Subject: Notification per PRN 98-10 – updating label with additional refillable text to the Storage & Disposal Statement as well as optional text to the Ortho Guarantee Statement

Product Name: SF 1345
EPA Registration Number: 73327-19
Application Date: 12/15/2023
Case Number: 494576

Dear Ms. Slack,

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 for the above referenced product. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10.

The label submitted with the application has been stamped “Notification” and will be placed in our records.

Should you wish to add/retain a reference to the company’s website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product’s label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA’s Office of Enforcement and Compliance.

If you have any questions, you may contact please contact Sayed Islam at 202-566-2796 or by email at islam.sayed@epa.gov.

FIRST AID
If in eyes: IMMEDIATELY hold eye open and rinse thoroughly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
NOTE TO PHYSICIAN If in eyes, treat symptomatically. Symptoms may develop gradually. Severe damage may be caused by apparently trivial contact and healing may be delayed. Medical supervision should be continued until healing is complete Have the product container or label with you when calling a poison control center or doctor, or going for treatment advice. You may also contact 1-877-465-5161 for emergency medical treatment.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

May cause eye irritation. Avoid contact with eyes. Protective eyewear is strongly recommended when applying this product. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and aquatic invertebrates. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area.

GROUND WATER ADVISORY: This chemical has properties and characteristics associated with chemicals detected in groundwater. This chemical may leach into groundwater if used in areas where soils are permeable, particularly where the water table is shallow.

SURFACE WATER ADVISORY: This product may impact surface water quality due to runoff of rain water. This is especially true for poorly draining soils and soils with shallow ground water. This product is classified as having a high potential for reaching surface water via runoff.

A level, well-maintained vegetative buffer strip between areas to which this product is applied and surface water features such as ponds, streams, and springs will reduce the potential loading of fluazifop-P-butyl from runoff water and sediment. Runoff of this product will be reduced by avoiding applications when rainfall or irrigation is expected to occur within 48 hours

NON-TARGET ORGANISM ADVISORY: This product is toxic to plants and may adversely impact the forage and habitat of non-target organisms, including pollinators, in areas adjacent to the treated site. Protect the forage and habitat of non-target organisms by following label directions intended to minimize spray drift.

[WARRANTY INFORMATION]

NOTICE: To the extent consistent with applicable law, buyer assumes all risks of use, storage or handling of this product not in accordance with directions.

Bold, italicized text is information for the reader and is not part of the label.

[Bracketed information is optional.] Text separated by / denotes and/or options. **Highlighted** text is new.

DIRECTIONS FOR USE

It is violation of Federal law to use this product in a manner inconsistent with its labeling.

-  People and pets may re-enter after the treated area has been allowed to dry.

USE RESTRICTIONS

- **DO NOT** apply this product in a way that will contact any person or pet either directly or through drift.
- Only persons applying this product may be in the area during application.
- Keep people and pets out of the area during application. 
-  **DO NOT** allow people or pets to enter the treated area until sprays have dried.
- **DO NOT** mow, cut, or disturb treated vegetation for at least 7 days following application.
- **DO NOT** use on or around food or feed crops.
- **DO NOT** apply more than 1 gallon of product per 350 sq ft in a single application. 1 gallon of product contains 0.0166 lb diquat dibromide, 0.0056 lb fluazifop-p-butyl, 0.0044 lb dicamba.
- **DO NOT** apply more than 2 gallons of product per 350 sq ft per year (2 applications of 1 gallon). 2 gallons of product contain 0.0332 lb diquat dibromide, 0.0112 lb fluazifop-p-butyl, 0.0088 lb dicamba.
- If retreatment is necessary, wait 28 days before making a second application.
- **DO NOT** make more than 2 broadcast applications per year.

SPRAY DRIFT ADVISORIES

THE APPLICATOR IS RESPONSIBLE FOR AVOIDING OFF-SITE SPRAY DRIFT. BE AWARE OF NEARBY NON-TARGET SITES AND ENVIRONMENTAL CONDITIONS.

IMPORTANCE OF DROPLET SIZE

An effective way to reduce spray drift is to apply large droplets. Use the largest droplets that provide target pest control. While applying larger droplets will reduce spray drift, the potential for drift will be greater if applications are made improperly or under unfavorable environmental conditions.

HAND HELD TECHNOLOGY APPLICATIONS

Take precautions to minimize spray drift

HOW IT WORKS

The dual action of SF 1345/this product kills all types of weeds and grasses. One ingredient works on contact with visible results within hours. The other two ingredients are absorbed and move within the plant, penetrating deep to kill down to the root.

WHERE TO USE

- Around perennial landscape plants, shrubs, or trees
- Patios, walkways, driveways
- Gravel or mulch beds
- Along fences, around buildings
- Preparing landscaped areas
- Lawn renovation

Note to PM: The illustrations may or may not appear on the final printed label. The use of illustrations is dependent upon the size of the packaging.

HOW TO APPLY

- Shake gently before using.
- Spray only the weeds you want to kill. Thoroughly wet the foliage to cover but **DO NOT** spray to runoff.
- For best results, apply when weeds are actively growing and when the air temperature is above 60°F.
- **DO NOT** spray plants you desire to keep. You may use a cardboard or plastic shield to protect desirable plants from spray.
- Apply when air is calm to prevent drift to desirable plants.
- If desirable plants are accidentally sprayed, rinse them off immediately with plenty of water.

WHAT TO EXPECT

- Sprayed weeds begin to [wilt] [die] within hours after application, with complete kill within [days to] 1-2 weeks.
- A single application controls most [listed] weeds.
- Rainproof: rainfall or watering [15/30] minutes after application will not reduce weed control.
- Perennial landscape plants, trees, and shrubs may be planted 1 day after application.

LAWN RENOVATION/REPLACEMENT

Use SF 1345/this product to kill grass and weeds before planting new lawn.

- Determine the size of the area to be treated. [One gallon treats 350 sq. ft.] [One quart treats 88 sq. ft.]
- **DO NOT** mow within [1 week] [7 days] before spraying or [1 week] [7 days] after spraying.
- If soil is dry, water every other day for a week before application.
- Wait 7 days after last application to rake, till, or replant with seed or sod.
