U.S. ENVIRONMENTAL PROTECTION AGENCY
Office of Pesticide Programs
Biopesticides and Pollution Prevention Division (7511P)
1200 Pennsylvania Avenue NW
Washington, DC 20460

EPA Reg. Number:
72898-3

Date of Issuance:
6/26/09

Term of Issuance:

Conditional, Time-Limited

Name of Pesticide Product:

Virosoft^{CP4}

NOTICE OF PESTICIDE:

Registration
 Reregistration
(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

BioTEPP Incorporated
c/o Ms. Kathy A. Bolan
575 Viewridge Drive
Angwin, CA 94508

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Biopesticides and Pollution Prevention Division prior to use of the label in commerce. In any correspondence on this product, always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

The registration application referred to above, submitted in connection with registration under Section 3(c)(7)(A) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable provided that you do the following terms and conditions:

1. The subject registration will automatically expire on midnight December 31, 2009.
2. The subject registration is limited solely to distribution or sale of existing stocks of a previously registered product, EPA Registration Number 72898-2. Prior to sale or distribution, these existing stocks (either currently in the possession of the registrant or its distributors) must bear the appropriate label as approved in conjunction with this registration issuance. Manufacturing of additional or new product under this registration, for the eventual purposes of sale or distribution, is prohibited.

-Continued on Page 2-

Signature of Approving Official:

JLA see next page
Janet L. Andersen, Ph.D., Director
Biopesticides and Pollution Prevention Division

Date:

6/26/09

3. Make the following modification to the label approved in conjunction with this registration issuance before it is applied to existing stock to be distributed or sold:

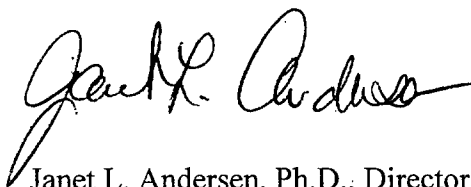

Change "EPA Reg. _____" to "EPA Reg. No. 72898-3."

4. Submit and/or cite all data required for registration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
5. Submit two (2) copies of the final printed labeling before any existing stock is distributed or sold. Refer to the A-79 enclosure for further description of a final printed label.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely,

Janet L. Andersen, Ph.D., Director
Biopesticides and Pollution
Prevention Division (7511P)

Enclosures (2):
- Virosoft^{CP4} Accepted Label
- A-79 Enclosure

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in any manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the State or Tribal Agency responsible for pesticide regulation. Do not apply this product through any type of irrigation system.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 4 hours.

PPE required for early entry to treated areas (that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water), is:

- Protective eyewear such as goggles, face shield, or shielded safety glasses
- Waterproof gloves
- Coveralls
- Shoes plus socks

VIROSOFT^{CP4} is a biological insecticide containing *Cydia pomonella* Granulovirus. Virus particles must be ingested by larvae to be effective. Timing applications, so that early-instar larvae on the surface of the leaf or fruit come in contact with the virus before entering the fruit, will ensure maximum effectiveness.

Dilute **VIROSOFT^{CP4}** at the rate of 2 fluid ounces per acre in the amount of water needed to treat 1 acre. In orchards with high codling moth populations, application rates of up to 3.2 fluid ounces of **VIROSOFT^{CP4}** per acre provide the best protection. Apply diluted **VIROSOFT^{CP4}** with jet or conventional sprayers prior to egg hatching and thereafter another 3 times in 2-week intervals for a total of 2 applications per generation. To avoid direct exposure to sunlight, apply this product in late afternoon or on a cloudy day.

Avoiding spray drift at the application site is the responsibility of the applicator. The interaction of many equipment- and weather-related factors determine the potential for spray drift. The applicator and the grower are responsible for considering all of these factors when making decisions.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store unused product in original container away from children and direct sunlight. For long-term storage, product is best kept frozen. For short-term storage (up to 4 months), product can be stored at room temperature. Keep open bottles refrigerated or frozen.

PESTICIDE DISPOSAL: To avoid wastes, use all material in this container by application according to label directions. If wastes cannot be avoided, offer remaining product to a waste disposal facility or pesticide disposal program (often such programs are run by state or local governments or by industry).

CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container ¼ full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration. Do not burn, unless allowed by state and local ordinances.

VIROSOFT^{CP4}

BIO-Insecticide for Codling Moth on apple, pear, plum, prur walnut trees

ACTIVE INGREDIENT*:

Cydia pomonella Granulovirus.....

OTHER INGREDIENTS:

Total.....

* Contains 4.23x10¹³ viral occlusion bodies (Obs.) per Quart

**KEEP OUT OF REACH OF CHILDREN

FIRST AID STATEMENT

IF IN EYES:

- Immediately hold eyes open, slowly and gently rinse 15-20 minutes. If wearing contact lenses, remove contact lenses, and continue rinsing.
- Contact a poison control center or doctor for treatment

IF ON SKIN OR CLOTHING:

- Remove contaminated clothing.
- Immediately rinse skin for 15-20 minutes using plenty of water.
- Contact a poison control center or doctor for treatment

HOT LINE NUMBER: Have the product container or label with you when you call a poison control center or doctor, or going for treatment. For emergency use in this product, call the **National Pesticides Information Center** at 1-800-858-6383, 6:30AM to 4:30PM Pacific time (PT), seven days a week. During other times, call your local poison control center at 1-800-222-1222.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Wear protective eyewear such as goggles, face shield, or shielded safety glasses. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.

Personal Protective Equipment (PPE)

- Applicators and other handlers must wear:
- Protective eyewear such as goggles, face shield, or shielded safety glasses
 - Waterproof gloves
 - Long-sleeved shirt and long pants
 - Shoes and socks

Mixers/loaders and applicators must wear a dust/mist filtering respirator meeting NIOSH standards of at least N-95, R-95, or P-95. Repeated exposure to high concentrations of microbial proteins can cause allergic sensitization.

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

Engineering Controls

When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR § 170.240(d)(4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

IMPORTANT: When reduced PPE is worn because a closed system is being used, handlers must be provided all PPE specified above for "applicators and other handlers" and have such PPE immediately available for use in an emergency, such as a spill or equipment break-down.

USER SAFETY RECOMMENDATIONS

- User should
- Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
 - Remove PPE immediately after handling this product. Wash the outside of the gloves before removing them. As soon as possible, wash thoroughly and change into clean clothing.

Environmental Hazards

For terrestrial uses: Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark.

Do not contaminate water when cleaning equipment or disposing of equipment washwater or rinsate.
