EPA Reg. No. 74681-5

As requested in the original registration notice you must delete the picture of the fish on the front-panel of the label. The picture of the fish implies an environmental safety claim.

2. This conditional registration will expire automatically June 15, 2005. If you fail to satisfy the conditions imposed in the registration, EPA may issue a Notice To Cancel under Section 6(e) of FIFRA.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

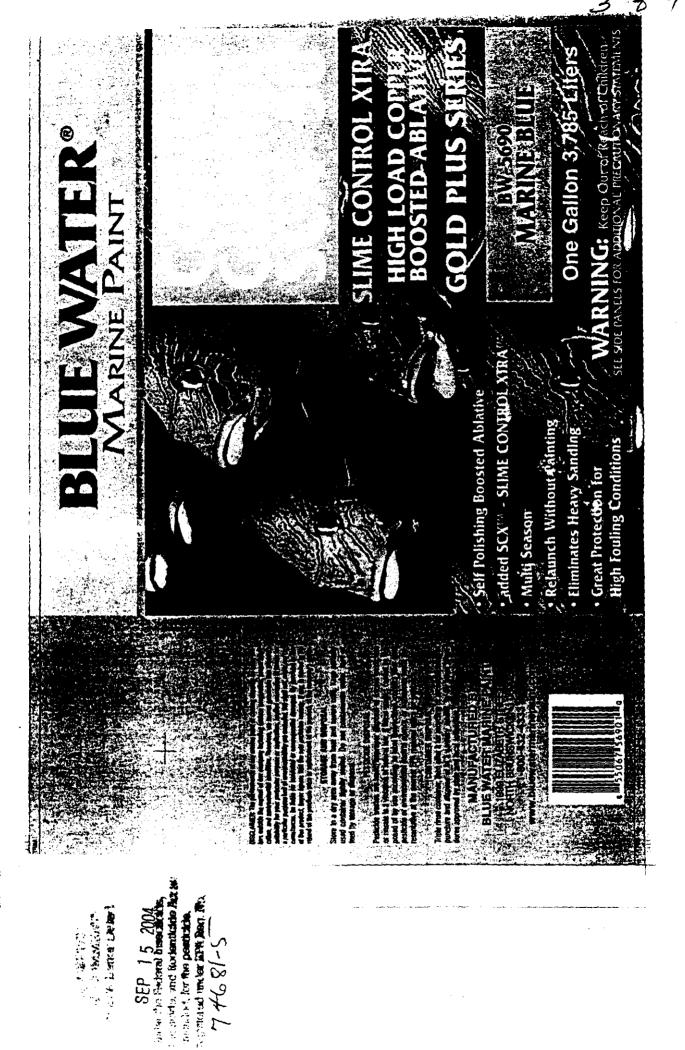

Sincerely yours,

Marshall Swindel' Product Manager 33 Regulatory Management Branch I Antimicrobials Division (7510C)

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Causes eye irritation. Harmful if absorbed through skin. Avoid contact with skin, eyes, or clothing. Wear protective clothing such as gloves, long sleeved cotton shirt, long pants and hal. May be fatal if swallowed or inhaled. Do not breathe dust, vapor or spray mist. Wear a mask or respirator jointly approved by the Mining Enforcement and Safety Administration and by the National Institute for Occupational Safety and Health while sanding boat surfaces. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling.

FIRST AID

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing. Call a poison control center or doctor for treatment advices.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have a person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambutance, then give artificial respiration, preferably mouth to mouth, if possible. Call a poison control center or doctor immediately for further treatment advice. For additional information in case of emergency call toll free Chemtrec-1-800-424-9300.

Have the product container or label with you when calling a polson control center or doctor or going for treatment.

ENVIRONMENTAL HAZARDS

This paint is toxic to birds, fish and aquatic invertebrates. Do not discharge effluent containing this product into takes, streams, ponds, estuaries, oceans, or public waters unless product is specifically identified and addressed in a NPDES permit. Do not discharge effluent containing this product to sewage systems without previously notifying the sowage plant authority. For guidance contact, your State Water Board or Regional Office of the U.S. Environmental Protection Agency. Physical AMD CHERREAL HAZARDS.

DIRECTIONS FOR USE

It is a violation of federal law to use this prodoct in a manner inconsistent with its lubeling.

Product Dependiture Counter Buarding Styling 56 provides extended antifouling protection against barnacles, algae and hydroids in salt and fresh water on boat bottoms only. SCXTM -SLIME CONTROL XTRA™ - acts like a sunscreen to prevent slime and algae. Its ablative copolymer base renders a smooth finish with durability and abrasion resistance. Copper GuardTM SCXTM 56 releases blocide by the constant exposure of new paint film to the water. Copper GuardTM SCXTM 56 has universal application over all types of property prepared bottom paints (except aluminum). For use on fast, fiberglass boats, as well as wood and steel hulls, extended protection is possible, since performance is directly proportional to the amount of paint applied.

Surface Preparation: Surface must always be clean, dry and properly prepared prior to

painting. Failure to do so will lead to eventually blistering and/or peeling. All sanded surfaces must be wiped clean with BW-216 Thinner to remove sanding residue.

General Application: For use on boats below the true waterline. Can be brushed or rolled on fiberglass, wood, steel and previously painted surfaces per application systems below. Do not use on aluminum. Apply at least 3 coats for best performance, as the life of the paint is proportional to the number of coats applied.

Mixing and Thinning: Shake or mix thoroughly and stir continuously while using. Thin when necessary with BW-216 Thinner.

Theoretical Coverage: Depending on Surface conditions, one gallon of bottom paint will usually cover over 400 square feet of elistace when brushed for rolled

THE REPORT OF A

Clean Up: Use BW-216 Thinner for cleaning equipment and paint brushes.

Estimated Dry Times: Bullium pullity and Besigned for overcoating after an overnight dry. Prior to launching, allow a minimum dry of overnight and maximum of 60 days. If drying conditions are poor, or if paint was applied too thickly, longer periods of drying will be required. Fresh coats of paint must be thoroughly dry before overcoating.

Yearly Repainting: Scrub bottom clean at haul-out. Repaint only if old paint is sound and tight; if not, remove it by sanding or with paint remover. If old paint is rough, sand it with 100-150 grit sandpaper. Prepare seams, nicks and chips as below. Spotcoat any scuffs with antifoulant. Apply 3 coats of antifoulant.

On Bare Wood: If seams are not flush, fill them with seam compound. Dry several days until skin forms. Do not sand. Fill nicks with trowel cement, dry hard, sand, apply antifoulant (reduced 10%) then follow with 2 additional unreduced coats of antifoulant.

On Bare Fiberglass: Dewax by washing with BW-216 Thinner, remove dissolved wax at once with clean paper towels or rags; repeat; sand hard to a dull finish with 80-100 grit sandpaper. Fill any chips with trowel cement, dry hard, sand. Apply 5 coats of BW-2000 Prokote Epoxy, then apply 3 coats of antifoulant.

On Bare Steel: Sandblast surface to a near white metal; remove blast residue with a broom and airhose. Wipe off with BW-216 Thinner. Do not sand. Fill in any imperfections with fairing compound. Sand smooth and wipe clean. Apply 5 coats of BW-2000 Prokote Epocy. then apply 3 coats of antifoulant.
