PREVENTS MILDEW

PREVENTS MILDEW

MANAGING THE MILDEW MONSTER

Mildew is a fungus whose microscopic spores float in the atmosphere seeking warm, damp, humid areas on which to multiply by the millions. The mildew from one house can be windblown throughout the neighborhood to contaminate all other surrounding homes.

Since escape is impossible, the next best method is preparation of a defense against attack.

DO:

1. Do paint in dry weather, when possible.
2. Do clean mildew affected areas by applying either **Krud Kutter House Wash**, or **Krud Kutter Mildew Stain Remover**.
3. Do use: **1 oz. of Di-All MC-1 Mildewcide** per gallon of paint for mildew prevention. **A minimal quantity for maximum protection.** Follow label directions.

DON'T:

1. Don't paint over a mildew area. It will grow through the paint film, causing even more difficulty.
2. Don't wash or hose down exterior surfaces with either plain or soapy water. The moisture will feed and increase the fungi.
3. If mildew problem is interior, use **Di-All MC-2 Paint Mildewcide**.

USE DI-ALL MC-1 MILDEWCIDE IN:

- Outside house paints
 - Oil and latex
 - Redwood finishes
 - Enamels
 - Floor & deck enamel
 - Varnishes
 - Masonry paints
 - Stains
 - Won't affect color, finish or durability
 - Not for use in interior paints or coatings
- See label for precautionary statements and complete directions for use.
