DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Confine the use of this product in food processing plants to time periods when the plant is not in operation. Cover or remove food during treatment. Cover all food processing surfaces during treatment or thoroughly wash with an effective cleaning compound followed by a potable water rinse before using.

For maximum effectiveness, a combination of localized application and space treatment is recommended. When diluting with water, prepare only the amount needed for immediate use. Holding a water dilution more than 24 hours is not recommended. Agitate occasionally. For oil dilutions, a deodorized petroleum oil is recommended.

AS A SURFACE SPRAY: For initial clean up of severe insect infestations, dilute at the rate of 1 part concentrate in 4 parts water or oil. This dilution may not be used in edible product areas of Federally inspected meat and poultry plants. In these plants and in other areas for normal infestations, dilute 1 part concentrate in 9 parts water or oil.
