CHEMICAL SAFETY AND
POLLUTION PREVENTION

Cisse W. Spragins, Ph.D.
Rockwell Labs Ltd.
1512 Taney St.
North Kansas City, MO 64116

MAY 18 2011

Subject: **Notification:** Alternate Brand Name to be "InVict AB Insect Paste"
Abamectin Cockroach Gel
EPA Reg. No. 73079-11

Dear Dr. Spragins:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 dated 3/11/11 for the product EPA Reg No. 73079-11. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10. The label submitted with the application has been stamped "Notification" and will be placed in our records.

If you have any questions, please contact me @ 703-347-0156 or urbanski.jennifer@epa.gov.

Sincerely,

A handwritten signature in black ink that reads "Jennifer Urbanski, Ph.D.".

Jennifer Urbanski, Ph.D.

Re: Abamectin Roach Gel, 73079-11, 0.05% Abamectin
Notification of Alternate Brand Name per PR Notice 98-10

To whom this concerns:

Enclosed please find the following documents in support of the notification for an alternate brand name for the above mentioned product:

1. Application for Registration (EPA Form 8570-1)
2. Copy of the product master label with the ABN included
3. Two copies of the final printed label (syringe label and outer box label) for EPA records

This notification is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that is is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

**KEEP OUT OF REACH OF CHILDREN
CAUTION**

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals: CAUTION: Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Wash hands thoroughly with soap and water after use and before eating, drinking, chewing gum, using tobacco or using the toilet.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and wildlife. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of equipment washwaters.

PHYSICAL OR CHEMICAL HAZARDS

Do not apply this product around electrical equipment, due to the possibility of electric shock.

First Aid

- If in Eyes:** -Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first five minutes, then continue rinsing.
- Call a poison control center or doctor for treatment advice.

Have the product or label with you when calling a Poison Control Center or doctor or going for treatment. In case of emergency, for additional information call **800 858 7378**.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

on following sites
Use Sites: In and around structures, including, but not limited to, residential, multi-family, commercial, industrial, municipal, institutional, research, recreational, health care, educational, daycare, hospitality and agricultural buildings and other man-made structures, garages, transport vehicles, sewers, animal research facilities, and food service, storage, handling and processing establishments. *newly bonded*

Indoor Use: Results will be best if spilled food and other debris are cleaned up before applying bait. Apply bait so it is out of reach of children and pets. Apply bait only in cracks, crevices, voids, other inaccessible areas, and non-exposed surfaces such as the undersides of furniture and fixtures and under or behind appliances. Apply bait in small spots about 1/4" (pea-sized) in diameter (about 0.5g). Do not apply to exposed surfaces (such as counter tops). Do not contaminate food or feed. For most roach infestations, applications should range from 10 to 20 spots per 100 square feet. Use the higher number of spots when infestations are heavy and/or when roaches are living primarily in walls voids or other inaccessible areas. Smaller, more frequent spots are better than occasional large spots. Bait may also be applied in approved tamper-resistant bait stations. Apply about 1 gram (3/8" size spot) in each station. Place 1-3 stations per 100 square feet in out of the way places where near roaches may hide.

Look for areas where roaches may hide or enter buildings. Some of these areas include areas where baseboards are peeling away from the wall, cracks in and around equipment and appliances such as stoves, sinks, dishwashers, refrigerators and walk-in coolers, hollow table legs, areas where pipes come through walls, cracks between different construction elements, around electrical boxes, cracks around hinges, where cabinets meet walls and cracks leading into wall, ceiling or floor voids. Pay particular attention to cracks which lead into void areas, even small ones. Also specifically look for warm, moist areas. Around and under dishwashers, refrigerators, ice machines, sinks, tubs and toilets and around drain openings are particularly attractive areas for roaches. Insert the syringe tip directly into the crack and apply about 0.5g (pea size) amount of bait. Inspect bait every 2-4 weeks and reapply when bait is almost entirely consumed.

For Ants: Apply bait in thin (1/4" wide) lines, about 1" long in areas where ants are seen trailing. Use 2-5 lines per 100 square feet. Bait is most effective when placed as close as possible to ant nests. Bait may also be applied in approved tamper-resistant stations. Apply 1-2 lines per station (as above) and use 1-3 stations per 100 sq. ft. Inspect bait weekly and reapply when bait is almost entirely consumed.

Do not apply bait to areas that are washed down frequently, such as in cracks around the edges of food prep surfaces. Do not apply bait in areas where there is a risk of electrical shock. Be careful not to apply bait on hot surfaces or other areas where the temperature

may exceed 130 °F as the bait could melt and drip. Bait placements should be in concealed, not open areas. Do not spray insecticides or other chemicals over bait placements, as this may cause insects to avoid the bait. The bait may be placed on top of non-repellent insecticide spray treatments. (Non-repellent sprays include only those containing fipronil, imidacloprid, or chlorfenapyr.) Apply bait out of reach of children and pets. Do not contaminate food or feed. Ongoing monitoring is recommended as part of an Integrated Pest Management program.

Food Processing and Handling Establishments, Including Federally-Inspected Food Plants: In food areas, including serving areas while the establishment is in operation, only apply bait in cracks, crevices, and other inaccessible areas, or in tamper-resistant bait stations. Follow above directions for crack and crevice placement. Do not contaminate food and feedstuffs. Never apply bait directly to a surface where food is stored, prepared or served. Any bait that is left visible after treatment must be washed up. Inspect bait every 2-4 weeks and reapply when bait is almost entirely consumed.

Outdoor Use: Apply bait so it is out of reach of children and pets. Apply bait only in cracks, crevices, voids, holes, other inaccessible areas, and other non-exposed surfaces. Apply bait in concealed areas on the outside surfaces of buildings and other structures, as well as in crawlspaces, attics, tree holes and other voids. Porches, garages, sheds, AC units and other outbuildings, fences or walls may also need treatment. Pay particular attention to cracks where insects may enter buildings and treat those areas. These areas include but aren't limited to cracks around windows, doors, eaves and soffits, expansion joints, and areas where lines or pipes enter buildings. Under siding and molding are also attractive areas for insects to hide. Bait may also be applied in approved tamper-resistant bait stations. Inspect bait every 2-4 weeks and reapply when bait is almost entirely consumed.

Storage and Disposal

Do not contaminate water, food or feed by storage or disposal.
Storage: Store in a dry place. Do not store where children or animals may gain access.
Disposal: If empty: Non-refillable container. Do not reuse this container. Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency or **1-800-CLEANUP** which is managed as a public-private partnership.

Warranty Limitations and Disclaimer

To the extent consistent with applicable law, seller makes no warranty expressed or implied, concerning the use of this product other than as indicated on the label. Buyer accepts this material subject to these terms, and assumes all risk of usage and handling except when used or handled in accordance with this label. To the extent consistent with applicable law, there are no expressed or implied warranties of merchantability or fitness for any particular purpose, except as specifically stated herein. To the extent consistent with applicable law, manufacturer shall not be liable for any consequential damages based on the use of the product.
