**DESCRIPTION**

MP400-EXT® is designed for remedial treatment of in-service poles, posts, and other timber members. It may be applied by brush, trowel or pump.

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

MP400-EXT® must not be applied to poles, posts or timber members in aquatic environments.

**EXTERNAL TREATMENT:** Apply to a thickness of 1/16" on poles or timber. Typical pole application is from 3" above to 18" below groundline and lower where deeper decay is suspected. Application on poles to be restored should extend the length of wrap-around type repair systems. Wrap the treated area with water-proof bandage, OSMOSHIELD.

Proper use includes the covering of any exposed product above the groundline in areas where children or livestock may come in contact with it. Various products which can be used for this purpose are Osmose's Pasture Wrap or some other type of barrier which prevents the product from being easily removed and consumed.

**INTERNAL TREATMENT:** For control of internal decay in poles and other timbers, holes may be drilled in areas of the poles or timber where protection is required. Fill drilled holes, decay pockets, and voids using a grease gun or other pressurized applicator. Plug application holes with secure-fitting dowels.
