Subject: Registration Review Label Amendments for Atrazine Incorporating Mitigation Measures from the Interim Decision and the Technical Registrants' Commitments for the Endangered Species Act (ESA) Biological Evaluation
Product Name: SWISS FARMS ST. AUGUSTINE WEED & FEED
EPA Registration Number: 73327-3
Application Date: 10/28/2020
Decision Number: 567487

Dear Mr. Zemanek:

The Agency, in accordance with the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, has completed reviewing all the information submitted with your application to support the Registration Review of the above referenced product in connection with the Atrazine Interim Decision and with the technical registrants' commitments for the ESA Biological Evaluation. The Agency has concluded that your submission is acceptable. The label referred to above, submitted in connection with registration under FIFRA, as amended, is acceptable.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only

Page 2 of 2
EPA Reg. No. 73327-3
Decision No. 567487

distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

If you have any questions about this letter, please contact Darius Stanton at stanton.darius@epa.gov.

Sincerely,

A handwritten signature in blue ink, appearing to read "Linda Arrington", with a long horizontal flourish extending to the right.

Linda Arrington, Branch Chief

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.

Do not apply granular lawn products by hand. Avoid contact with hands and skin. Broadcast applications must NOT be made using hand-held devices, such as a belly grinder or handheld rotary applicator. Such equipment may only be used for spot treatments.

FIRST AID	
If in Eyes	<ul style="list-style-type: none">• Hold eye open and rinse slowly and gently with water for 15-20 minutes.• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.• Call a Poison Control Center or doctor for treatment advice.
NOTE: Have the product container or label with you when calling a Poison Control Center or doctor, or going for treatment.	

ENVIRONMENTAL HAZARDS

Atrazine can travel (seep or leach) through soil and enter ground water which may be used as drinking water. Atrazine has been found in ground water. Users are advised not to apply Atrazine to well drained soils where the water table (groundwater) is close to the surface and where these soils are very permeable. Your local agricultural agencies can provide further information on the type of soil in your area and the location of ground water. This product is toxic to aquatic invertebrates. Runoff and drift from treated areas may be hazardous to aquatic organisms in neighboring areas.

To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn [or garden] will help to prevent run off to water bodies or drainage systems.

NON-TARGET ORGANISM ADVISORY: This product is toxic to plants and may adversely impact the forage and habitat of non-target organisms, including pollinators, in areas adjacent to the treated site. Protect the forage and habitat of non-target organisms by following label directions intended to minimize drift.

STORAGE AND DISPOSAL

PESTICIDE STORAGE: Store in a clean, dry place. Reseal opened bag [by folding top down and securing].

PESTICIDE AND CONTAINER DISPOSAL: Non-refillable container. Do not reuse or refill this container. **If empty:** Place in trash or offer for recycling if available.

If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

– Start of Directions for Use –

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Where To Use

Use on St Augustinegrass (including 'Floratam'), zoysiagrass, centipede and carpetgrass lawns ONLY. Do not use on Bluegrass, Fescue, Bentgrass, Bahiagrass, Ryegrass, Bermudagrass, or Dichondra lawns.

Application Restrictions

- DO NOT APPLY THIS PRODUCT IN A WAY THAT WILL CONTACT ANY PERSON OR PET, EITHER DIRECTLY OR THROUGH DRIFT.
- KEEP PEOPLE AND PETS OUT OF AREA DURING APPLICATION.
- DO NOT ENTER OR ALLOW OTHERS (INCLUDING CHILDREN AND PETS) TO ENTER THE TREATMENT AREAS (EXCEPT THOSE INVOLVED IN THE WATERING) UNTIL WATERING-IN IS COMPLETE AND THE SURFACE IS DRY.
- This product must be WATERED IN IMMEDIATELY after application.
- Do not apply by hand or hand-held device such as hand-held rotary applicator.
- Do not apply more than 3.2 lbs. of product per 1,000 sq. ft. (139 lbs. of product per acre), which is equivalent to 2 pounds of active ingredient per acre, per application.
- Do not make more than 2 applications per year.
- Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes.
- Not for use on or under trees, shrubs, ornamental trees, bedding plants, flowers or garden plants. Do not apply under the branches (root zone area) of shrubs, trees, flowers, etc.
- Do not apply to newly seeded zoysiagrass, centipedegrass, or carpetgrass lawns. Wait until they have required at least 2 mowings.
- Not for use in the states of Hawaii or Alaska, or in the U.S. territories (Puerto Rico, Guam, American Samoa, the U.S. Virgin Islands, and the North Mariana Islands)

When To Apply

- For post emergence control, apply anytime broadleaf weeds are [actively] growing. If complete control is not obtained, a second application may be necessary 2 months after the first.
- To prevent germination of crabgrass, spurge, lespedeza, oxalis and sedges (from seed) apply in January, February or early March.
- Apply in the fall to control henbit, chickweed, annual bluegrass (Poa), cudweed, parsley piert, rescuegrass and other listed winter weeds.
- Apply to newly sprigged St. Augustine and zoysiagrass lawns to help prevent competition from newly emerging weeds.
- Water the new sprigs, allow the grass blades to dry, then make the application of Swiss Farms St. Augustine Weed & Feed.
- Do not apply to centipede or carpetgrass lawns during the period of winter dormancy — approximately October 15- to March 15 (okay to apply in Florida however). Do not apply to newly seeded centipede or carpetgrass lawns until after the new grass has been mowed at least twice.

[Use Directions] [How to Apply]

1. Determine size of area to be treated — measure length and width in feet, then multiply to determine coverage area in sq. ft. (length x width). **Next, subtract non-lawn areas.**
2. Use the spreader setting chart to determine the appropriate setting.
3. [Apply with a fertilizer spreader — **Never apply by hand**]
4. Apply evenly over dry grass, avoiding streaking, skips and overlaps — thorough coverage is important. On hot days (above 80° F) water the lawn to rinse particles off the grass.

– End of Directions for Use –

Optional Weed Information

Note to PM: *The full or partial list of weeds controlled by this product will appear on the FPL*

- What It Does
- What to Expect
- Controls Weeds
- Weeds Controlled
- This product controls / suppresses the following list of growing weeds
- [**Insert Product Name**] contains an active ingredient that works fast and kills unsightly and [nutrient stealing] [harmful] weeds [and provides the essential nutrients your lawn needs to grow thick and green.]

- [It] also prevents germination of many common spring and fall germinating annual weeds. It will provide post emergence control of many winter and summer weeds.
- [Fertilizes and Replenishes] – Dual feeding formula provides both quick greening and extended feeding, resulting in a thicker, stronger, greener lawn.

Annual Bluegrass (<i>Poa annua</i>)	Dichondra	Ragweed
Annual Sowthistle	Dollarweed	Red Sorrel
Black Medic	Florida Betony	Rescuegrass
Blue Toadflax	Florida Pusley	Shepherd's-purse
Buckhorn Plantain	Fragrant Cudweed (Rabbit Tobacco)	Spotted Spurge
Burclover	Henbit	Spurweed (lawn burweed)
Carolina Geranium		Stinging Nettle
Chickweed, Common	Knotweed	Venus Looking Glass
Chickweed, Mouseear	Lambsquarters	Wild Mustard
Clover / hopclover	Lespedeza	
Common Dandelion	Lippia (matchweed)	
Crabgrass	Narrowleaf Vetch	
Cudweed	Oxalis (woodsorrel)	
Cutleaf Evening Primrose	Parsley-Piert	
Corn Speedwell	Pigweed	
Carpetweed	Pepperweed	
Chamber-bitter (niruri)	Purslane	

Optional Spreader Setting Information

- **SPREADER SETTINGS**
- Spreaders and Calibrations
- Determine size of area to be treated
- Measuring / Measure your lawn
- How to Measure Your Lawn – [ICON]
- For even application walk at a steady pace slightly overlapping each pass
- For best results, use a Scotts spreader
- This package applies 3.2 pounds of product per 1000 sq. ft.
- Apply header strips
- Then apply product in longest direction of lawn
- **ICON** – Broadcast / Rotary spreader
- **ICON** – Drop spreader
- For additional spreader settings, please call – **Insert Company Phone Number**
- Calibrate your spreader with each application. Adjust to apply at the rate of 3.2 lbs. of product per 1000 sq. ft. (2 lb. active ingredient per acre). This [16 lb.] [32 lb.] bag covers [5,000] [10,000] sq. ft. of lawn area. Do not make more than 2 applications per year.
- **Note:** The spreader settings listed [above] [below] [at right] [at left] are approximate. It is important to check calibration of spreader frequently to ensure spreader is functioning properly and applying product evenly. To check calibration accurately weigh a few pounds into your spreader and apply to a measured area. Then adjust spreader setting if necessary, in order to ensure correct rate of application.

Optional Iron and Fertilization Program Statement

This product contains iron that aids in the greening process but WILL stain sidewalks and driveways. Sweep off any product that may have drifted onto these areas.

[Typically, a lawn will utilize 1 to 4 lbs. of nitrogen per 1,000 sq. ft. per growing season. When used as directed, this product will supplement your regular fertilizer program by providing xx lbs. of nitrogen per 1,000 sq. ft. Consult your local County Extension office for questions regarding a fertilizer program suitable for your geographic region.]

- Smaller particles for even feeding and greening
- Delivers quick greening plus consistent, extended nutrition for your lawn
- Quick greening plus extended nutrition / formulation / formula
- [Delivers] important / necessary nutrition for your lawn

[3][Three] Simple Steps to a Lush, Green Lawn] [ICOM]

1. Select the right fertilizer – **insert brand name** products are formulated to provide both a quick and long-lasting feeding. One application provides the lawn [with] nutrients needed to grow thick and green. They're formulated with X% Iron [or appropriate nutrient] for deep greening and coated [slow-release] nitrogen for an extended, even feeding up to X months.
2. Use a quality spreader – Spreaders can be calibrated to accurately apply all granular lawn care products.
3. Sweep off hard surfaces – **insert brand name** products are formulated with extra iron [or appropriate nutrient] for deep greening. They may stain concrete surfaces, so it is important to sweep off any product spilled on hard surfaces before watering in.

Fertilizer note for use with phosphorus-free fertilizer products

- **insert product name** is formulated to compliment the phosphorus already present in the soil and give your turf the additional primary nutrients needed for a good turf feeding. A soil test can help you determine if your soil has an adequate supply of phosphorus and if this is the best product for your soil type. Proper watering and mowing practices along with regular feedings will help promote a beautiful green lawn.

[Turf Note]

- CENTIPEDE GRASS IS DIFFERENT FROM OTHER TURFGRASSES. It requires very little fertilizer. In fact, turf experts say that too much fertilizer can hurt centipede. With this in mind, we have formulated Swiss Farms St. Augustine Weed & Feed to give your Centipedegrass the light feeding it needs to grow thick, lush and sturdy. Our timed-release nitrogen provides a slow, gradual feeding that keeps your grass greener longer and helps build a stronger, hardier root system. Extra iron helps keep the grass green without too much nitrogen.
- Swiss Farms St. Augustine Weed & Feed products with timed-release nitrogen works differently than other slow-release products. Timed-release nitrogen releases in response to soil temperature rather than moisture level. Other slow release products release according to the amount of moisture present in the soil...the more moisture the quicker the nutrients release, putting your grass at risk from burning. Because Swiss Farms St. Augustine Weed & Feed products contain timed-release nitrogen, your grass is fed for up to 2 months.
- Swiss Farms St. Augustine Weed & Feed timed-release nitrogen is formulated to give your grass the primary nutrients it needs to grow thick, lush and sturdy GREEN grass. Our timed-release nitrogen provides a slow, gradual feeding that keeps your grass greener longer and helps build a stronger, hardier root system.
- Why does your lawn need Swiss Farms St. Augustine Weed & Feed? Swiss Farms St. Augustine Weed & Feed is formulated to kill lawn weeds and give your grass the nutrients it needs for thick growth. Our timed-release formula keeps your grass greener longer and helps build strong, hardy root systems.
- Swiss Farms St. Augustine Weed & Feed products with timed release nitrogen feed as the ground temperature warms in the Spring and Summer, and slows down as the soil cools in the Fall, thus supplying nitrogen according to the requirements of your grass.

General Claims –Ace Brand/Private Label

Fertilize once for [the whole season] – **or** – [2 / 3 / 4 / 5 / 6 months]. **[Insert Product Name]** feeds and greens with slow release fertilizer for up to 2 / 3 / 4 / 5 / 6 months. It kills tough existing weeds and controls new weeds for 2 / 3 / 4 / 5 / 6 months.

Vigoro/Private Label Fertilizer Information

Why fertilize the / your lawn?

While it is easy to see that / a satisfying deep green / greening when you fertilize, regular feedings [can] actually do much more...

- Promote a deep and dense root system that is better able to reach water and find nutrients during tough heat & drought, so lawn stays greener, longer and bounces back faster
- Thicken lawn with new /additional blades of grass, making it more resistant to bare spots and thinning
- Help prevent weeds by making it difficult for weed[s] [seeds in the air] to find soil to root, [as well as] / [and] crowd out existing weed[s] [seeds in the soil]

Feed every 8 weeks for optimal results

[Recommended] Next Feeding
