Mr. Alan Bernard  
Innovative Pest Control Products  
P.O. Box 880216  
Boca Raton, FL 33488-0216

Subject: Revised Label  
Gourmet Liquid Ant Bait  
EPA File Number: 73766-2  
Application Dated:

Dear Mr. Bernard:

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable, subject to the comment listed below:

Your product does not fall within the scope of the NOP Program. Therefore, you must remove the logo and the phrase "For Organic Production" from your product labeling.

A stamped copy of the label is enclosed.

Sincerely,

Richard Gebken  
Product Manager  
Insecticide Branch  
Registration Division (7505P)

Enclosure: Stamped Copy of Label "with" Comments

**--MASTER LABEL--**

ACCEPTED  
with COMMENTS  
in EPA Letter Dated  
FEB 29 2008  
Under the Federal Insecticide,  
Fungicide, and Rodenticide Act  
as amended, for the pesticide  
registered under EPA Reg. No.  
73766-2

**GOURMET LIQUID ANT BAIT**  
Honeydew Formula

*(Non-Agricultural Uses)*

**Kills All common Household Ants & German Cockroaches**

No Mess – No Ants

Use Indoors or Outdoors

*(Agricultural Uses)*

**For Control of Sweet & Protein Feeding Ants in**

**Avocado, Berries, Cherimoya and other Subtropical Fruits, Citrus, Cranberry, Grapes,  
Pome Fruit, Stone Fruit, Strawberry, and Tree Nuts**

**Active Ingredient:**

Disodium octaborate tetrahydrate 1.0%

**Other Ingredients:** 99.0%

**Total** 100.0%

**KEEP OUT OF REACH OF CHILDREN**

**CAUTION**

Net Contents: 2.5 gallons (Ag Uses)

.75 oz (22.2ml), 32 oz, 1 Gallon (Non-Ag uses)

MANUFACTURED BY:  
INNOVATIVE PEST CONTROL PRODUCTS  
Boca Raton, Florida 33488 USA  
EPA Reg. No. 73766-2  
EPA Est. No. 81944-GA-001

<b>FIRST AID</b>	
If on skin or clothing	-Rinse skin with plenty of water for 15 to 20 minutes. - Take off contaminated clothing.- Call poison control center or doctor for additional treatment advice.
If in eyes	-Hold eye open and rinse slowly and gently with water for 15-20 minutes.-Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.-Call a poison control center or doctor for treatment advice.
If swallowed	-Call poison control center or doctor immediately for treatment advice. -Have person sip a glass of water if able to swallow.-Do not induce vomiting unless told to do so by the poison control center or doctor.-Do not give anything by mouth to an unconscious person.
<b>HOT LINE NUMBER</b>	
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-877-483-4997 for emergency medical treatment information.

### PRECAUTIONARY STATEMENTS

---

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**CAUTION.** Harmful if swallowed. Causes eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling.

**ENVIRONMENTAL HAZARDS**

Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters or rinsate.

The use of any pesticide in a manner that may kill or otherwise harm an endangered species or adversely modify their habitat is a violation of federal law.

---

### STORAGE AND DISPOSAL

---

Do not contaminate water, food or feed by storage or disposal of this product.

**Storage:** Store product in original container in a cool dry place out of reach of children. Do not allow product to freeze.

**Disposal:** If empty: Do not reuse this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

Do not contaminate feed or foodstuffs.

*(for non-agricultural split label)*

---

### DIRECTIONS FOR USE – NON-AGRICULTURAL USES

---

It is a violation of federal law to use this product in a manner inconsistent with its labeling

Place baits in areas inaccessible to children and pets.

To control ants and German cockroaches use indoors or outdoors near homes, apartments, condominiums, schools, hospitals, restaurants, grocery stores, non-food areas of processing plants, boats, cruise ships, institutional and commercial buildings, nursing homes, hotels and warehouses.

Gourmet Liquid Ant Bait may be used at full strength, diluted with distilled water or other food grade liquid 1:1 to make bait containing .5% active ingredient. Bait may be used in Ant Café, Ant & Roach Café RTU, KmAntPro or other similar bait stations.

Ant & Roach Café RTU bait station. Instructions: 1. To activate Ant & Roach Café RTU Bait Station, place station on a flat surface with the cone facing up. If cone is filled with liquid, move station from side to side rapidly and liquid will leave the cone. 2. With a knife or scissor cut the top of the cone, so that the top of the remaining cone is level with top of surrounding circular surface. 3. Place bait station according to label directions.

**INDOORS:** Place the bait station on a horizontal surface near ant activity. Place stations under food cabinets, sinks, stoves, refrigerators, food storage areas, attics, garages, basements, storage areas, closets, etc.

**OUTDOORS:** Place on exterior windowsills and in doorways to help prevent entry of ants. Some bait stations may be designed to be affixed to a wall, hung on pipes or branches, or placed on a flat surface. When using bait stations, wash hands thoroughly before handling to remove any odors that may be repellent to ants, i.e. tobacco, garlic, strong chemicals/ cleaners etc.

**OPEN PLACEMENT METHOD NOT TO BE USED IN CALIFORNIA**

Gourmet Liquid ant Bait can be used to make small, pea sized placements and or long thin lines in areas where ants are a problem

Ants are attracted to and will feed on Gourmet Liquid Ant Bait until they die. The bait is designed to work slowly and sufficient bait should be made available for at least 14 days of continuous feeding. The ants will return to their nests after consuming the bait and will feed their young and the queen.

Repeat placement of the bait until satisfactory control has been achieved.

Do not use sprays, foggers or any strong chemicals or cleaners near the bait containers or placements. This may contaminate the bait and cause the insects to cease feeding. (*Optional illustrations of bait station activation :*)

*(for agricultural use split label)*

**DIRECTIONS FOR USE – AGRICULTURAL USES**

**For Organic Production**

It is a violation of federal law to use this product in a manner inconsistent with its labeling

**PERSONAL PROTECTIVE EQUIPMENT (PPE)**

- Applicators and other handlers must wear:
  - Long sleeved shirt and long pants
  - Chemical resistant or waterproof gloves
  - Shoes plus socks

<b>User Safety Recommendations</b>
Users should: <ul style="list-style-type: none"> <li>-Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.</li> <li>-Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.</li> <li>-Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible wash thoroughly and change into clean clothing.</li> </ul>

<b>Agricultural Use Requirements</b>

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statement on this label about personal protective equipment (PPE), notification to workers, and restricted-entry interval. The requirements in this box apply to uses of this product that are covered by the Worker Protection Standard.

To control sweet and protein feeding ants use Gourmet Liquid Ant Bait in conjunction with bait stations that are designed for ant control and meet EPA-ChemSAC criteria such as KM AntPro Baiting System and Ant Cafe Bait Stations. Follow filling instructions accompanying individual bait stations.

It is recommended that Gourmet Liquid Ant Bait initially be used at full strength. If it appears that the ants are not readily accepting the bait, the bait may be made more attractive by dilution with water or other food grade liquid 1:1 to make bait containing 0.5% active ingredient. It does not affect distribution of stations or gallons per acre.

**INSTRUCTIONS FOR PLACEMENT OF AND FILLING OF BAIT STATIONS OR OTHER DELIVERY SYSTEMS.**

Place a sufficient number of bait stations per acre so that a continuous supply of bait can be maintained during the treatment period. For initial placement, use approximately 1 gallon/A (full strength or 1:1 ratio) for light populations, 2 gallons/A (full strength or 1:1 ratio) or medium populations and 3-4 gallons/A (full strength or 1:1 ratio) for heavy populations. The distribution and number of bait stations will vary based on the volume of bait in each station, crop, the time of year, and species of ant and service frequency. The amount of bait per station and the number of bait stations can be reduced as the ant population is reduced. Each situation must be evaluated individually and the expertise of the applicator will have to guide bait station placement.

Place bait stations containing this product in areas where ant foraging is observed. Ants tend to follow natural lines in the environment, so use tree trunks, vines, watering lines, soil trunk interfaces and manmade rows as possible points at which to position bait stations. Between seasons, ant populations may migrate to areas where water is available. Try to place stations between these ant reservoirs and acreage being cultivated.

Ants are attracted to and will feed on Gourmet Liquid Ant Bait until they die. The bait is designed to work slowly and sufficient bait should be made available for at least 14 days of continuous feeding or until foraging terminates. The ants will return to their nests after consuming the bait and will feed their young and the queen. Repeat placement of the bait until satisfactory control has been achieved.

When using bait stations, wash hands thoroughly before handling to remove any odors that may be repellent to ants, i.e. tobacco, garlic, strong chemicals/ cleaners, etc.

**RESTRICTIONS AND LIMITATIONS**

None

---

**Notice:** Buyer and user assume all the risk and liability of use, storage and/ or handling of this product not in accordance with terms of this label.
