READ THE PRECAUTIONARY STATEMENTS  
BEFORE USE

### DIRECTION FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

**Ballast Water Treatment for harmful non-indigenous aquatic organism control:**

Use is restricted to closed loading and delivery systems. Load TG Ballastcleaner into the ballast water management system on board the ship. TG Ballastcleaner is injected into the ballast water tank with seawater intake to eliminate harmful non-indigenous and invasive aquatic organisms. The injection rate of TG Ballastcleaner must be monitored and regulated using a measuring device such as the TRO (Total Residual Oxidant) meter to ensure that it does not exceed 20 mg/L. After reaching ship's destination for loading cargo, the residual chlorine in the disinfected ballast water is detoxified and neutralized with sodium sulfite in TG Environmentalguard®. Ballast water may not be discharged into receiving waters until the reading for total residual chlorine on the TRO meter shows non-detectable, or less than 0.01 mg/L.

### STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal.

**PESTICIDE STORAGE:** Store in a cool, dry area away from direct sunlight and heat to avoid deterioration. In case of spill, flood area with large quantities of water.

**PESTICIDE DISPOSAL:** Products or rinsates that cannot be used must be diluted with water before disposal in a sanitary sewer or other approved disposal facility.

**CONTAINER HANDLING:** Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration.
