Office of Pesticide Programs  
 Registration Division (H7505C)  
 401 "M" St., S.W.  
 Washington, D.C. 20460

## NOTICE OF PESTICIDE:

Registration  
 Reregistration

(under FIFRA, as amended)

EPA Reg.  
Number:

73079-7

Date of Issuance:

MAR 26 2007

Term of Issuance:

Conditional

Name of Pesticide Product:

Intice Liquid Bait

Name and Address of Registrant (include ZIP Code):

Rockwell Labs Ltd  
 1512 Taney Street  
 North Kansas City, MO 64116

**Note:** Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit the following data:  
 One year Storage Stability (830.6317) and Corrosion Characteristics, (830-6320) studies. These studies are due to the within 18 months from the date on initial registration for this product.

Signature of Approving Official:

Richard J. Gebken  
 Product Manager  
 Insecticide Branch/Registration Division

Date:

MAR 26 2007

2. Make the following label changes:

- Revise the EPA Registration Number to read EPA Reg. No. 73079-7.
- You have not submitted data to support Carpenter Ants, Fire Ants, Pharaoh Ants and Harvester Ants claims. On page one and page two revise the claims "Attracts and Kills All Common Household Ants" to read: "Attracts and Kills Common Ants Except Pharaoh Ants, Carpenter Ants, Fire Ants & Harvester Ants."
- Revise the ingredient statement and align it by the decimal point as follows:

Active Ingredient: Sodium Tetraborate Decahydrate	5.0%
Other Ingredient	95.0%
Total	100.0%

\*(Borax)

- Revise the Net Contents as follows: Net Contents: 4 fl oz, 16 fl oz or 128 fl oz (One Gallon)
- Revise the Precautionary Statements to read:  
"Harmful if swallowed or absorbed through the skin. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco."
- Revise the First Aid Statement to read as follows:
- If Swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.  
Have the product container or label with you when call a poison control center or doctor or going for treatment. You may also contact 1-800-858-7378 for emergency medical treatment information.
- Outdoor Use requires an Environmental Hazards Statement. Therefore, the following statement must be added to your product labeling:  
Environmental Hazards

Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high-water mark. Do not contaminate water when disposing of equipment washwaters or rinsate.

- Under the Directions For Use delete the heading "Application Directions" and revise the rest of the directions to read as follows:

**Use Restrictions:**

**DO NOT USE** in edible product areas of food handling establishments, restaurants or other areas where food is commercially prepared or processed.  
Do not use in serving areas where food is exposed.  
Do not contaminate feed and food stuffs.  
Place bait in areas inaccessible to children and pets.

**Indoor Use**

**Attracts and Kills:** the following common ants:  
Argentine ants, ghost ants, cornfield ants, pavement ants, acrobat ants, white footed ants, little black ants, odorous house ants, crazy ants, big headed ants, and other sweet feeding ants except pharaoh, carpenter, fire and harvester ants.

**For Use in and Around:** Homes, hospitals, restaurants, apartments, grocery stores, institutional buildings, schools, cafeterias, warehouses, storage areas, food processing plants, mobile homes, boats, military bases, theaters, nursing homes, and on military, commercial, and cruise ships.

**Controlling and Eliminating Ants:** First ants will come in large numbers, but soon disappear. This product is formulated to allow worker ants to consume the product and survive long enough to carry the liquid back to the nest and deliver a dose to the rest of the colony. Monitor the placements and ensure there is always a fresh supply of In Tice Liquid Bait at each placement. Complete control may take up to two weeks.

**Using InTice Bait in Bait Plate Stations:** This package contains In Tice Liquid Bait and Bait Plate Stations. Fill the Bait Plate Stations half full with In Tice Liquid Bait and place them, out of reach of children and pets, on a flat surface close to areas where ants are seen foraging or nesting. As the ants begin to feed on the bait you will notice many ants inside and around the opening to the Bait Plate Station. If the ants consume the entire bait, simply refill the Bait Plate Station.

**Using InTice Liquid Bait:** Apply the product to small pieces of cardboard, paper or foil, or in purpose built bait stations and place product in inaccessible areas where ants are seen, such as the edge of sinks, tubs,

window sills, under food cabinets, along floors and base boards and in corners. Use plenty of bait placements, the more bait placements the better. Since invading ants usually have outdoor nesting sites, it often helps to put the product outside, close to where ants are found entering the structure. Ants typically follow defined trails from the nest to food or water. Placing In Tice Bait close to these trails will improve control.

#### Outdoor Use

**Using InTice Liquid as a Perimeter Ants Defense System:** Locate areas around the building where ants are seen trailing. Place the bait stations against the foundation where the trails are found. Spacing the bait stations every 5 to 10 feet will provide the best results. Check the bait stations regularly for activity. Remember ants will feed on InTice Liquid Bait and carry the bait back to the rest of the colony. Heavy infestations may require several bait placements refills and up to two weeks for control.

InTice Liquid Bait can be diluted with water to obtain a 1% or 2.5% solution of Borax. Such a dilution is helpful when a substantial volume of In Tice Liquid Bait is need in a baiting program design to control very large multi-queen and multi-colony ant infestations.

1% Dilution 1 part InTice Liquid Bait to 4 parts water. Mix thoroughly

2.5% Dilution: 1 part InTice Liquid Bait to 1 part water. Mix thoroughly.

**Using InTice Liquid Bait in Bait Stations:** Apply the 1% or 2.5% InTice Liquid Bait solution using stations designed to hold bait. This product will work well in Rockwelll's BaitPlate, D-Sect PFT stations( Sold separately).

- Delete reference to website or submit website information as an amendment to the label.
- Revise the last sentence of the Warranty and Disclaimer Statement to read as follows:  
To the extent consistent with applicable law, the manufacturer shall not be liable for any consequential damages based on the use of this product.

3. Submit two copies of the final printed label for the record.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely yours,

Richard J. Gebken

## KEEP OUT OF REACH OF CHILDREN CAUTION

### PRECAUTIONARY STATEMENTS

**Hazards to Humans and Domestic Animals:** **CAUTION:** May be harmful if swallowed.

**First Aid: If Swallowed:** Call a doctor or poison control center for treatment advice. If more than a teaspoon is swallowed, drink 1 to 2 glasses of water and induce vomiting by touching back of throat with finger. If person is unconscious, do not give anything by mouth and do not induce vomiting.

Have the product or label with you when calling a Poison Control Center or doctor or going for treatment. In case of emergency, for additional information call **800 858 7378**.

ACCEPTED  
with COMMENTS  
In EPA Letter Dated:

MAR 26 2007  
Under the Federal Insecticide,  
Fungicide, and Rodenticide Act,  
as amended, for the pesticide  
registered under EPA Reg. No.  
73079-7

## DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

### Application Directions

**For Use in and Around:** Homes, hospitals, restaurants, apartments, grocery stores, institutional buildings, schools, cafeterias, warehouses, storage areas, food processing plants, mobile homes, boats, military bases, theaters, nursing homes, and on military, commercial, and cruise ships.

**Attracts and Kills All Common Household Ants Including:** Argentine ants, ghost ants, cornfield ants, pavement ants, acrobat ants, white footed ants, little black ants, odorous house ants, crazy ants, big headed ants, and other sweet feeding ants.

**Using InTice Liquid Bait:** Apply the product to small pieces of cardboard, paper or foil, or in purpose built bait stations and place product where ants are seen, such as the edges of sinks, tubs, window sills, under food cabinets, along floors and base boards and in corners. Use plenty of bait placements, the more bait placements the better. Since invading ants usually have outdoor nesting sites, it often helps to put the product outside, close to where ants are found entering the structure. Ants typically follow defined trails from the nest to food or water. Placing InTice Liquid Bait close to these trails will improve control.

**Controlling and Eliminating Ants:** First ants will come in large numbers, but soon disappear. This product is specifically formulated to allow worker ants to consume the product and survive long enough to carry the liquid back to the nest and deliver a dose to the rest of the colony. The key to obtaining effective control is to monitor the placements and ensure there is always a fresh supply of InTice Liquid Bait at each placement. Complete control may take up to two weeks.

**Using InTice Bait Stations:** This package contains InTice Liquid Bait and BaitPlate Stations. Fill the BaitPlate Stations half full with InTice Liquid Bait and place them, out of reach of children and pets, on a flat surface close to areas where ants are seen foraging or nesting. As the ants begin to feed on the bait you will notice many ants inside and around the opening to the BaitPlate Station. If the ants consume the entire bait, simply refill the BaitPlate Station.

**Using InTice Liquid Bait as a Perimeter Ant Defense System:** Take a few minutes to locate areas around the building where ants are seen trailing. Place the bait stations against the foundation where ant movement is seen. Spacing the bait stations every 5 to 10 feet will provide the best results. Check bait stations regularly for activity. Remember ants will feed on InTice Liquid Bait and carry the bait back to the rest of the colony. Heavy infestations may require several bait placement refills and up to two weeks for control.

**DO NOT USE** in edible product areas of food handling establishments, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas where food is exposed. Avoid contamination of feed and foodstuffs. Place bait in areas inaccessible to children and pets.

For further information on successful ant control using the InTice brand of insect baits, visit our web site at [www.rockwelllabs.com](http://www.rockwelllabs.com).

**Pest Control Operators:** InTice Liquid Bait can be diluted with water to obtain a 1% or 2.5% solution of Borax. Such a dilution is helpful when a substantial volume of InTice Liquid Bait is needed in a baiting program designed to control very large multi-queen and multi-colony ant infestations.

1% Dilution: 1 part InTice Liquid Bait to 4 parts water. Mix thoroughly.

2.5% Dilution: 1 part InTice Liquid Bait to 1 part water. Mix thoroughly.

#### COMMON DILUTIONS

##### 1% Dilution

InTice Liquid Bait	+	Water	=	Finished Product
6 fl. oz.	+	26 fl. oz.	=	1 Quart
25 fl. oz.	+	100 fl. oz.	=	1 Gallon
1 gallon	+	4 gallons	=	5 Gallons

##### 2.5% Dilution

InTice Liquid Bait	+	Water	=	Finished Product
16 fl. oz.	+	16 fl. oz.	=	1 Quart
64 fl. oz.	+	64 fl. oz.	=	1 Gallon
1 gallon	+	1 gallons	=	2 Gallons

**Using InTice Liquid Bait in Bait Stations:** Apply the 1% or 2.5% InTice Liquid Bait solution using bait stations designed to hold liquid bait. This product will work well in Rockwell's BaitPlate, D-Sect and PFT stations. Follow directions included with the bait stations to obtain best results.

#### Storage and Disposal

**Storage:** Store in a cool dry place. Do not store where children or animals may gain access.

**Disposal: If Empty:** Do not reuse this container. Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down on any indoor or outdoor drain.

#### Warranty Limitations and Disclaimer

Seller makes no warranty expressed or implied, concerning the use of this product other than as indicated on the label. Buyer accepts this material subject to these terms, and assumes all risk of usage and handling except when used or handled in accordance with this label. There are no expressed or implied warranties of merchantability or fitness for any particular purpose, except as specifically stated herein.
