Subject: Gourmet Liquid Ant Bait, EPA Reg. No. 73766-2
Date of Registrant Submission: 11/17/08
Decision: 398144

Dear Mr. Bernard:

The labeling referred to above, submitted in connection with registration under the Federal insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable. Two (2) copies of the finished labeling must be submitted prior to releasing the product for shipment. A stamped copy of the label is enclosed for your records.

If you have any questions regarding this letter, please contact Samantha Hulkower at (703) 603-0683.

Sincerely,

A handwritten signature in black ink, appearing to read "Kimberly Nesci".

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION

ENVIRONMENTAL HAZARDS

Do not apply directly to water. Do not contaminate water when disposing of equipment wash waters or rinsate.

The use of any pesticide in a manner that may kill or otherwise harm an endangered species or adversely modify their habitat is a violation of federal law.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal of this product.

Storage: Store product in original container in a cool dry place out of reach of children. Do not allow product to freeze.

Disposal: If empty: Do not reuse or refill this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place used product down any indoor or outdoor drain.

[Ant Café Outdoor bait station may be refilled with Gourmet Liquid Ant Bait and reused, when useful life is over dispose of bait station as directed above] [optional]

DIRECTIONS FOR USE- NON-AGRICULTURAL USES

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Do not contaminate food, feed or foodstuffs.

Place baits in areas inaccessible to children and pets.

To kill ants and roaches use indoors or outdoors near homes, apartments, condominiums, schools, hospitals, restaurants, grocery stores, food processing plants (nonfood areas), boats, cruise ships, institutional and commercial buildings, nursing homes, hotels and warehouses.

Gourmet Liquid Ant Bait may be used at full strength, diluted with distilled water or other water based, food grade liquid 1:1 to make bait containing .5% active ingredient. Bait may be used in Ant Cafe, Ant & Roach Cafe RTU, Ant Café Outdoor, Ant Café Outdoor RTU, or KM AntPro bait stations that are sold separately.

[Ant & Roach Cafe RTU bait station Instructions: 1. To activate Ant & Roach Cafe RTU Bait Station, place station on a flat surface with the cone facing up. If cone is filled with liquid, move station from side to side rapidly and liquid will leave the cone. 2. With a scissor cut the top of the cone, so that the top of the remaining cone is level with top of surrounding circular surface. 3. Place bait station according to label directions.] optional] (Optional: illustrations of bait station activation)

Place the bait station on or near ant activity. Place stations under food cabinets, sinks, stoves, refrigerators, food storage areas, attics, garages, basements, storage areas, closets. Place on exterior windowsills and in doorways to help prevent entry of ants. Some bait stations may be designed to be affixed to a wall, hung on pipes or branches, anchored in the ground or placed on a flat surface. When using bait stations, wash hands thoroughly before handling to remove any odors that may be repellent to ants, i.e. tobacco, garlic, and chemical cleaners.

[OPEN PLACEMENT METHOD NOT TO BE USED IN CALIFORNIA

Gourmet Liquid ant Bait can be used to make small, pea sized placements and or long thin lines in areas inaccessible to children and pets, where ants are a problem.] Optional

Outdoors: For best results place stations in shaded areas or create shade for the bait station. Avoid placing bait station where it will receive direct sunlight whenever possible.

[Outdoors- Ant Café Outdoor Bait Station –

- For use around Structures- The number of bait Stations to use will vary with the type of ant and the size of the colony. For initial placement- Place one bait station every fifty feet around the structure to be treated.
- If any of the bait stations is emptied in less than a week, double the initial placement. Replace baits as needed till feeding activity ceases.] [optional]
- The preparations below will help to prevent damage to the bait station

To activate and place the station

1. Loosen the soil in the spot where you are going to place the station to width of about 3" and a depth of about 7" with a garden trowel or small shovel.
2. Remove seal at the end of the entry tube to expose the bait station entry.
3. Place the anchor into the soil with a clockwise turning motion until the entryway is level with the soil. If you encounter difficulty in seating the bait station properly, remove it and loosen the soil more thoroughly, then repeat the anchoring process
4. Alternatively, dig a small hole to a depth of 7" place the station in the hole, so that the entryway is level with the adjacent ground and replace the soil] [optional]

Listed ants are attracted to and will feed on Gourmet liquid Ant Bait until they die. The bait is designed to work slowly and sufficient bait should be made available for at least 14 days of continuous feeding. Replace the bait with fresh bait as needed.

Do not use sprays, foggers or any repellent chemicals or cleaners near the bait containers or placements. This may contaminate the bait and disrupt ant foraging causing the insects to cease feeding.

[optional]

DIRECTIONS FOR USE- AGRICULTURAL USES

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Applicators and other handlers must wear;

- Long sleeved shirt and long pants
- Chemical resistant or waterproof gloves
- Shoes plus socks

User Safety Recommendations

Users should:

- Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible wash thoroughly and change into clean clothing.

Agricultural Use Requirements

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statement on this label about personal protective equipment (PPE), notification to workers, and restricted-entry interval. The requirements in this box apply to uses of this product that are covered by the Worker Protection Standard.

To kill sweet and protein feeding ants use Gourmet Liquid Ant Bait in conjunction with bait stations that are designed for ant control and meet EPA-ChemSAC criteria such as KM AntPro Baiting System and Ant Cafe Bait Stations. Follow filling instructions accompanying individual bait stations.

It is recommended that Gourmet Liquid Ant Bait initially be used at full strength. If it appears that the ants are not readily accepting the bait, the bait may be made more attractive by dilution with water or other food grade liquid 1:1 to make bait containing 0.5% active ingredient. It does not affect distribution of stations or gallons per acre.

[Ant Café Outdoor Bait Station – The preparations below will help to prevent damage to the bait station.

To activate and place the station

1. Loosen the soil in the spot where you are going to place the station to width of about 3" and a depth of about 7" with a garden trowel or small shovel.
2. Twist off the lever at the end of the entry tube to expose the bait station entry.
3. Place the anchor into the soil with a clockwise turning motion until the entryway is level with the soil. If you encounter difficulty in seating the bait station properly, remove it and loosen the soil more thoroughly, then repeat the anchoring process
4. Alternatively, dig a small hole to a depth of 7" place the station in the hole, so that the entryway is level with the adjacent ground and replace the soil] [optional]

INSTRUCTIONS FOR PLACEMENT AND FILLING OF BAIT STATIONS OR OTHER DELIVERY SYSTEMS.

For best results place stations in shaded areas or create shade for the bait station. Avoid placing bait station where it will receive direct sunlight whenever possible.

December 10, 2008 revision 5

Place a sufficient number of bait stations per acre so that a continuous supply of bait can be maintained during the treatment period. For initial placement, use approximately 1 gallon/A (full strength or 1:1 ratio) for light populations, 2 gallons/A (full strength or 1:1 ratio) for medium populations and 3-4 gallons/A (full strength or 1:1 ratio) for heavy populations. The distribution and number of bait stations will vary based on the volume of bait in each station, crop, the time of year, and species of ant and service frequency. The amount of bait per station and the number of bait stations can be reduced as the ant population is reduced. Each situation must be evaluated individually in order to determine ideal bait station placement.

Place bait stations containing this product in areas where ant foraging is observed. Ants tend to follow natural lines in the environment, so use tree trunks, vines, watering lines, soil trunk interfaces and manmade rows as possible points at which to position bait stations. Between seasons, ant populations may migrate to areas where water is available. Try to place stations between these ant reservoirs and acreage being cultivated.

Ants are attracted to and will feed on Gourmet Liquid Ant Bait until they die. The bait is designed to work slowly and sufficient bait should be made available for at least 14 days of continuous feeding or until foraging terminates. Replace the bait with fresh bait as needed. When using bait stations, wash hands thoroughly before handling to remove any odors that may be repellent to ants, i.e. tobacco, garlic, strong chemicals/ cleaners, etc.

RESTRICTIONS AND LIMITATIONS

None
