAL OR CHEMICAL HAZARDS:**

Do not mix with other chemicals. Do not add through skimmer. Do not add to any dispensing device.

**ENVIRONMENTAL HAZARDS:**

Keep out of lakes, ponds or streams. Do not contaminate water by cleaning of equipment or disposal of wastes.

IN CASE OF MEDICAL EMERGENCY, CALL 1-800-286-7850.
