

AntX 75

ACTIVE INGREDIENT:

Boric Acid 7.5%

INACTIVE INGREDIENTS:

92.5%
100.0%

EPA Reg. No. 73912-2

Six 30-gram tubes Per Box
8 Boxes Per Case
Total 48 Tubes

**KEEP OUT OF REACH OF CHILDREN
CAUTION**

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION: Harmful if swallowed or absorbed through skin. Causes eye irritation. Avoid contact with clothing, skin or eyes. Wash thoroughly with soap and water after handling.

FIRST AID	
If on skin or clothing	<ul style="list-style-type: none"> Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
If in eyes	<ul style="list-style-type: none"> Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
If swallowed	<ul style="list-style-type: none"> Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.
HOT LINE NUMBER: CHEMTREC 800-424-9300 Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For more information, call 1-619-596-8600 from 9 a.m. to 5 p.m. PST Monday through Friday.	

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

In the home, sweet eating ants are usually found in the kitchen and bathroom areas and will often appear to be randomly searching for food. THIS BAIT PRODUCT WORKS BEST WHEN ALL COMPETING FOOD SOURCES ARE REMOVED AND NO OTHER PESTICIDE OR BAITS ARE USED. This product was developed specifically for sweet eating ants.

GENERAL INFORMATION

AntX 75 is intended for the control of sweet eating ants, including Argentine, Pharaoh, Ghost, White Foot, and Harvester ant species. Apply as a spot and/or crack and crevice application to spaces within structures, their walls and ceilings (both inside and out), and the immediate adjacent surrounding grounds. Such structures include, but are not limited to, residential (e.g. houses, apartments), commercial, industrial, and institutional buildings (e.g. restaurants, supermarkets, offices, hospitals, motels and utilities), and agricultural structures (e.g. barns, livestock housing facilities), pet kennels, zoos, and on various modes of transport (e.g. aircraft, buses, trucks, trailers, rail cars, and marine vessels).

SPOT OR CRACK AND CREVICE APPLICATIONS

Crack and Crevice Treatments: AntX 75 may also be applied as a bead or thin film where appropriate. Bait should be applied into cracks and crevices in which insects hide or through which they may enter the building. Such openings commonly occur at expansion joints, between different elements of construction, between, behind or under various types of equipment such as cabinets, refrigerators, sinks, stoves, dishwashers, and through floors, doors, windows, walls and ceilings. These openings may lead to voids such as hollow walls, hollow equipment legs and bases, utility

ACCEPTED

JUL 15 2002

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 73912-2

AntX 75

entrances, electrical conduit, junction and switch boxes, and wall and floor drain exits.

Apply AntX 75 by placing the applicator tip directly into cracks and crevices and other openings or voids where insects enter or harbor and deposit the bait as multiple spots or as a continuous bead. Care should be taken to avoid depositing the product onto open or exposed surfaces. Once the bait has been applied the crack or crevice should be sealed with "Pro Choice PMP Grade" silicone sealant. During follow up visits, inspect bait placements and reapply or reseal as needed. Do not use this product where a possibility of a shock hazard exists.

FOOD/FEED/ HANDLING ESTABLISHMENT APPLICATIONS

Application within food/feed areas of food/feed handling establishments is limited to crack and crevice treatment only. Apply with syringe applicator directly into cracks, crevices, holes and other small openings where ants may be a problem. Apply small amounts of AntX 75 gel (up to 1/2 gram) per spot. Do not apply bait to areas where food/feed, food utensils or food processing surfaces may become contaminated. Do not apply bait to areas that are routinely washed such as cracks and crevices in tops of tables, food/feed preparation and prepared food holding surfaces as bait may be removed by washing. Do not apply bait to surfaces where the temperature exceeds 130F as bait may run. Examples include, but are not limited to, portions of stoves, ovens, grills, fume hoods, heat lamps, coffee urns, steam tables, toasters, fryers, dishwashers and hot water pipes. Care should be taken to avoid depositing AntX 75 gel onto exposed surfaces. If AntX 75 gel contacts an exposed surface, remove AntX 75 gel and wash exposed surface. Food/feed areas include areas for receiving, storage, packing (canning, bottling, wrapping, boxing), preparing edible waste storage, and enclosed processing systems (mills, dairies, edible oils, syrups). Serving areas are also considered a food/feed area when food is exposed and facility is in operation. Apply bait in small amounts between different elements of construction, between equipment and floors, walls, ceilings, equipment legs and bases, around plumbing pipes, doors and windows, behind and under refrigerator, cabinets, sinks, closets, stoves and other equipment where ants travel. During follow-up visits inspect bait placements and reapply when necessary.

Application of this product in food/feed areas of food/feed handling establishments, other than as a crack and crevice treatment, is not permitted.

INDOOR PEST CONTROL

For indoor uses, make applications in a manner as previously described above under "Spot or Crack and Crevice Applications." Particular attention should be given to treating entry points and harborage areas. An effective method of locating these areas is to place a droplet of AntX 75 near a foraging ant. Return within a short period of time, 1 -2 hours and follow the trail to the entrance point. Place the applicator tip into cracks, crevices, voids, holes, and other small openings where insects may enter. Apply small amounts of bait (up to 1/2 gram/spot) or as a bead or film at insect activity sites. Seal opening with "Pro's Choice PMP Grade" silicone caulk. Wipe down with Clean Kill to remove interior surface of all scents left by ants. Any foodstuffs infested with insect pests should be removed and destroyed. Applications to furniture should be restricted

to those areas where contact to humans will not occur. Applications to textiles or fabrics may cause discoloration or staining.

OUTDOOR PEST CONTROL

Apply AntX 75 bait to refillable stations near home entry points or as a paste as crack and crevice treatment. Spot, bead or thin film outside surfaces of buildings, porches, patios, door and window openings, crawl spaces, air conditioning units, utility entrances through outside walls, under siding/molding, water drains, electrical boxes, in garages and other adjacent areas where pests may be active and may find nesting sites or harborage. Applications should be made to substrates adjacent to buildings, the building foundations, wall voids, attic and soffit vents, expansion joints, around doors and windows, soffit areas, eaves, under stairways, around screens, on fences, trees and other areas conducive to infestation. AntX 75 may be applied directly to the ant mound.

Do not apply AntX to areas that have been recently sprayed with insecticides, and do not spray insecticides over AntX, as it will cause the bait to become repellent.

STORAGE AND DISPOSAL

Pesticide Storage: Store in cool dry area inaccessible to children and pets.

If empty: Do not reuse this container. Place in trash or offer for recycling if available.

If partly filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions.
