Back and inside wrap labeling

Potable Aqua is for use only when water is of questionable quality or known to be substandard. Not to be used on a continuous basis. This product has not been shown to inactivate Cryptosporidium cysts. For short term or limited emergency use only.

DIRECTIONS: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Add 2 tablets of Potable Aqua to 1 quart of liter of water and cap loosely to allow a small amount of leakage. Wait 5 minutes. Shake container to allow screw threads on the closure to be moistened, then tighten cap. Wait 30 minutes before drinking.

Recap bottle tightly. Keep tablets dry.

STORAGE & DISPOSAL: Store in a cool dry place. **If empty:** Do not reuse this container. Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for Disposal instructions.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS -
WARNING: Avoid eye contact. Will cause severe irritation to eyes and mucous membranes. Harmful if swallowed. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco.

FIRST AID
If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes.
If swallowed: Call a poison control center or doctor immediately for treatment advice. Have a person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or doctor. Do not give anything to an unconscious person. Call a poison control center or doctor for further treatment advice. Have the product container or label with you when calling a poison control center or doctor or going for treatment.

Emergency Drinking water

- o 2 step treatment

GENERAL INFORMATION

POTABLE AQUA Drinking Water Germicidal Tablets are intended for emergency disinfection of drinking water.

For use only when water is of questionable quality or known to be substandard. [Potable Aqua is for use only when fresh drinking water is suspected or known to be bacteriological substandard.]

Not to be used on a continuous basis. [For short term or limited emergency use only.]

This product has not been tested for effectiveness at inactivating Cryptosporidium cysts. [This product has not been shown to inactivate Cryptosporidium cysts.]

IMPORTANT INFORMATION OF POTABLE AQUA

Keep cap on bottle tightly sealed. Humidity, moisture and exposure to air will reduce effectiveness of tablets. We recommend that you do not keep an open bottle for more than one year. Unopened bottles should remain effective up to four years.

- When used as directed, they make water bacteriological suitable for drinking.
- Used worldwide by campers, hikers, military, emergency organizations, and any needing to drink water of questionable bacteriological quality.
- o P.A. Plus are neutralizing tablets for use after water has been treated with Potable Aqua.
- o P.A. Plus neutralized the iodine after-taste and color.

- Effective against water of questionable bacterial quality
- Effective against cyst such as Giardia lamblia and bacteria such as Vibrio cholera.
- Potable Aqua has been proven effective against Giardia lamblia and Vibrio cholera when used as directed.
- Potable Aqua water purification tablets.
- Iodine-based compound (no chlorine)
- 2 tablets of Potable Aqua makes 1 quart of most water bacteriological suitable to drink.
- Uniform dosage per tablet assured – no guesswork.
- No unpleasant taste
- Easy to use
- Treats up to 25 quarts
- A must for fist-aid and survival kits
- Ideal for emergency use at home
- Use in emergency drinking water situations
- Makes questionable water bacteriological suitable to drink
- Germicidal Tablet Purification Kit with P.A. Plus
- Includes 1 liter collapsible bottle
- Iodine tablets water treatment
- Water Purification Technology [1] [1 2]
- o 2 steps: (1) Potable Aqua disinfects drinking water (2) P.A. Plus neutralizing tablets remove iodine taste and color
- Effective water treatment made simple
- Do not ingest tablets. [Tablets not to be swallowed.]

DIRECTIONS: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

- Step 1:

Add 2 tablets of Potable Aqua to 1 quart of liter of water and cap loosely to allow a small amount of leakage. Wait 5 minutes. Shake container to allow screw threads on the closure to be moistened, then tighten cap. Wait 30 minutes before drinking.

- Step 2: P.A. Plus neutralizing tablets are for use AFTER water has been treated with Potable Aqua. Wait a minimum of 30 minutes after the addition of Potable Aqua before using P.A. Plus tablets. Adding the P.A. Plus tablet before 30 minutes may allow harmful bacteria to remain in the drinking water. **DO NOT ADD POTABLE AQUA AND P.A. PLUS TABLETS AT THE SAME TIME.**

Add 2 tablets of P.A. Plus per quart of water. Shake container well. Wait 3 minutes before drinking. Tablets do not have to completely dissolve to be effective.

Recap bottle(s) tightly. Keep tablets dry.

STORAGE & DISPOSAL: Store in a cool dry place. **If empty:** Do not reuse this container. Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for Disposal instructions.
