[RIGHT PANEL]**DANGER****PRECAUTIONARY STATEMENT****Hazards to Humans and Domestic Animals**

Danger - May be fatal if swallowed, absorbed through the skin, or inhaled. May cause irreversible eye damage and skin burns. Prolonged or frequently skin contact may cause allergic reactions in some individuals. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.

PERSONAL PROTECTIVE EQUIPMENT

Applicators and other handlers must wear:

- Coveralls over long-sleeved shirt and long pants,
- Socks and chemical-resistant footwear,
- Goggles or face shield, and
- Chemical resistant gloves (such as barrier laminate or butyl nitrile/nioprene rubber, PVC viton)

User Safety Requirements

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations

Users must wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. Users must remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Users must remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and aquatic wildlife. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsate.

PHYSICAL OR CHEMICAL HAZARDS

Flammable. Do not use or store near heat or open flame.

GENERAL PRECAUTIONS AND RESTRICTIONS

Do not take internally. Do not breathe vapor or mist. Use only with adequate ventilation. Do not get in eyes, on skin or clothing.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

VACSOL® AZURE is for use only to treat machined lumber and manufactured wood products made from Pinus radiata wood, such as door jambs, sills and window joinery. It is intended for use to control wood decay fungi and termites. Do not use before obtaining technical advice from Arch Wood Protection NZ Ltd.

Wood preparation: Perform all needed machining, cutting, and glueing of wood before treating. Wood must be clean and dry before treatment and must have been kiln dried to permit adequate penetration of preservative during treatment.

Treatment: VACSOL® AZURE is a ready-to-use solution that does not require dilution before use. Apply by pressure treatment (double vacuum process). Use a vacuum impregnation rate of 30 liters of VACSOL® AZURE solution per cubic meter. A minimum retention level of 0.36 kg of total azole and 0.08 kg of permethrin per cubic meter is recommended.

Post-treatment: After treatment, wood must be held on the drip pad until dripping has stopped, and then conditioned in a ventilated area to remove excess solvent until the wood is completely dry and odor free. Thereafter, the wood should receive a coat of primer (Benjamin Moore PE901 acrylic primer or equivalent).

Treated wood must not be used or placed where it may contact food or animal feed.

STORAGE & DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store product in original container in a secure area. Keep container closed except when in use.

Pesticide Disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

Container Disposal: Before disposal of empty containers, triple rinse and drain them. This is a non-refillable container. Do not reuse this container. Offer for recycling if available or offer container for recycling or reconditioning, or puncture and dispose of them in a sanitary landfill or by incineration, or, if allowed by state and local authorities, by burning. If disposal is by burning, stay out of smoke.
