SUBJECT: Notification per PR Notice 1998-10

OXY-RES (Concentrate)
EPA Reg. No. 74559-6

Dear Mr. Swindell:

On behalf of our client, Virox Technologies, Inc., enclosed is a notification to revise marketing claims. These revisions are being required by California DPR to complete the registration of the master label in that state. Revisions include:

- The “germs” claims have been qualified with “†” which leads to the organisms supporting this claim.
- The phrase “non-porous” has been added to further explain various marketing claims.
- The “cold and flu” claims have been qualified with “n” which leads to influenza organism claims.
- The EPA Registration number has been revised from 74559-xx to 74559-6.

The new/revised text is highlighted in the attached marked up label. Also attached are two “clean” copies of the labeling.

This notification, as stipulated by the guidance, is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action, and penalties under sections 12 and 14 of FIFRA.

We look forward to a timely review of this submission. If you need any clarification or issues arise during the review of this information, please contact me immediately at 260-244-6270 for resolution.

Sincerely,

David Swain
