

T535

Conditioner for bacterial sensitive flowers

T535 checks the processes in the flower stem that cause vascular plugging. It gives proper control over microbial growth. As a result water uptake is activated, thus preventing premature wilting and considerably improving the inner quality of flowers.

ACTIVE INGREDIENTS:

Bronopol 0.446%

Poly(Iminoimidocarbonyliminoimidocarbonyliminohexamethylene)

Hydrochloride... .. 0.468%

INERT INGREDIENTS: 99.086%

Total 100.00%

KEEP OUT OF REACH OF CHILDREN

DANGER

FIRST AID	
If swallowed	-Call a poison control center or doctor immediately for treatment advice. -Have a person sip a glass of water if able to swallow. -Do not induce vomiting unless told to do so by a poison control center or doctor. -Do not give anything by mouth to an unconscious person.

Do not contaminate water, food, or feed by storage and disposal.

Pesticide Storage: Store in a cool place away from direct sunlight. Do not store below 41°F.

Pesticide Disposal: Securely wrap original container in several layers of newspaper and discard in trash.

Pesticide Container: Do not reuse container. Rinse thoroughly before discarding in trash.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

T535 is for use on all non-Ethylene sensitive flowers. T535 checks the processes in the flower stem that cause vascular plugging. It gives proper control over microbial growth. As a result water uptake is activated, thus preventing premature wilting and considerably improving the inner quality of flowers.

Dosage: 2 ml per quart (1 liter) of water. The screw-cap is 60 ml, good for 12 liters (3.2 gallons) of ready-to-use solution. The pH of the solution should drop between 4 and 5. If this is not the case, increase the dosage to a maximum of 10 ml per quart (1 liter).

Directions:

- **Treatment time:** Put the flowers in the solution right after cutting. Do not hydrate with water first. Treatment time is 4 to 24 hours.
- **Active life of the solution:** The maximum active life of the solution is one week. Residual solutions, if any, should not be added to newly made solutions
- **Notice:** Cleanliness during the treatment contributes to a maximum action of the product. Clean buckets thoroughly before use.

Note: Store in a safe place away from children and pets. Keep away from edibles, drinks and animal feed. When preparing the solution wear suitable gloves and eye protection. Store in a cool place, away from direct sunlight.

Acidity: Use in contact with this acid solution only acid-proof pumps; pipes, hoses unprotected ferrous metal (zinc, copper, iron).

Storage life: 18 months in sealed packaging.
