OFFICE OF PREVENTION, PESTICIDES AND TOXIC SUBSTANCES

Mr. David Anderson Rainbow Treecare Scientific Advancements 11571 K-Tel Drive Minnetonka, MN 55343

Subject: Label Notification(s) for Pesticide Registration Notice 2007-4 Revision of Storage and Disposal Statements

Dear Mr. Anderson:

The Agency is in receipt of your Application(s) for Pesticide Notification under

Pesticide Registration Notice (s) (PRN) 2007-4 dated May 4 & 7, 2009 for:

EPA Registration Number 74779-1 EPA Registration Number 74779-5 EPA Registration Number 74779-6

Aracinate Tree Injection Acephate Infusible Insecticide Acephate Systemic Tree & Ornamental Insecticide

The Registration Division (RD) has conducted a review of this request for applicability under PRN 2007-4 and find that the label change(s) requested falls within the scope of PRN 2007-4. The label has been date-stamped "Notification" and will be placed in our records.

If you have any questions, at 703 305-5409 or electronically at daniel.dani@epa.gov

Sincerely,

151

Dani Daniel Registration Division (7505P) Insecticide/Rodenticide Branch

SUBJECT: Rainbow Treecare Scientific Advancements Aracinate Tree Injection (EPA Reg. No. 74779-1) Label Notification

Dear Mr. Hebert:

Rainbow Treecare Scientific Advancements is submitting a notification to update the Storage and Disposal statement for our Aracinate Tree Injection (EPA Reg. No. 74779-1) per PR Notice 2007-4.

I am submitting one (1) clean copy of draft labeling for your review and acceptance along with one (1) marked copy that tracks the changes that were made. If you have any questions, please contact me either by phone at 952-252-0541 or by email at <u>danderson@treecarescience.com</u>.

Sincerely.

David Anderson Director, Regulatory Affairs Rainbow Treecare Scientific Advancements 11571 K-Tel Drive Minnetonka, MN 55343

FIRST AID:	
IF SWALLOWED	Call a poison control center or doctor immediately for treatment advice.Do not give any liquid to the person.
	• Do not induce vomiting unless told to do so by the poison control center or a doctor
	• Do not give anything by mouth to an unconscious person.
	• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
IF IN EYES	• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
	• Call a poison control center or doctor for further treatment advice.
IF INHALED	• Move person to fresh air.
	• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.
	• Call a poison control center or doctor for further treatment advice.
IF ON SKIN OR	• Take off contaminated clothing.
CLOTHING	• Rinse skin immediately with plenty of water for 15-20 minutes.
	Call a poison control center or doctor for treatment advice.
	ΝΟΤΕ ΤΟ ΡΗΥΣΙΟΙΛΝ

NOTE TO PHYSICIAN

Early signs of intoxication include dilation of pupils, muscular incoordination and muscular tremors. Toxicity following accidental ingestion of Aracinate can be minimized by early administration of chemical adsorbents (e.g. activated charcoal).

If toxicity from exposure has progressed to cause severe vomiting, the extent of the resultant fluid and electrolyte imbalance should be gauged. Appropriate supportive parental fluid replacement therapy should be given along with other required supportive measures (such as maintenance of blood pressure levels and proper respiratory functionality) as indicated by clinical signs, symptoms, and measurements.

In severe cases, observations should continue for at least several days until clinical condition is stable and normal. Since abamectin is believed to enhance GABA activity in animals, it is probably wise to avoid drugs that enhance GABA activity (barbiturates, benzodiazepines, valproic acid) in patients with potentially toxic abamectin exposure.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

PRECAUTIONARY STATEMENT HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: May be fatal if swallowed. Causes substantial, but temporary eye injury. Wear protective eyewear. Do not get in eyes, or on clothing. Harmful if inhaled or absorbed through the ckin Prolonged or frequently repeated exposure may cause allergic skin reactions in some individuals. Do not breathe vapor. Avoid contact with skin

Personal Protective Equipment

Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for Category B on an EOA chemical-resistance category selection chart.

Mixers, loaders, applicators and other handlers must wear:

- Coveralls over short sleeved shirt and short pants
- Chemical-resistant gloves EPA chemical-resistance category B (e.g. barrier laminate or butyl rubber ≥ 14 mils).
- Chemical resistant footwear plus socks
- Protective eyewear
- Wear chemical-resistant apron when cleaning equipment, mixing or loading.

Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them. Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations

Users Should:

- Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

Environmental Hazards

This pesticide is toxic to fish and wildlife. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash water or rinsate. This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds.

Physical or Chemical Hazards

Do not use or store near heat or open flame.

ATTENTION

This product contains a chemical (N-methyl pyrolidone) known to the state of California to cause birth defects or other reproductive harm.

DIRECTIONS FOR USE

It is a violation of Federal (U.S.) law to use this product in a manner inconsistent with its labeling. **Aracinate**TM **Tree Injection** is a specially formulated water soluble Abamectin to be used for injection into non-crop bearing trees for control of mites, suppression and control of certain insects, and for prevention of pine wilt nematode. **Aracinate**TM **Tree Injection** can be used as directed by commercial applicators on all non-crop bearing species of ornamentals located in commercial and residential areas wherever trees and woody shrubs are grown. **Aracinate**TM **Tree Injection** can also be used in commercial forestry production, nurseries, greenhouses, and in recreational forests. Certain insecticide applications may result in an increase in mite populations on treated ornamentals; this product may be used immediately following an insecticide application to reduce follow-up outbreaks in mite populations.

Dosage and Timing:

As with most pesticides, because efficacy may vary depending on weather conditions, geographic conditions and other biological factors, applicators should treat small-scale outbreaks on a small number of trees prior to treating large numbers of trees.

Mites on Woody Ornamentals

Including: European Red Mite Twospotted Spider Mite Camine Spider Mite Southern Red Mite Spruce Spider Mite Tarsoneimid Mites Cyclamen and Broad Mites Eriophyid Mites Rust and Bud Mites

Insects on Woody Ornamentals Including: Adelgids Aphids Boxwood Leafminer

Elm leaf beetle Flathead borer Lacebug Lepidoptera insects (such as Eastern Tent Caterpillar and Fall Webworm) Leafminers Scale

Thrips

White pine weevil

Nematodes on Pines Pine Wilt Nematode

Dosage and Timing

Use 5 milliliters of AracinateTM Tree Injection per 2 inches of cumulative trunk diameter at 4.5' above ground level. To determine the number of injection devices, divide the tree diameter by 2. If this results in a fraction, round up to the nearest whole number. Fill each device with 5 ml of product. Space injection sites approximately 6" apart around the circumference of the tree.

[Or]

[Use 5 milliliters of AracinateTM Tree Injection per 2 inches of cumulative trunk diameter at 4.5' above ground level diluted in 10 ml of water, so that each injection device is filled with 15 ml of total solution. To determine the number of injection devices, divide the tree diameter by 2. If this results in a fraction, round up to the nearest whole number. Space injection sites approximately 6" apart around the circumference of the tree.]

Apply 2 weeks before expected emergence of the pest or as the pest appears.

Follow "Dosing and Timing" Recommended For Mites

Dosage and Timing

For applications on pine wilt nematode do not dilute with water, inject straight concentrate into the tree.

For prevention of pine wilt nematode.

Use 30 milliliters of AracinateTM Tree Injection for the first 6 diameter inches at 4.5' above ground level and an additional 15 ml of AracinateTM Tree Injection for each additional diameter inch. Divide the total dosage evenly between each injection device. A single treatment will prevent pine wilt nematode infection for two growing seasons. In some cases, it may take longer for each injection unit to empty out when injecting pine species.

Optimal results are obtained when injections are made in the spring of the year.

Mixing Instructions

- 1. See the table above to determine the proper dosage rate for AracinateTM Tree Injection.
- 2. Shake the AracinateTM Tree Injection concentrate container prior to measuring out the desired amount.
- 3. Following the manufacturer's recommendations, dispense the desired amount of AracinateTM Tree Injection into the refillable injection device.

Application Instructions

AracinateTM **Tree Injection** can be used with a variety of root-flare injection devices. For all injection devices, read carefully and follow all manufacturer use directions.

When using multiple injection devices, it is important to drill the hole only for that device, seat the device, and start the injection process immediately prior to drilling and seating the next device. This limits the amount of resin buildup, which can slow down the uptake time.

Most injection devices may require up to several minutes or more to empty into the tree depending on the health of the treated tree and local weather conditions. Do not leave injection devices unattended

Reapplication

[Mites and insects] This product may be reapplied annually.

[Pine Wilt Nematode] A single treatment will prevent pine wilt nematode infection for two growing seasons. Retreat every other year.

Removal

Promptly and safely remove the injection devices according to the manufacturer's instructions after the solution has emptied into the tree. Do not leave empty injection devices on trees. Follow the manufacturer's recommendations for proper cleaning and storage of the injection devices.

If the injection device does not completely empty within a few hours, depressurize the device and remove following manufacturers instructions so as to prevent any leaking of the solution. When using a refillable injection device, empty the leftover solution into an enclosed chemical resistant container. After the leftover solution has been emptied from the injection device, triple rinse the device with water. Ensure that the rinsate is collected in an enclosed chemical resistant container. Dispose of the leftover solution and rinsate according to state and local authorities.

Restrictions

- Use only on non-crop bearing trees and shrubs. Do not use on trees or shrubs, which will produce food within one year following application.
- Due to toxicity to bees, use for micro-injection only as a post bloom application.
- AracinateTM Tree Injection is not for use on trees and shrubs less than 2" Diameter at Breast Height.

Storage and Disposal

Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited. Do not reuse empty container.

Storage

Store in a tightly closed container in a cool dry place

Pesticide Disposal

Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal

Non-refillable container: Do not reuse or refill this container. Triple rinse or pressure rinse container (or equivalent) promptly after emptying. Offer for recycling, if available or puncture and dispose of in a sanitary landfill, or incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container ¼ full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

Pressure rinse as follows: Empty the remaining contents into application equipment or a mix tank and continue to drain for 10 seconds after the flow begins to drip. Hold container upside down over application equipment or mix tank or collect rinsate for later use for disposal. Insert pressure rinsing noxxle in the side of the container, and rinse at about 40 PSI for at least 30 seconds. Drain for 10 seconds after the flow begins to drip.

For minor spills, leaks, etc., follow all precautions indicated on this label and clean up immediately. Take special care to avoid contamination of equipment and facilities during cleanup procedures and disposal of wastes.

CONDITIONS OF SALE AND LIMITATION OF WARRANTY AND LIABILITY

Notice: Read the entire Directions for Use and Conditions of Sale and Limitation of Warranty and Liability before buying or using this product. If the terms are not acceptable, return the product at once, unopened, and the purchase price will be refunded.

The Directions for Use of this product must be followed carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Tree injury, ineffectiveness or other unintended consequences may result because of such factors as manner of use or application, weather or tree conditions, presence of other materials or other influencing factors in the use of the product, which are beyond the control of RAINBOW TREECARE SCIENTIFIC ADVANCEMENTS or seller. All such risks shall be assumed by Buyer and User, and Buyer and User agree to hold RAINBOW TREECARE SCIENTIFIC ADVANCEMENTS and seller harmless for any claims relating to such factors. RAINBOW TREECARE SCIENTIFIC ADVANCEMENTS warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated in the Directions for Use, subject to the inherent risks referred to above, when used in accordance with directions under normal use conditions. This warranty does not extend to the use of the product contrary to label instructions, or under abnormal conditions or under conditions not reasonably foreseeable to or beyond the control of Seller or RAINBOW TREECARE SCIENTIFIC ADVANCEMENTS, and Buyer and User assume the risk of any such use. To the extent consistent with applicable law, RAINBOW TREECARE MAKES NO
