### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labelling

USE COMMODITIES	Stored grains, processed and manufactured grains, tobacco, dried fruit, chocolate and other confectionary products.
PESTS	Indian Meal Moth ( <i>Plodia interpunctella</i> ), Mediterranean Flour Moth ( <i>Ephestia kuehniella</i> ) Warehouse/Cocoa Moth ( <i>Ephestia elutella</i> ), Almond Moth ( <i>Cadra cautella</i> ) Raisin Moth ( <i>Cadra figuliella</i> ).
APPLICATION:	Place one Exosex SPTab tablet into the dispenser. Attach dispensers approximately 6 feet above ground level to the interior perimeter of the building and structures within the building in a grid pattern to a density of 1 tablet every 225 square feet. Replace tablets after 2 months to ensure continuity of control. Treatment can remain in place continuously throughout the year without interruption. As promulgated at 40 CFR 180.1153 DO NOT EXCEED the rate of 3.5 g pheromone per 1.000 square feet per year.
TIMING:	Where possible place the product one week prior to moth emergence.
PEST MONITORING:	Use monitoring traps throughout the treated area to assess the level of infestation. A reduction in moth numbers in monitoring traps overtime will show that the Exosex SPTab system is working. Do not place tablets within 2m (approx) to monitoring traps. Exosex SPTab is a prophylactic treatment and should be used as part of an Integrated Pest Management approach. In high insect pressure situations, supplemental spot treatments and/or intensive cleaning of infested machinery may be required to ensure that control is achieved/maintained. Over time the general reduction in moth numbers will enable individual monitoring traps to provide a warning of local infestation hotspots and pinpoint where extra remedial action is required.

	STORAGE AND DISPOSAL STATEMENTS
